

SHAC Meeting Notes

Jan. 24, 2024

Welcome by Cheryl Manchester, Director of Special Programs

Introduction of Amy Waiser, Safe and Secure Schools Coordinator

Heather Engstrom, Assistant Superintendent of Curriculum and Instruction

New state law passed during the summer 2023 session requires students grades 6 – 12 to receive fentanyl instruction

Waiser has worked with other districts to find and compile resources for this curriculum

If board finds the presented curriculum age-appropriate, materials will be presented to the Board of Trustees for approval in February, ideally

Materials would be presented every year

Manchester explained that the previously scheduled March 27, 2024 SHAC meeting will be put on hold, and a meeting invite for a follow-up meeting will go out to SHAC members today

Teaching of this material will most likely occur after testing, so May of this year

Each member received flash drive with suggested curriculum with teacher guides and student materials to review and make recommendation on

Waiser reviewed the curriculum with SHAC members present

This will be in addition to what students already review in their health classes

Lessons broken down by grade level: 6th grade, 7th & 8th grades, 9th & 10th grades, 11th & 12th grades

Engstrom: another state law is training on human trafficking awareness

There is an option to include this training for grades 6-12 beginning next year

Waiser reviewed staff training with SHAC members

Waiser shares that she is in the process of reviewing curriculum option for students

Waiser shares KISD Vaping Data for the school year so far and the supports in place for students with prevention and intervention resources

Closing by Cheryl Manchester, review of homework for members, reminder for next meeting on Feb. 7, 2024 at noon in Central Office Board Room
