The ACCENT program is designed for students whose measured intelligence places them in the top nine percent nationally. Students attend gifted classes five hours each week. The program begins in the second grade and continues through the sixth grade.

Mission Statement

The mission of the Clinton Public School District's Gifted Education Program (GEP) is to maximize student potential through challenging curriculum and differentiated instruction that provide learning experiences planned for depth, complexity, creativity, and productive thought.

Overview of Gifted Program Competencies, Goals, and Outcomes

THINKING SKILLS	CREATIVITY
Given a topic/situation, the learner will define and classify the problem(s), make connections, and draw distinctions, analyze information objectively and critically (reflectively developing a relationship between facts and values), and differentiate truth and beliefs from his/her understanding of what is logically and realistically possible.	Given a real-life situation, the student will be able to select from divergent thinking, analogical thinking, visualization, attribute listing, morphological analysis, synectics, intuitive thinking, spontaneous thinking, creative problem solving, and/or the creative process in an appropriate manner to develop a workable solution(s).
INFORMATION LITERACY	COMMUNICATION SKILLS
Given a real situation, the student will identify and define the problem, design a research plan appropriate to the problem, conduct the investigation, decide on the most appropriate media for dissemination of the findings/ solutions, and present the results before an authentic audience.	Given the need to retrieve and/or disseminate information, the students will select and utilize the most appropriate media based upon available resources, technology, audience, and time available, for the most effective communication of information, ideas, feelings, and concepts and correctly interpreting those of others.
AFFECTIVE SKILLS	SUCCESS SKILLS
As a gifted learner, students will develop self-acceptance and awareness and demonstrate responsibility for personal growth along with awareness of personal and cultural diversity in others by recognizing forms of bias and stereotypes in order to respect unique beliefs and experiences in themselves and others by understanding and embracing giftedness, appropriately coping with stress in order to become healthy, responsive, contributing, and productive members of classroom communities and society as a whole.	Given a real-life situation, the student will utilize effective organizational, decision making, goal-setting, project management, and time management skills, including controlling impulses and adapting to unforeseen circumstances, in order to develop solutions to problems and achieve goals whether working individually or as a leader or member of a team.

MDE OUTCOMES for Intellectually Gifted Education Programs, 2017

Program Description

The elementary program for gifted children operates on a semi-separation basis. Eligible students attend the ACCENT class for five hours each week.

Northside Elementary Students attend ACCENT one hour each day during their enrichment period.

Eastside Elementary Students attend ACCENT one hour each day during their tutorial time period.

Lovett Elementary Students attend ACCENT during their exploratory time.

The ACCENT program begins in the second grade and continues through the sixth grade. Advanced Placement (AP) classes are offered at the high school level.

In providing a curriculum, the teachers tailor activities to match the learning styles of each student. The curriculum, based on higher levels of Bloom's Taxonomy of Cognitive and Affective Skills, deals with the high mental processes and lessons requiring analysis, synthesis, and evaluation. In addition, special qualities such as originality, fluency of ideas, intellectual curiosity, independence of thought, and conceptual elaboration are stressed. Opportunities are provided to develop roles of leadership and responsibility. Emphasis is placed on a learning atmosphere that promotes effective self-understanding by helping students know how they feel, how others feel, and how their behavior affects others. Thus, the curriculum provides opportunities for the students to explore, question, communicate, share, create, lead, follow, and make decisions.

The classes will include the following activities:

Independent Projects	Include work done by one student or by two to three students working together. These projects may be an outgrowth of an entire class study of a given topic or may stem from an interest of one or more students in an area unrelated to the work in the classroom
Informational Literacy	Provides instruction in techniques of research, including the use of technology as well as other resources.
Conceptual Units	Consist of a series of lessons on particular topics that relate to a conceptual theme. For example, a unit might center around the concept of "Daring Discoveries" or "Change." The use of broad concepts encourages the gifted student to make connections, to generalize, and to explore complex ideas.

Thinking Skills	Involve skills of inference, deduction, analysis, drawing conclusions, interpretation, and evaluation as steps in the process of thinking at deeper levels. Students are provided opportunities to develop these skills within the process of logical thinking.
Creativity	Teaches the use and development of the four types of creative thinking (fluency, flexibility, elaboration, originality), divergent and analogical thinking, visualization, attribute listing, morphological analysis, synectics, spontaneity, and risk-taking.
Success Skills	Develop the ability of a student to work with a group to create unique solutions to real or contrived problems. Present problem-solving situations designed to foster divergent thinking and to expose students to many discussion techniques. Group roles are explored and leadership skills are taught. Utilize two types of discussion groups, the primary purpose being the formation of a consensus or decision so that an agreement on a plan of action may be accomplished. The learning group is used to help individuals explore ideas and to discover meanings through the interaction with others. Expose students to the characteristics needed to be good leaders. Students will discover the leadership styles of past and present leaders as well as analyzing their own styles.
Affective Skills	Offer students the opportunities to improve the qualities of intra- and interpersonal relations. Positive affective traits can help students relate to one another with warmth, trust, and respect. Since learning and living with others require social skills, skill building for positive relations is important. Learning more about oneself is imperative. Self-awareness leads to self-acceptance and self-improvement. Becoming one's best self can aid in all areas of life.

Characteristics of the Gifted Student

Can include:

Reasons well
Has extensive vocabulary
Has a long attention span
Shows compassion
Is intense
Has strong curiosity
Has a high degree of energy
Has a wide range of interests
Is an early or avid reader
Has mature judgment for age
Has a vivid imagination
Tends to question authority
Is good at jigsaw puzzles

Learns rapidly
Has an excellent memory
Is sensitive
Is a perfectionist
Is morally sensitive
Perseveres in their interests
Prefers older companions or adults
Has a great sense of humor
Is concerned with justice, fairness
Is a keen observer
Is highly creative
Has facility with numbers

The Differences Between a Bright Student and a Gifted Student

The Bright Child

Knows the answers
Is interested
Is attentive
Works hard
Answers the questions
Is in the top group
Listens with interest
Learns with ease
Needs 6-8 repetitions for mastery
Understands ideas

The Gifted Child

Asks the questions
Is highly curious
Is mentally and physically involved
Plays around, yet tests well
Discusses in detail, elaborates
Is beyond the group
Shows strong feelings & opinions
Already knows
Needs 1-2 repetitions for mastery
Constructs abstractions

Student Referral

A student may be referred at any time by a teacher, administrator, counselor, parent, peer, self, or any other person having reason to believe that the student may be intellectually gifted. All referrals should be given to an IG teacher or the Gifted Coordinator. Students who are home-schooled can be referred and screened for intellectual giftedness if the student resides in the Clinton Public School District. Should the student meet eligibility criteria, he/she can only participate in the ACCENT program if registered as a student in CPSD.

Student Identification

There are two types of possible gifted referral processes: mass screening and individual screening. Each year mass screening will be conducted in first through fifth grades for all CPSD students in those grades. Individual referrals will be accepted at any time from a teacher, administrator, counselor, parent, peer, self or any other person having reason to believe that the student may be gifted.

There are two phases to the ACCENT identification process.

In the first phase, a student must meet **three** of the following criteria:

- a group measure of intelligence administered within the past twelve months with a minimum score at or above the 90th percentile,
- a score at or above the superior range on a normed published characteristics of giftedness checklist,
- a score at or above the superior range on a normed published measure of creativity,
- a score at or above the superior range on a normed published measure of leadership,
- a score at or above the 90th percentile on total language, total math, total reading, total science, total social studies, or the composite on a normed achievement test,
- a score at or above the 90th percentile on a normed measure of cognitive ability,
- a score at or above the 90th percentile on an existing measure of individual intelligence that has been administered within the past twelve months, and/or
- other measures that are documented in the research on identification of intellectually gifted students.

Students with special considerations for gifted assessment who scored at or above the 84th percentile but lower than the 90th percentile on the preceding criteria requiring 90th percentile or above shall move forward in the gifted identification process.

Assessment and Eligibility Requirements

If three of the above criteria are met, the student progresses to the second phase. In the second phase, a parent will receive a letter informing him/her of (1) parental rights as stated in the Family Educational Rights and Privacy Act, (2) the minimum required intelligence test score for eligibility, and (3) a description of the gifted program, in addition to a request for permission to administer an individual intelligence test to the child. No individual test will be given without the written consent of a parent. Upon receipt of a parent's signature, an intelligence test will be scheduled.

The district's psychometrist will administer the individual intelligence test. A signed and dated report of the test administration that includes test conditions, scores, strengths and weaknesses will be provided. Private testing conducted by outside examiners will be considered and may count as one of the pre-referral criteria, but the district's testing will be the final determinant regarding the child's eligibility. When the district receives a written report from the psychometrist concerning the child's performance on the test, a letter will be sent to the parents informing the parents of the eligibility determination. If a conference to discuss the results is desired, one will be granted. CPSD requires students to attain the 91st percentile total on individual intelligence test results to qualify for the GEP. If a student does not meet the referral criteria, he/she does not advance to the assessment level (IQ testing) and must wait for another referral or the next testing period to be retested.

In-State and Out-of-State Transfers

Students who are eligible for gifted services in other Mississippi public school districts are eligible for placement in ACCENT if the student enrolls in the Clinton Public School District. Intellectually gifted students from out of state will be eligible for ACCENT once documentation that they have met the 91st percentile on an IQ test is provided. This includes students from military families based on the Military Interstate Children's Compact.

Student Evaluation

Gifted students in grades 2-6 will receive an ACCENT evaluation (Report Card) at the end of each nine-week session. These evaluations will assess student performance in the gifted instructional management plan, goals, and objectives. The student remains in the gifted program as long as progress is being made.

Annual Reassessment/Exit Policy

The Local Survey Committee (LSC) at the building level shall meet at least annually to reassess each gifted student's continuation in the GEP. This annual meeting typically takes place at the end of the school year. Once a student is placed in the gifted program, he/she will most likely continue in the classes. However, students who are unable to maintain satisfactory performance within the structure of the program may be removed.

Exit Policy

If a parent or guardian requests that a student exit the program during the school year, he/she must complete an exit form and submit it to the child's gifted teacher. At the written request of the parent/guardian, the student shall be able to re-enter the GEP at the beginning of the next semester or school year. Parents are encouraged not to use the Exit Procedures as a disciplinary action for behavioral or academic punishment but to seek alternative methods of modifications prior to removing the child from ACCENT. Conferences may be held to discuss modifications.

If the teacher of the gifted requests the exit, the following steps must take place:

Step 1: Teacher-student conference will be held to discuss what the child needs to do for the student to remain in GEP.

Step 2: Teacher-parent conference will be held to discuss the issues the child is facing in GEP.

Step 3: A teacher-parent-administrator conference will be held to discuss the student's need for exiting the gifted program. A parent who is not in agreement with the school-based committee decision to remove the student or who does not agree with any action within the gifted process will present their concerns, in writing, to the principal of the school. The principal and the parent will attempt to resolve the matter informally.

If the parent is not satisfied with the action taken by the principal, the parent shall, within five school days, request a hearing by putting their concerns in writing and presenting the written request for a hearing to the district's coordinator for gifted programming. The parent will be extended an invitation to attend the gifted hearing committee meeting at a time to be agreed upon by the parent and the committee. The committee will consist of the district's coordinator of gifted programs, a district or school level administrator other than the school's current administrator, and a teacher of the gifted program other than the student's current teacher. The gifted hearing committee will render a written decision based on information shared during the hearing meeting. The decision of the hearing committee will be mailed to the parent. The decision of the hearing committee will be considered final. If the student is removed from the program, written documentation will be given to the teacher of the gifted within three school days. The teacher of the gifted will provide the school counselor with a copy of the written documentation within three school days of receipt of the decision. The student shall be removed from the gifted program within five school days of the decision or as indicated on the documentation form.

Step 4: Copies of the Exit form and other documentation should be placed in the student's cumulative folder and in the gifted folder.

Re-entry to the GEP

Re-entry into the gifted program must take place as follows:

Step 1: The parent must submit a written request to the school's LSC.

Step 2: The LSC will meet, study exit documents, and the written request. From that information, the LSC will develop a suggestion to present to the parent. The suggestion may be to not re-enter the program, to re-enter the program under specific provisions, or to re-enter the program without any restrictions or provisions.

Step 3: A meeting with the parent/s, student, and LSC will be held to discuss the LSC's opinion on possible re-entry to ACCENT.

Step 4: If the student does re-enter and does not meet the provisions stated (see Step 2), the child will be exited from the gifted program.

Once in the GEP, the student shall remain as long as he or she is successful.

"Grades/success in the regular education program is the responsibility of the regular classroom teachers and should not be considered as a reason for removal from the gifted program." [Regulations for the Gifted Education Programs in Mississippi, 2013].

Homework/Classwork

Gifted education teachers should not assign work outside of class due to the demands of regular class assignments. All ACCENT assignments should take place within the gifted classroom, with exception of bringing materials for projects to complete in gifted class.

Gifted students shall not be required to make up classwork missed when they are scheduled to be in the gifted classroom. Gifted students shall be held accountable for demonstrating mastery of concepts and information on regularly scheduled tests. It shall be noted that some gifted students will not be high academic achievers for a variety of reasons. It is not reasonable to expect intellectually gifted students by virtue of having been granted eligibility to make all A's and B's.

Discipline Plan

The gifted education teachers will follow the discipline plan established by his/her individual school. Gifted teachers may refer students to the school counselor for social/emotional or behavioral interventions. If serious problems arise that are interfering with the performance and/or productivity of a child within the gifted classroom

or his/her behavior is so obtrusive that it affects the productivity of other students, the steps in the exit procedures may need to be activated.

Program Evaluation

The GEP will afford administrators, teachers, parents, community leaders, and students the opportunity to evaluate the gifted program each year by completing an evaluation form during the spring. The results will be used to modify and improve the gifted program.

The Mississippi State Regulations and Standards for Gifted Education and the Clinton Public School District Gifted Education Program will be monitored annually based on submission of standards documentation. CPSD will modify its documentation to ensure compliance with the state guidelines.

Maintenance and Destruction of Gifted Student Files

The files for all students ruled eligible or ineligible for ACCENT will be maintained in Central Office until five years after students graduate from high school, at which time those files will be destroyed.

Other Options for High Ability Learners

- 7th grade – Pre-Algebra
- 8th grade – Algebra
- 9th grade – Honors English
- High School – Advanced Placement Classes in many subject areas
