Spotlight: Independent Practice (IP)

What is Independent Practice (IP)?

Newmark offers the opportunity for students to practice their academic skills away from the classroom. Independent Practice is given nightly. Independent Practice is important because it helps students develop and refine intellectual skills, develop into independent learners and nurture an identity as successful learners. The purpose of Independent Practice is to check whether the student understands a concept or skill; to practice a skill learned in class; to preview something he/she will learn in class soon and to review for a test or quiz.

How much IP should my teen get?

Research recommends the 10-minute rule for IP, which means that for whatever grade the student is in, they will receive 10 minutes of practice. Newmark High School students will receive no more than 90-120 minutes of Independent Practice per night.

While Independent Practice is an assessment for feedback, all assignments are reviewed with an Independent Practice rubric and are 10% of your student's quarterly grade. The IP rubric is discussed with students to provide guidance on assignment completion. Parents can view the IP rubric within the student's Schoology courses in the parent resource folder.
