

## PROPOSED NEW HIGH SCHOOL

### OVERVIEW

The 2016 bond approved funding for a new comprehensive high school at Issaquah School District. The new 240,000 square foot building will include core learning environments, a science suite, athletic facilities, community spaces such as a Library, Gym, Commons and Performing Arts Center, administrative areas, special services and building support spaces. Additionally, the project includes the development of an all-weather turf athletic field. The new high school is targeting to serve approximately 1800 students in grades 9-12 and will reduce student populations at Issaquah and Skyline High Schools, while meeting the District's needs into the future. The project is currently on hold pending additional funding.

### PLANNED PROJECTS

- New High School

**PROJECT BUDGET: \$182,700,000**
