

QUICK PAYCHECK CALCULATION:

Frequently Asked Question- What days are paid on each check?

Skyward pay is NOT date driven. Employee Support Personnel are paid based on their hourly rate multiplied by number of work days in the school year (for their position) to create their "contract" amount. We then divide that yearly "contract" amount evenly by 24 paychecks and create a pay period amount. This is also why employees receive 2 full paychecks in December for only working part of the month. In addition, if you end employment before the contract end date, the final check will be recalculated to pay out your contract balance.
