In what ways can the school improve communication between parents and the school?

40 responses

N/a

None

More photos of the kids during school on seesaw, some teachers need to communicate more

No improvement is needed in my opinion.

The school is excellent with communication.

I feel the school communicates well .

n/a

I think the elementary school has good communication.

Explaining how to interpret report cards before first is put out to parents for new parents. Do not like how report cards are scored.

Communication is very good already.

Automated messages with more updates

communication is good for me so far the way it is

Send out more info electronically

?

Not sure

Safety concerns

Parent teacher conferences each marking period

I think the school is doing a great job communicating

Provide a daily communication sheet when requested especially when the child has a medical diagnosis. Communication is horrible in this district!

Would love to hear occasionally where they are struggling so we could help more at home. We never know the spelling words so we can't practice or work with them.

N/A

na

I think the elementary school does a great job with parent communication.

I feel as though the school currently does an amazing job communicating with parents. I love how much information comes home through the seesaw app and weekly in emails.

Communication is great- maybe create a calendar for spontaneous announced events ex. Sock day

We have had great communication.

I feel PVE does a really good job of communicating with parents! The Middle School Principals should take notes from PVE, because the Middle School is awful

I liked when you called on the weekends instead of email- also just a regular more occasional check in on how your child is doing instead of just parent teacher conference more to just touch base

No good ideas

Having standards be by marking period vs entire year. Having more updated tests or sign and return tests.

Weekly test scores should be posted

Changing the protocol on safety issues. Parents need to know IMMEDIATELY. There should be no hesitation when it comes to communication about our children.

More check ins. I still do not trust PV after the horrors I went through with my daughter's that lead us to CCA and a better education with better and more open communication. We are trying PV for our 5 year old son but so much has happened that I have no trust or belief in PV or it's interest in the students. I want to see greater open communication, more resources available and a better trust established. My son so far is not having the experience my girl's did but I am not ready to let my guard down just yet.

Old school letters home. The app is not always checked

Communicate effectively when there is a problem. Inform the parent of resources available to their children.

What can we do to help you feel more supported and included in your child's learning?

40 responses

N/a

N/A

More communication between teachers and parents

Nothing

Nothing, I already feel supported and included in my child's learning.

More one on one homework/classwork rather than computers. My child is explaining the computer programs to me, otherwise I wouldn't know how to navigate or use them to help her.

Keep me included and up-to-date as you been.

n/a

I don't feel there is anything lacking.

More teachers allowing parents to volunteer in the classroom.

You already do!

Already satisfied

maybe a little more about how to encourage correct answers

Continue to provide information

More day to day updates

A sheet that has the day's homework on it. Like "Monday iredy and reading"

Feel satisfied

Post some work on seasaw

Parent teacher conferences each marking period

Continue to do what you are doing.

Following IEP's licensing to parents more when it comes to their children and they know their kids and to implement evaluation reports appropriately and accommodate students with medical diagnosis better because this district is horrible and allows children to fall through the cracks!

More paper communication would be awesome.

NA

I would like to understand the curriculum being taught. I feel like I was never informed since he started school.

More information regarding their current reading levels and what we can do specifically for them at home.

Nothing it's great

Nothing as of right now

Keep reaching out to the parents about safety protocols, new things going on at the school. Keep being transparent with us parents like you are. I feel if a district wants the parents to "trust and have faith" in them, a School District needs to start with honesty. Because at the end of the day, WE PARENTS, are putting our trust in PV to help our children learn, get the most of out school, and be SAFE. So if our District in a "whole" wants our trust, I feel the district would learn a lot by how PVE is ran!! The other 3 schools should meet up with PVE and get on the track that PVE is on.

More opportunities to volunteer in the classroom

They're doing a great job so far

None

More frequent info about homework requirements

Provide a better understanding of progress in key subject areas (i.e. reading, math) on a regular basis with communication of quiz and test scores. Numerical grading (4,3,2,1) is somewhat obscure and unclear to parents

Communication is key.

I want to know everything that is going on. I don't want to find out there's a problem when I receive a report card and it's too late to fix what's in the past. If my child misbehaves, I want to know. If another child hurts mine, I want to know. If my child is struggling academically I want

to know and I want to know what resources are available to me to help at home and what the school will also do on their end. I want to know that the school will work with me as a team.

Not sure

Provide information regarding resources available to students who are struggling

List any ideas you have for parent and family engagement events.

14 responses

None

No ideas at this moment.

More after school activities that include parents.

N/A

Satisfied already

Make some of these meetings in the evening

No chromebooks

Daily communication sheets, better notifications and letters

We really enjoy the summer activities that you have.

Moms and muffins type thing or dads and donuts type thing / family fun day/ family movie nights in the park/ dad and daughter dance or family dance

Any kind of contest is fun!

Family dances sound nice.

Pto can be available via zoom for those who work but want to be involved
