

Some Tips and Tools for the online SAT!

We hope your school year got off to a great start! As you begin your year, please take some time to review the following tips and reminders from Services for Students with Disabilities (SSD).

Helpful Tips

Bluebook™ offers a variety of helpful testing tools to all students taking the SAT®, PSAT-related assessments, and digital AP® Exams. Universal tools are available to all test takers and don't need approval. Please encourage students to use these tools on posted practice tests and consider these features prior to submitting accommodation requests.

Bluebook Testing Tools:

- **Calculator:** Tester can drag the Desmos built-in calculator anywhere on the screen.
- **Reference Sheet:** Commonly used formulas will appear on all tests with math questions.
- **Highlights & Notes:** This tool highlights text from a question and/or tester can leave a note to refer to.
- **Mark for Review:** Tester can use the bookmark icon to flag any question they want to return to.
- **Line Reader:** Tester can use this tool to focus while reading test content.
- **Option Eliminator:** Tester can cross out answer choices that they think are wrong.
- **Question Menu:** They can see which questions are skipped/marked for review and navigate to any question in the section.
- **Expand Passage or Item:** They can expand an item to get a closer look at any question.

- **Testing Timer:** Student clock counts down time left for each section and gives a five-minute warning.
- **Zoom:** Tester can use keyboard shortcuts on laptops or pinch and zoom on tablets.
- **Color Contrast/Filters:** They can invert colors, increase contrast, use color filters, and filter types.
