

- Connecting Devices to the Promethean ActivPanel –

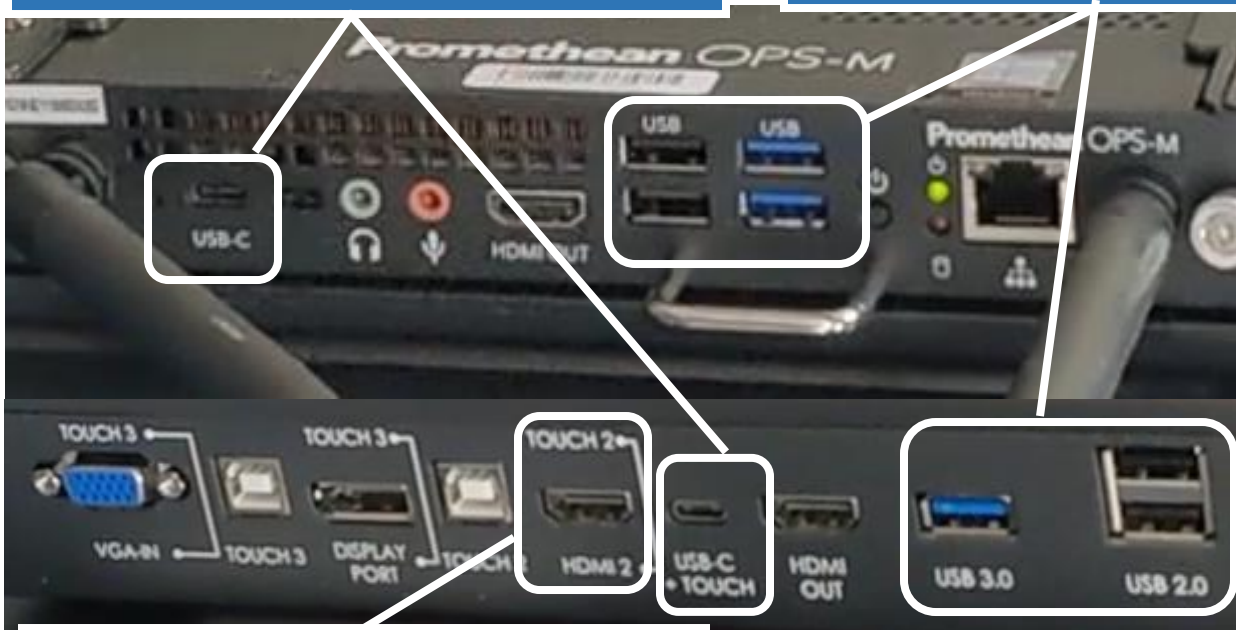

You can easily connect devices to your Promethean panel or to the built in OPS Windows computer. These devices might include a web camera, laptop, document camera, USB drive, etc. Your Promethean panel comes with a USB cable, USB-C cable, and HDMI cable.

USB-C ports:

USB-C ports are located on the left side of the panel and the front of the panel. These can be used to connect a laptop for the purpose of mirroring the laptop screen. The USB-C connection will also charge the attached laptop. However, this can be reserved as a backup connection in the event that wireless screen sharing is not available. A USB-C cable is included in the box.

USB ports:

USB ports are located on the left side of the panel and the front of the panel. These can be used to connect document cameras, USB drives and web cameras. If you want to use the connected device with the built-in Windows computer, be sure to connect them to the USB ports of the OPS computer on the left side of the panel.

HDMI In Ports

HDMI ports are located on the left side of the panel and the front of the panel. These can be used to connect a laptop for the purpose of mirroring the laptop screen. However, this can be reserved as a backup connection in the event that wireless screen sharing is not available. An HDMI cable is included in the box.
