

Rain

Class of 2025

From: Upper East Side /
Beijing, China

First Year at HM: 6th Grade

Favorite Classes: All classes at HM are very interesting and challenging. Namely, I enjoyed Honors PreCalc, Physics, Theoretical CS the most. In Senior year, I'm most looking forward to Math Seminar and Physics with Calc.

On Campus Activities: Varsity Water Polo, guitarist in Jazz Band, Programming Club, Model UN

Why HM?: HM is a great because everyone is motivated. Everyone here has their passions, and we all work hard to achieve our goals. HM allows me to develop in a multifaceted way, as I can balance between academics, sports, music, etc. Also, the discussions here at HM are very thought-provoking, and I feel thoroughly challenged. At the same time, the teachers are all very supportive, which makes learning very enjoyable.

Out of School Activities: I've been learning about machine learning outside of school, and I've done a few research projects that applies machine learning to medicine design.

Favorite Movie: *Imitation Game*

Favorite In-Class Discussion: Suppose there's an equilateral triangle inscribed in a circle: What's the probability that a random chord of the circle is longer than the side length of the equilateral triangle? (there's multiple answers!)
