

Martin Villamil

First Year at St. Mark's: 2nd Grade

"Math most prepares you for life after middle school because it's the language of the universe."

Lina Volpi

First Year at St. Mark's: 7th Grade

"My advice to next year's 8th graders is that you will not regret the things you do, but rather what you don't. Always take advantage of the opportunities given to you, and don't be afraid to have a good time."

Cade Waligura

First Year at St. Mark's: 7th Grade

"Science most prepares you for life after middle school because it allows you to know more about the world around you and it is the application of math, reading, and writing."

We aren't only focused on each child from the neck up and slightly to one side, we are focusing on the whole child. We lead a culture of growth where our students learn about themselves and develop the self-disciplines needed to be those adults tomorrow, to accept responsibility for what is theirs, to improve situations where they can have influence.

The lessons here are everywhere, embedded throughout our culture, and they are intentional. Yes, high school admissions officers tell us this is how they see our students, and so do tour guides, plane passengers, restaurant guests. Anytime we take you out in public, we get compliments about these things—about being good humans. That is why you are ready for the path.
