

Student Artificial Intelligence Code of Conduct

This code of conduct is intended to guide students in using AI responsibly and ethically in their academic work and projects. Teachers may choose to use the AI Levels to classify assignments or projects as needed and should provide students with clear expectations for when AI is appropriate, permitted, or restricted. The use of AI must be done in a manner that is consistent with the district's expectations regarding academic integrity. Misuse of generative AI may be considered cheating or plagiarism.

Student Responsibilities

When utilizing generative AI tools to create or support the creation of texts or creative works, students are expected to adhere to these guidelines as well as additional guidance provided by their classroom teacher.

1. **Use AI responsibly:** Students should use AI tools and techniques in a responsible and ethical manner. This includes not using AI to cheat, plagiarize, or gain an unfair advantage. Generative AI tools should *only* be used for school-related creative work (e.g., to generate text or other creative works) when given approval or guidance from classroom teacher.
2. **Understand the limitations of AI:** Students should understand the limitations of AI and recognize that it is not a substitute for critical thinking, creativity, and problem-solving skills.
3. **Consider the potential biases of AI:** Students should be aware that AI tools and techniques
4. may be biased and should take steps to mitigate bias when using AI.
5. **Maintain data privacy:** The use of AI should be done in a way that protects personally identifiable information (PII). Students should not share any PII with AI technologies, including name, birth date, address, or other financial or confidential information.
6. **Check sources generated by AI:** AI is not perfect, has been known to create inaccurate information, and can be used to create misinformation and disinformation. Use SIFT research skills (Stop, Investigate the Source, Find Better Coverage & Trace to the Original Context) to check sources and find independent facts to confirm AI-generated content.
7. **Provide attribution:** When using AI tools and techniques, students should provide proper attribution and credit to the source of the tool or technique.
8. **Seek guidance when in doubt:** When students are unsure whether the use of AI is appropriate for a particular assignment or project, they should seek guidance from their teacher or instructor.

AI Permissibility Levels

AI Recommended

Generative AI is recommended for use in completing this assignment or project. Students are encouraged to explore AI tools and techniques to enhance their work. Properly cite any AI-generated work products.

AI Permitted

Generative AI is permitted but not required for completing this assignment or project. Students can choose to use AI tools and techniques if they believe it will improve their work. Properly cite any AI-generated work products.

AI Restricted

Generative AI use in completing this assignment or project is restricted. Students are expected to complete the work using only their own knowledge and skills.

If a teacher has not specifically indicated whether generative AI is recommended or permitted for an assignment, students should ask before using generative AI.

When generative AI is recommended or permitted, students should rely on their classroom teacher to provide further guidance on the extent to which students may make use of it in the context of the specific assignment.

Adoption Date: 08/2024
Classification: **Encouraged**
