Greensburg Community Schools High Ability/Advanced Placement Appeal Procedure

Greensburg Community Schools utilizes a multi-faceted identification process; however, in the event that a student is not identified for high ability or advanced placement, a parent can petition for an appeal. The following steps can be taken in such a situation:

Step 1: Parents must submit the High Ability Appeal Form to the Director of Curriculum indicating the reason for the appeal. The request should include the specific area of concern and include student data to support placement and/or identification in high ability and/or advanced placement courses.

Step 2: School and district personnel will review data and determine if additional/alternative assessments may be given to aid in the final placement decision.

Step 3: After additional data is gathered, the administration and Director of Curriculum will consult with classroom teachers and the HA teacher to make a final recommendation.

Ultimately, the administration will make the final determination regarding high ability and/or advanced placement for students based on research-based methods for identification of students.
