

MEDICAL REQUIREMENTS FOR ENROLLMENT IN SCHOOL 2022-2023 School Year

The Massachusetts Department of Public Health (105 CMR 200.00 and 220.00) specifies minimum immunization and physical examination requirements **before admission to school**.

Immunizations: A copy of a current, up to date immunization record is required

Preschool	Kindergarten	Grades 1-6	Grades 7-12
3 doses Hep B 4 doses DTaP 3 doses Polio 1-4 doses Hib 1 dose MMR 1 dose Varicella (Or reliable history of varicella) Lead test	3 doses Hep B 5 doses DTaP* 3-4 doses Polio** 2 doses MMR 2 doses Varicella (Or reliable history of varicella) Lead test	3 doses Hep B 5 doses DTaP* 3-4 doses Polio** 2 doses MMR 2 doses Varicella (Or reliable history of varicella)	Grade 7: 1 dose MenACWY Grade 11: 2 doses MenACWY*** 1 dose Tdap 3 doses Hep B 5 doses DTaP* 3-4 doses Polio** 2 doses MMR 2 doses Varicella (Or reliable history of varicella)
*DTaP: 4 doses are acceptable if the 4 th dose is given on or after 4 th birthday **Polio: 3 rd or 4 th dose must be given on or after 4 th birthday ***MenACWY: 2 nd dose must be given on or after 16 th birthday			
Exemptions: (must be renewed annually) Religious: A signed parent/guardian statement that immunization(s) conflict(s) with religious beliefs. Medical: A signed physician statement that immunizations are waived for medical reasons. Homeless students: nurses will work on compliance with parents/guardians.			

Reference: MA DPH School Immunization Requirements

Physical Exams: A copy of a physical exam is required and must be *within one year prior to entrance to school*. Health records transferred from a student's previous school may be used to determine compliance with this requirement.

***Tuberculosis (TB) Testing is required for school entry for:**

- Students who were born in a high risk country* and do not have a documented test performed in the US.
- Students who have had contact with person(s) suspected to have tuberculosis.
- All students (newly enrolled and currently registered) who have spent more than 4 calendar weeks in a high-risk country*.
 - If a TB test is positive, students are required to have a chest x-ray and consult with the physician regarding treatment. Written clearance from their physician is required to enter school.
 - NOTE: If a student has received a BCG vaccination in the past and receives a positive PPD (Mantoux) result, a QuantiFERON blood test will be required for entry (this is to rule out latent TB; a chest x-ray alone will not meet this requirement).
