Facilities Survey Results

Q2 Which facilities in or connected to the District building you work in most often do you feel need to be improved or added on to? (check all that apply)

Answered: 52 Skipped: 3

Top Staff Facility Concerns

1. Classrooms/Flexible Learning Spaces (65%)
2. Meeting Space for Staff/Teachers (54%)
3. Cafeteria (25%)
4. Playground/Outdoor Rec Space (21%)
5. Band/Orchestra/Choral Space (17%)

Classrooms/Flexible Learning Spaces (65%)

1 Most of our flexible spaces are in nooks and notched in the hallway. These students that are working with paras are struggling with needs that are and are not diagnosed. They need quiet spaces to be able to focus. We have amazing paras but they can't accomplish much or compete with crowds of students walking by constantly.

10 The hallway is often used as a teaching space for small groups and occasionally so is the lunch room. This is not adequate for students with specific auditory needs or sensory processing needs. It also makes the hallways less physically accessible for those with physical needs. Our parking lot and sidewalks are treacherous during the winter with ice and teachers entering the building through side doors cannot use handicap door buttons efficiently as we need to put a physical key in the lock. Doors to commonly used spaces (ie media center) should be handicap accessible.

Meeting Space for Staff/Teachers (54%)

I found this response interesting because no one commented about their reasoning in highlighting this area as a need!?

Teachers can meet before school in classrooms.

The conference room seats about 12 - 14 and is used for most medium sized meetings.

The media center and “bleacher” gym is used for large group meetings.

Cafeteria (25%)

8 The cafeteria is too crowded and WAY too loud for individuals with sensory needs, hearing impairments, and mobility differences.

Our cafeteria has a low ceiling which makes sound mitigation a challenge.

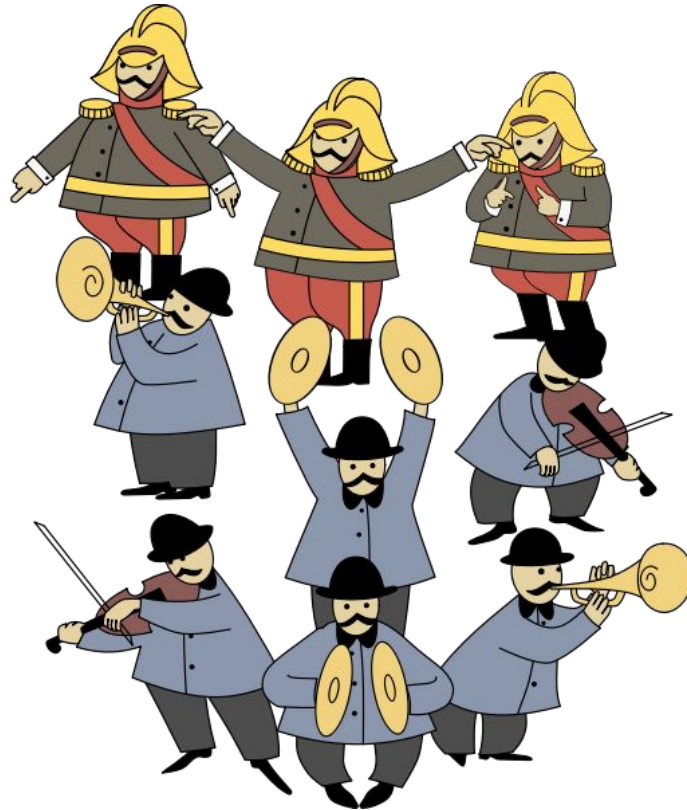

Playground/Outdoor Rec Space (21%)

4 More handicap accessible playground and outdoor activities for students and caregivers of all ability levels.

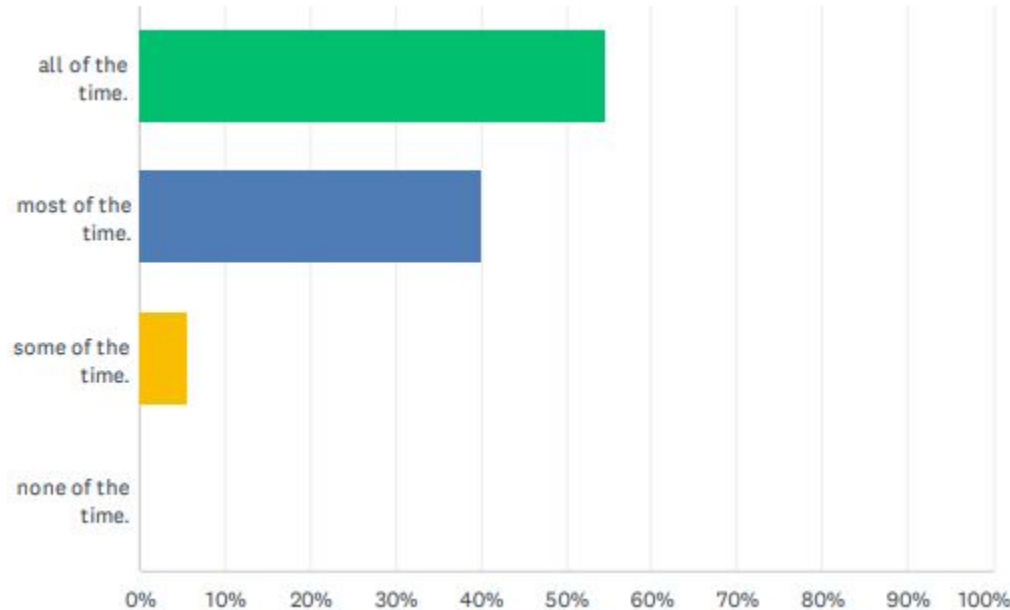

It is a challenge to have older students out on the playground with younger students.

Band/Orchestra/Choral Space (17%)

Q7 Please check the box that completes this sentence for you: I feel safe in my office, classroom or the space in which I work most often ...

Q8 What would make you feel more safe in your office, classroom or the space in which you work most often?

Response to challenging students.

Hearing alarms and PA systems.

Cameras.

Monitoring deliveries during the day.

Amenities

Teachers lounge expansion

More staff bathrooms

Administrative Facilities Needs

More small instructional spaces.

More small office spaces for itinerants.

A specially designed Level 3 EBD program space.

Delivery door monitoring system.

Some unisex bathrooms for students.

Prevent youth from climbing on the roof after hours.

Key cards to enter building on the weekend.

Turf for playground blacktop.

Administrative Facility Victories

Air conditioning.

Gym space.

Prep room conversions.

Maintenance.

OLC (Outdoor Learning Center)

KRTS (Kids Run the Station) room
