Title 1 Math Intervention Program

Hello Families!

Welcome to Dover Intermediate's Title One Math Intervention Program. We are pleased to have the opportunity to be a part of your child's Math development and learning experience. Our overall goal is to not only develop, guide and build your child's Math abilities, but to create a love for Math and learning that will span their lifetime. The ability to learn, read and grow is a lifelong journey that we hope they will embrace with confidence and enjoyment. We look forward to partnering with you to create an atmosphere in which your child will become successful not only in Math, but in life.

Your child has been identified for our tier of intervention based on DIBELS (Dynamic Indicators of Basic Early Literacy Skills) or MAP (Measure of Academic Progress) assessments. The instruction provided to your child will be individualized based on their needs as indicated by these assessments.

We look forward to working with your child this year!

Sincerely,

Title 1 Math Team
