COMMERCIAL MUSIC

This is the pathway for you if you...

- + Love music
- + Want to write and record a song
- + Have ever wondered how music is made and recorded
- + Enjoy playing instruments or singing
- + Want to make your own beats or songs

“

Commercial Music

encompasses the study of Pop, Rock, Hip-Hop, R&B, Latin and World music.

You will build a solid foundation of songwriting techniques, music production and understand how to navigate recording software and recording studios.

”

WHERE THE MAGIC HAPPENS...
AND CAREERS BEGIN!

COURSE SEQUENCE

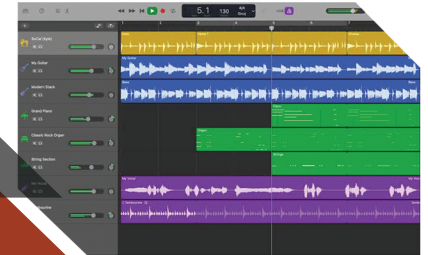

1

MUSIC PRODUCTION & RECORDING ARTS 1

Students will learn how to record, mix and edit vocals. They will then make a song from scratch using Garageband.

Students will learn basic music theory and fundamentals, read music and explain how sound is created & transmitted.

2

MUSIC PRODUCTION & RECORDING ARTS 2

Students will learn advanced band recording, mixing, synthesis, "off-site" recording and mixing and live sound reinforcement.

Students will create their own electronic song and learn more about professional careers in the music industry.

3

MUSIC PRODUCTION & RECORDING ARTS 3

Students will focus on technology and musical literacy skills as tools to arrange, compose, edit, and produce music through digital audio workspaces.

Students will learn how to use industry standard software, speakers, headphones, keyboards and microphones.
