Inquirers

Knowledgeable

Thinker

Communicators

Principled

Open Minded

Caring

Risk Taker

Balanced

Reflective

Peachtree Elementary School has been an authorized International Baccalaureate Primary Years Programme since May 2010. The journey to implement the PYP has benefited teachers, students and community members as we collaborate to deepen our understanding of conceptual and inquiry-based teaching and learning.

EXHIBITION

Exhibition is the culminating experience for PYP students. Our 5th Grader students take ownership of their learning to guide their exhibition topic and collaborate with their peers to take action.

KEY CONCEPTS

Key Concepts are broad organizing ideas that promote both transdisciplinary and subject-based thinking. The concepts are form, function, change, causation, connection, perspective, responsibility.

IB International Baccalaureate

Peachtree Elementary

Primary Years Program

- The PYP focuses on the development of the whole child as an inquirer, encouraging students to ask questions to make sense of their learning.
- Subject area AKS are integrated into six transdisciplinary units and taught at the conceptual level encouraging and enabling students to link content knowledge to their prior knowledge and to their lives and the world around them.
- Summative assessments at the end of each unit invite students to extend their learning by putting it into action.

WORLD DAY At Peachtree Elementary

IB World Day is a school wide tradition celebrating the continents and their cultures, with the goal of recognizing our family histories.
