EARLY CHILDHOOD SCREENING

Early Childhood Screening is a check of how your child is growing and developing.

Early Childhood Screening may detect possible health or learning concerns, ensuring early support and attention before starting school.

Best to be screened at age 3.
Required before Kindergarten Registration.

Is this a test?

No, this is not a test. No one is expecting your child to complete all tasks or answer all questions.

Early Childhood Screening is an opportunity to see how your child is developing. Children are encouraged to participate and do their best without coaching or prompting from parents.

How long will this take?

Appointments are typically 60 minutes.

Should I wait until my child is ready for Kindergarten?

No, earlier is better!! If there are concerns, it is better to connect you with the resources so that your child can get help before school.

I don't have concerns. Does my child have to be screened?

Yes, the State of Minnesota requires Early childhood Screening for all students before entering a public school.

Who should come?

Screening should be attended by the legal parent/guardian and the child. Siblings are not allowed in the screening room, no childcare is provided.

How much does it cost?

Early Childhood screening is FREE!!
