

Clean & Sanitize

Detergent Only

Sanitizer Only

Store Wiping Cloths? **NO** 

Store Wiping Cloths? **OK** 

- Do not store green and red buckets on top of or above work surfaces or service stations where food is being handled, served, or stored.
- Never use designated green and red buckets for any purpose other than for holding, cleaning, and sanitizing solutions.
- Check and change solutions often as they become dirty.

Serving Lines:

- During service, use only **red** buckets with wiping cloth. Keep these buckets away from food and ensure nothing else is stored in that area.
- For end-of-day or major cleaning, both **red** and **green** buckets should be used.
- In kitchen preparation areas, both **red** and **green** buckets should be placed in designated areas.
- Store wiping cloths in the **red** sanitizer bucket. Do not store dry cloths next to the buckets. Instead, keep them in a designated area such as the laundry area, a tub, or the manager's office.
