Re: Baseball/Softball Improvements

To: Dr. Dale Ellis, Superintendent
From: Auxiliary Services

Dr. Ellis:

We received the following response from the County after their Board meeting November 21, 2023. As you are aware, after two bid dates, we received only one bid for what was deemed Phase #1 baseball/softball improvements (baseball dugout relocation, installation of bull pens, and soft netting installation). From Frankie Maness, County Manager:

Our Board of Commissioners has decided not to proceed with the project at this time. Many thanks to everyone for their efforts thus far and here's hoping some extra time will afford us the opportunity to find another path forward.

We had asked the County Manager to propose two alternates to the Board of Commissioners:

- Alt #1: hire an independent appraiser to validate the single bid proposal (cost $2500).
- Alt #2: expand the project to include the proposed fieldhouse, storage building, covered batting cages to entice more bidders (the architectural/engineering cost for full design, construction management, bidding, etc is $140,000). The construction cost estimate given by the architect for Phase 2 and Phase 3 items (fieldhouse, storage bldg., covered batting cages) is $1.5 million. Considering the substantial private donations for other improvements at Central, we thought pursuing the full project (alt #2) might gain more community support.

We were not told how much consideration, if any, was given to these alternate choices. Given the County's decision, however, do we wish to pause the project and revisit the topic with the Board of Commissioners later? Or do you wish to proceed with the installation of soft netting at the baseball and softball fields?

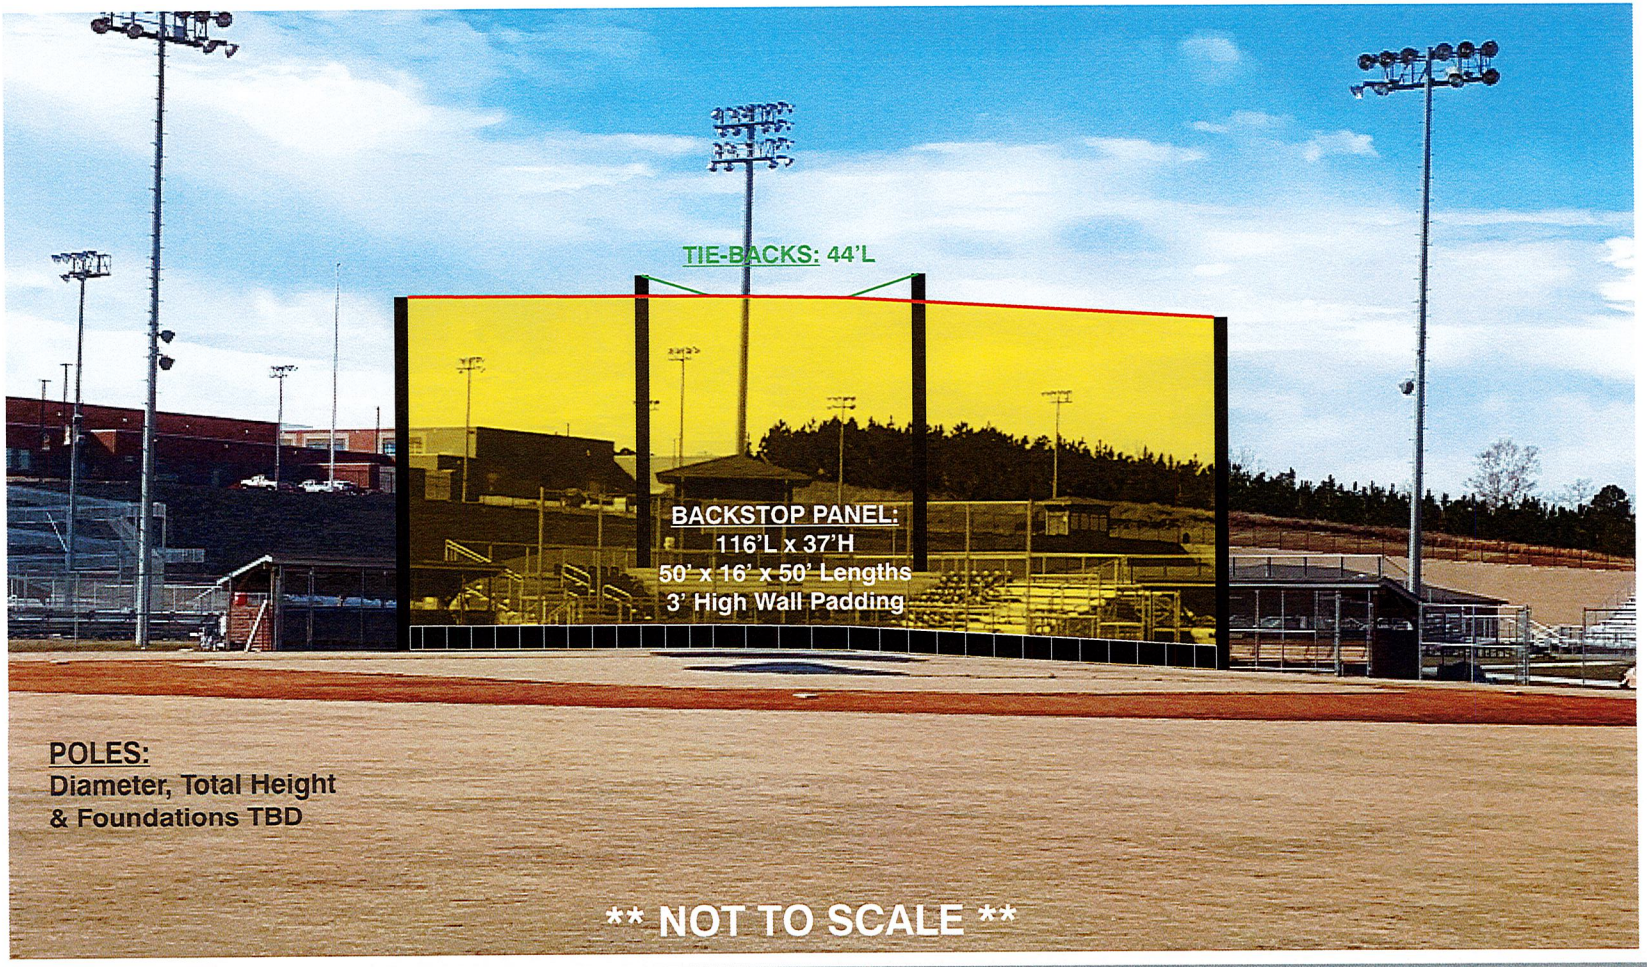

The County paid for the engineering of the nets based on the relocation of the dugouts. If the decision is made to leave the dugouts in their current locations, new engineering would be required. Attached are the quotes received two years ago, the combined price then was $179,759. Also, installing the soft netting without moving the dugouts would reduce the effectiveness of the project. The new netting would not extend down the baselines as far as needed to catch foul balls (see attached drawings).

Knowing that no project (be it dugout relocation or just net installation) could be completed by the start of the next season (late February), the recommendation is to address the viability of the full project with the Commissioners during budget season.

Item	Quantity	UoM	Price	Total

- Pricing does not include tax.
- Includes equipment rental as required.
- Proposal assumes equipment (lifts, utility vehicles, etc.) can access warning track and/or construction area without field protection. SSI will not be held liable for any resulting damages if field protection is not requested by the Owner/Contractor.
- If field protection is used, SSI will not be held liable for any damages to the field, turf, warning track and/or construction area.
- Restoration of warning track, grass, turf and/or any other field surface is not included.
- Some wrinkles in the windscreen/vinyl are characteristic of the material and are to be expected.
- Excludes permits, bonds, inspections and any associated costs.
- The costs associated with union/prevailing wages are not included unless otherwise stated. Any prevailing wage schedules or certified payroll requirements must be explicitly outlined prior to bid and/or contract execution to ensure wage compliance.
- The installation of athletic equipment includes an estimated number of mobilizations to ensure favorable cost management and utilizes the most efficient scheduling practices. Therefore, it is the responsibility of the Contractor or Owner's Representative to mitigate unsuccessful mobilizations. If additional mobilizations are necessary, there will be an additional charge subject to travel time, mileage, lodging and other associated expenses.
- At the completion of the project, Sportsfield Specialties and/or the Installer will schedule a walk-through with the Contractor/Owner's Representative to address any issues/concerns before leaving the job site. If the Contractor/Owner's Representative is not available for a walk-through, or non-warranty issues are discovered after the Installer leaves the job site, additional remobilization charges to address the punch list may apply.

- If foundations are required, public and private utilities must be marked ny end user prior to our arrival. Sportsfield Specialties cannot be held liable for any damages resulting from unmarked utilities.
- Proposal assumes appropriate digging conditions and does not include shoring or rock drilling.
- End user to designate on site location for dumping spoils.
- The installation pricing included in this proposal reflects preliminary foundation estimates based on similar projects completed in the past. SSI reserves the right to update pricing as required once the stamped design is received from a licensed Professional Engineer.

- $25 charge PER CUT-OUT if needed for electrical outlets, light switches, etc.
- Graphics are additional if requested by customer.
- Assumes pads and other materials can be stored within facility before/during installation.
- Assumes padding support structure (i.e. concrete wall, steel framing, block wall, etc.) is provided by others.
- Some wrinkles in the windscreen/vinyl are characteristic of the material and are to be expected.
- Proposals are typically based on available drawings, rough measurements, etc. Sportsfield Specialties reserves the right for additional charges should discrepancies be discovered during the field verification process.
- In the event that construction delays and/or schedule constraints necessitate the use of other trades shop drawings for pad creation (in lieu of a site visit), Sportsfield cannot be held liable for any resulting discrepencies. If new pads must be created, additional charges may apply.

- Systems utilizing Dyneema rope should be expected to sag/stretch after initial installation. SSI strongly recommends that the client prepare for a re-tensioning trip in the weeks/months after initital installation, but this has been excluded from our proposal unless directed otherwise.
- Proposal assumes connection locations will be identified prior to Installer arriving on-site.
- Assumes all cable connections shown are feasible per design using typical termination practices including welded tabs, thimbles and fist grips.
- Sportsfield Specialties cannot be held liable if concrete cracks while installing eyelets or poles at the concrete wall or dugout.
- Final tension and deflection in the netting shall be determined, accepted and maintained by the Owner.
- Verification of loads on any existing structural elements shall be by others.

DISCLAIMER: Sportsfield Specialties, Inc. protective netting systems are designed and intended as a complete netting system. In the event your facility replaces an existing system, relies on existing structural elements, or purchases an extension to an existing protective netting system, Sportsfield Specialties, Inc. does not make any representations or warranty relating to the overall design of the combined facility and/or the connection points to and the cables that are part of the existing netting system. Owner's decision to proceed with an extension in lieu of a complete new netting system will be at Owner's sole risk and without liability to Sportsfield Specialties, Inc. and Owner shall indemnify and hold harmless Sportsfield Specialties, Inc. from all claims, damages, losses and expenses arising out of or resulting therefrom.
