## Class of 2025

**From:** Upper West Side

**First Year at HM:** 6<sup>th</sup> Grade

**On Campus Activities:** I'm the Captain of the HM FTC Robotics Team, and the President and Founder of The HM A Capella Club. I'm also the Managing Editor of HM's science and medical journals, *Spectrum* and *Diagnosis*, and the Senior Editor of HM's movie magazine, *Cinemann*!

**Favorite Class:** I've enjoyed every course that I've taken at HM, with each promoting an intellectually stimulating, engaging, and collaborative environment. One of my many favorite classes that embodied these values was "Molecular Genetics: Cells and Physiology."

**Why HM?:** HM isn't just a school; it's a second home. When you're a part of HM, you're a part of a tight-knit community filled with people that genuinely care about you. Your teachers aren't just teachers—they're mentors and friends that provide guidance, cheer you on, and believe in you even when you don't believe in yourself. At HM, your friends become like family, and they're always there for you. Our community isn't just about learning; it's about living and loving every moment of the journey together.

**Favorite Cafeteria Food:** I absolutely love our Egg Noodles with Beef Stroganoff! Paired with our Chicken Noodle Soup, it's a killer combo!

**Favorite TV Show:** *Brooklyn Nine-Nine*

**Favorite HM Trip:** As a student mentor in HM's Upper Division Orientation Program, we travel to HM's John Dorr Nature Laboratory to welcome new students to the Upper Division. It's always such a joy to get to know both current and incoming students, especially on the High Ropes Course!
