

# SUCCESS MAP, SCALES AND EVIDENCES

# for the MARZANO FOCUSED TEACHER EVALUATION MODEL

## **Marzano Focused Teacher Evaluation Model**

Standards-Based Classroom with Rigor

### STANDARDS-BASED PLANNING

- Planning Standards-Based Lessons/Units
- Aligning Resources to Standard(s)
- Planning to Close the Achievement Gap Using Data

### **CONDITIONS FOR LEARNING**

- Using Formative Assessment to Track Progress
- Providing Feedback and Celebrating Progress
- Organizing Students to Interact with Content
- Establishing and Acknowledging Adherence to Rules and Procedures
- Using Engagement Strategies
- Establishing and Maintaining Effective Relationships in a Student-Centered Classroom
- Communicating High Expectations for Each Student to Close the Achievement Gap

### STANDARDS-BASED INSTRUCTION

- Identifying Critical Content from the Standards
- Previewing New Content
- Helping Students Process New Content
- Using Questions to Help Students Elaborate on Content
- Reviewing Content
- Helping Students Practice Skills, Strategies, and Processes
- Helping Students Examine Similarities and Differences
- Helping Students Examine Their Reasoning
- Helping Students Revise Knowledge
- Helping Students Engage in Cognitively Complex Tasks

### PROFESSIONAL RESPONSIBILITIES

- Adhering to School and District Policies and Procedures
- Maintaining Expertise in Content and Pedagogy
- Promoting Teacher Leadership and Collaboration

### **Marzano Focused Teacher Evaluation Model**

### **Planning Standards-Based Lessons/Units**

Focus Statement: Using established content standards, the teacher plans rigorous units with learning targets embedded

within a performance scale that demonstrates a progression of learning.
Desired Effect: Teacher provides evidence of implementing lessons/units plans aligned to grade level standard(s) using
learning targets embedded in a performance scale.
Planning Evidence
☐ Plans exhibit a focus on the essential standards
□ Plans include a scale that builds a progression of knowledge from simple to complex
□ Plans identify learning targets aligned to the rigor of required standards
☐ Plans identify specific instructional strategies appropriate for the learning target
☐ Plans illustrate how learning will scaffold from an understanding of foundational content to application of information in
authentic ways
☐ Lessons are planned with teachable chunks of content
☐ When appropriate, lessons/units are integrated with other content areas
When appropriate, learning targets and unit plans include district scope and sequence
☐ Plans illustrate how equity is addressed in the classroom
☐ When appropriate, plans illustrate how Individualized Education Plans (IEPs)/personal learning plans are addressed in the
classroom
☐ When appropriate, plans illustrate how EL strategies are addressed in the classroom
☐ When appropriate, plans integrate cultural competencies and/or standards  Example Implementation Evidence
Example implementation Evidence
☐ Lesson plans align to grade level standard(s) with targets and use a performance scale
☐ Planned and completed student assignments/work demonstrate that lessons are aligned to grade level standards/targets
at the appropriate taxonomy level
☐ Planned and completed student assignments/work require practice with complex text and its academic language
Planned and completed student assignments/work demonstrate development of applicable mathematical practices
Planned and completed student assignments/work demonstrate grounding in real-world application
☐ Planned and completed student assignments/work demonstrate how equity has been addressed in the lesson/unit
☐ Planned and completed student assignments/work demonstrate how Individualized Education Plans (IEPs)/personal
learning plans have been addressed in the lesson/unit
☐ Planned and completed student assignments/work demonstrate how EL strategies have been addressed in the
lesson/unit
☐ Planned and completed student assignments/work indicate opportunities for students to insert content specific to their
cultures
☐ Artifacts demonstrate the teacher helps others by sharing evidence of planning and implementing lesson/unit plans

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Makes no attempt to plan rigorous units with learning targets embedded within a performance scale that demonstrates a progression of learning.	Using established content standards, attempts to plan rigorous units with learning targets embedded within a performance scale that demonstrates a progression of learning.	Using established content standards, plans rigorous units with learning targets embedded within a performance scale that demonstrates a progression of learning.	Using established content standards, plans rigorous units with learning targets embedded within a performance scale that demonstrates a progression of learning and provides evidence of implementing lessons/units plans aligned to grade level standard(s) using learning targets embedded in a performance scale.	Helps others by sharing evidence of implementing lessons/units plans aligned to grade level standard(s) using learning targets embedded in a performance scale and the impacts on student learning.

aligned to grade level standards (e.g. PLC notes, emails, blogs, sample units, discussion group)

### Aligning Resources to Standard(s)

Focus Statement: Teacher plan includes traditional and/or digital resources for use in standards-based units and lessons.

**Desired Effect:** Teacher implements traditional and/or digital resources to support teaching standards-based units and lessons.

### **Planning Evidence**

Plans identify how to use traditional resources s	such as text b	oooks,	manipulatives,	primary	source	materials,	etc.	at the
appropriate level of text complexity to implemen	t the unit or	lesson	plan					

- ☐ Plans integrate a variety of text types (structures)
- □ Plans incorporate nonfiction text
- ☐ Plans identify Standards for Mathematical Practice to be applied
- □ Plans identify how available technology will be used
  - · Interactive whiteboards
  - Response systems
  - · Voting technologies
  - · One-to-one computers
  - · Social networking sites
  - Blogs
  - Wikis
  - · Discussion boards
- ☐ When appropriate, plans identify resources within the community that will be used to enhance students' understanding of the content (i.e. cultural and ethnic resources)
- ☐ When appropriate, plans identify how to use human resources, such as a co-teacher, paraprofessional, one-on-one tutor, mentor, etc. to implement the unit or lesson plan

### **Example Implementation Evidence**

- ☐ Traditional resources are appropriately aligned to grade level standards
  - · Text books
  - Manipulatives
  - Primary source materials
- ☐ Digital resources are appropriately aligned to grade level standards
  - · Interactive whiteboards
  - Response systems
  - Voting technologies
  - One-to-one computers
  - Social networking sites
  - Blogs
  - Wikis
  - Discussion boards
- ☐ Planned student assignments/work incorporate the use of traditional and/or digital resources, and facilitate learning of the standards
- □ Planned student assignments/work incorporate the use of a variety of text types (including structures and nonfiction) and resources at the appropriate level of text complexity
- ☐ Planned student assignments/work require reasoning and explaining, modeling and using tools, seeing structure and generalizing of mathematics
- □ Planned resources include those specific to students' culture
- ☐ Artifacts demonstrate the teacher helps others by sharing evidence of planning and implementing supporting resources aligned to grade level standards (e.g. PLC notes, emails, blogs, sample units, discussion group)

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Teacher plan does not include traditional and/or digital resources for use in standards-based units and lessons.	Teacher plan includes traditional and/or digital resources for use in standards-based units and lessons that do not support the lesson.	Teacher plan includes traditional and/or digital resources for use in standards-based units and lessons.	Teacher plan includes traditional and/or digital resources for use in standards-based units and lessons and provides evidence of implementing traditional and/or digital resources to support teaching standards-based units and lessons.	Helps others by sharing evidence of including and implementing traditional and/or digital resources to support teaching standards-based units and lessons.

### Planning to Close the Achievement Gap Using Data Focus Statement: Teacher uses data to identify and plan to meet the needs of each student in order to close the achievement gap. Desired Effect: Teacher provides data showing that each student (including English learners [EL], exceptional education students, gifted and talented, socio-economic status, ethnicity) makes progress towards closing the achievement gap. **Planning Evidence** ☐ Plans include a process for helping students track their individual progress on learning targets ☐ Plans specify accommodations and/or adaptations for individual EL or groups of students ☐ Plans specify accommodations and/or adaptations for individual or groups of students receiving special education according to the Individualized Education Plan (IEP) ☐ Plans specify accommodations and/or adaptations for students who appear to have little support for schooling ☐ Plans cite the data and rationale used to identify and incorporate accommodations ☐ Plans include potential instructional adjustments that could be made based on student evidence/data ☐ Plans take into consideration equity issues (i.e. family resources for assisting with homework and/or providing other resources required for class) ☐ Plans take into consideration how to communicate with families with diverse needs (i.e. English is a second language, cultural considerations, deaf and hearing impaired, visually impaired, etc.) ☐ Productive changes are made to lesson plans in response to formative assessment (monitoring) ☐ A coherent record-keeping system is developed and maintained on student learning

### **Example Implementation Evidence**

	Planned student assignments/work reflect accommodations and/or adaptations used for individual students or sub-groups
	(e.g. EL, gifted, etc.) at the appropriate grade level targets
	Planned student assignments/work reflect accommodations and/or adaptations for individual or groups of students
	receiving special education according to the Individualized Education Plan (IEP) at the appropriate grade level targets
	Planned student assignments/work reflect accommodations and/or adaptations for students who appear to have little
	support for schooling
	Planned student assignments/work show students track their individual progress on learning targets
	Formative and summative measures indicate individual and class progress towards learning targets and modifications
	made as needed
_	Information about atudent progress is regularly cent home

☐ Information about student progress is regularly sent home	
---	--

☐ Artifacts demonstrate the teacher helps others by sharing evidence of how to use data to plan and implement lessons/units that result in closing the achievement gap (e.g. PLC notes, emails, blogs, sample units, discussion group)

Using Questions to Help Students Elaborate on Content
Focus Statement: Teacher uses a sequence of increasingly complex questions that require students to critically think about
the content.
Desired Effect: Evidence (formative data) demonstrates students accurately elaborate on content.
Example Teacher Instructional Techniques (Check any technique used in the lesson)
□ Use a sequence of increasingly complex questions as it relates to the content (text) with appropriate wait time □ Ask detail questions □ Ask category questions □ Ask elaboration questions (i.e. inferences, predictions, projections, definitions, generalizations, etc.) □ Ask students to provide evidence (i.e. prior knowledge, textual evidence, etc.) for their elaborations □ Present situations or problems that involve students analyzing how one idea relates to ideas that were not explicitly taught □ Model the process of using evidence to support elaboration □ Model processes and proficiencies to support mathematical elaboration □ Model implementation of appropriate wait time when questioning
Example Teacher Techniques for Monitoring for Learning (Check any category used in the lesson)
□ Use a Group Activity to monitor that students accurately elaborate on content □ Use Student Work (Recording and Representing) to monitor that students accurately elaborate on content □ Use Response Methods to monitor that students accurately elaborate on content □ Use Questioning Sequences to monitor that students accurately elaborate on content
Example Student Evidence of Desired Effect (Percent of students who demonstrate achievement of the desired effect that
students accurately elaborate on content. Student evidence is obtained as the teacher uses a monitoring technique.)
☐ Answer detail questions about the content
☐ Identify characteristics of content-related categories ☐ Make general elaborations about the content
□ Provide evidence and support for elaborations
☐ Identify basic relationships between ideas and how one idea relates to another
☐ Artifacts/student work demonstrate students can make well-supported elaborative inferences
☐ Discussions demonstrate students can make well-supported elaborative inferences
□ Discussions are grounded in evidence from text, both literary and informational
□ Discussions and student work provide evidence of mathematical elaboration  Example Adaptations a teacher can make after monitoring student evidence and determining how many students
demonstrate the desired learning
□ Rephrase questions/scaffold questions
☐ Modify task
☐ Provide additional resources

		taxonomy level of the critical	evidence at the taxonomy level	
		content.	of the critical content.	

Reviewing Content
Focus Statement: Teacher engages students in brief review of content that highlights the cumulative nature of the content.
Desired Effect: Evidence (formative data) demonstrates students know the previously taught critical content.
Example Teacher Instructional Techniques (Check any technique used in the lesson)
<ul> <li>□ Begin lesson with a brief review of previously taught content</li> <li>□ Use a scaffolding process to systematically show the cumulative nature of the content</li> <li>□ Use specific strategies to help students identify basic relationships between ideas and consciously analyze how one idea relates to another</li> <li>• Brief summary</li> </ul>
Problem that must be solved using previous information
<ul> <li>Questions that require a review of content</li> <li>Demonstration</li> </ul>
Brief practice test or exercise
Warm-up activity
☐ Ask students to demonstrate increased fluency and/or accuracy of previously taught processes
Example Teacher Techniques for Monitoring for Learning (Check any category used in the lesson)
□ Use a Group Activity to monitor that students know the previously taught critical content □ Use Student Work (Recording and Representing) to monitor that students know the previously taught critical content □ Use Response Methods to monitor that students know the previously taught critical content □ Use Questioning Sequences to monitor that students know the previously taught critical content  Example Student Evidence of Desired Effect (Percent of students who demonstrate achievement of the desired effect that students know the previously taught critical content. Student evidence is obtained as the teacher uses a monitoring technique.)
<ul> <li>□ Identify basic relationships between current and prior ideas and consciously analyze how one idea relates to another</li> <li>□ Summarize the cumulative nature of the content</li> <li>□ Response to class activities demonstrates students recall previous content (e.g. artifacts, pretests, warm-up activities)</li> <li>□ Explain previously taught concepts</li> <li>□ Demonstrate increased fluency and/or accuracy of previously taught processes</li> </ul>
Example Adaptations a teacher can make after monitoring student evidence and determining how many students
demonstrate the desired learning
<ul> <li>□ Reteach or use a new teacher technique</li> <li>□ Reorganize groups</li> <li>□ Utilize peer resources</li> <li>□ Modify task</li> <li>□ Provide additional resources</li> </ul>

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Engages students in a brief review of content that highlights the cumulative nature of the content, but less than the majority of students are displaying the desired effect in student evidence at the taxonomy level of the critical content.	Engages students in a brief review of content that highlights the cumulative nature of the content.  The desired effect is displayed in the majority of student evidence at the taxonomy level of the critical content.	Based on student evidence, implements adaptations to achieve the desired effect in more than 90% of the student evidence at the taxonomy level of the critical content.

Helping Students Practice Skills, Strategies, and Pro-	cesses
Focus Statement: When the content involves a skill, strategy, or pro-	
that help them develop fluency and alternative ways of executing production	cedures.
Desired Effect: Evidence (formative data) demonstrates students de	velop automaticity with skills, strategies, or processes.
<b>Example Teacher Instructional Techniques</b> (Check any technique	used in the lesson)
- Madel have to execute the civil stretons, or process	
<ul> <li>☐ Model how to execute the skill, strategy, or process</li> <li>☐ Model mathematical practices</li> </ul>	
☐ Model how to reason, problem solve, use tools, and generalize	
☐ Engage students in massed and distributed practice activities that	at are appropriate to their current ability to execute a skill,
strategy, or process	
<ul> <li>Guided practice if students cannot perform the skill, strategy</li> </ul>	
<ul> <li>Independent practice if students can perform the skill, strate</li> </ul>

### **Helping Students Examine Similarities and Differences** Focus Statement: When presenting content, the teacher helps students deepen their knowledge of the critical content by examining similarities and differences. Desired Effect: Evidence (formative data) demonstrates student knowledge of critical content is deepened by examining similarities and differences. Example Teacher Instructional Techniques (Check any technique used in the lesson) ☐ Use comparison activities to examine similarities and differences ☐ Use classifying activities to examine similarities and differences ☐ Use analogy activities to examine similarities and differences ☐ Use metaphor activities to examine similarities and differences ☐ Use culturally relevant activities to help students examine similarities and differences ☐ Use activities to identify basic relationships between ideas that deepen knowledge to examine similarities and differences ☐ Use activities to generate and manipulate mental images that deepen knowledge to examine similarities and differences ☐ Ask students to summarize what they have learned from the activity Ask students to linguistically and nonlinguistically represent similarities and differences ☐ Ask students to explain how the activity has added to their understanding ☐ Ask students to make conclusions after the examination of similarities and differences ☐ Ask students to look for and make use of mathematical structure to recognize similarities and differences ☐ Facilitate the use of digital and traditional resources to find credible and relevant information to support examination of similarities and differences Example Teacher Techniques for Monitoring for Learning (Check any category used in the lesson) ☐ Use a Group Activity to monitor that student knowledge of content is deepened by examining similarities and differences ☐ Use Student Work (Recording and Representing) to monitor that student knowledge of content is deepened by examining similarities and differences ☐ Use Response Methods to monitor that student knowledge of content is deepened by examining similarities and differences ☐ Use Questioning Sequences to monitor that student knowledge of content is deepened by examining similarities and **Example Student Evidence of Desired Effect** (Percent of students who demonstrate achievement of the desired effect that student knowledge of content is deepened by examining similarities and differences. Student evidence is obtained as the teacher uses a monitoring technique.) ☐ Comparison and classification artifacts indicate deeper understanding of content ☐ Analogy and/or metaphor artifacts indicate deeper understanding of content ☐ Response to questions indicate examining similarities and differences has deepened understanding of content ☐ Make conclusions after examining evidence about similarities and differences ☐ Present evidence to support their explanation of similarities and differences ☐ Artifacts/student work examining similarities and differences involve culturally relevant content, when appropriate ☐ Artifacts/student work indicate students have used digital and traditional resources to support examination of similarities and differences Example Adaptations a teacher can make after monitoring student evidence and determining how many students demonstrate the desired learning ☐ Reteach or use a new teacher technique ☐ Modify task □ Reorganize groups Provide additional resources ☐ Utilize peer resources

Hel	ping Students Examine Their Reasoning					
Foc	us Statement: Teacher helps students produce and defend a claim (assertion of truth or factual statement) by examining their					
own	own reasoning or the logic of presented information, processes, and procedures.					
Des	ired Effect: Evidence (formative data) demonstrates students identify and articulate errors in logic or reasoning and/or provide					
	r support for a claim (assertion of truth or factual statement).					
Exa	mple Teacher Instructional Techniques (Check any technique used in the lesson)					
	Model the process of making and supporting a claim					
	Model constructing viable arguments and critiquing the mathematical reasoning of others					
	Ask students to examine logic of their errors in procedural knowledge when problem solving					
	Ask students to provide evidence (i.e. textual evidence) to support their claim and examine the evidence for errors in logic or					
_	reasoning Use specific strategies (e.g. faulty logic, attacks, weak reference, misinformation) to help students examine and analyze					
Ш	information for errors in content or their own reasoning					
	Guide students to understand how their culture impacts their thinking					
	Ask students to summarize new insights resulting from analysis of multiple texts/resources					
	Ask students to examine and analyze the strength of support presented for a claim in content or in their own reasoning					
Ш						
	Statement of a clear claim					
	Evidence for the claim presented					
_	Qualifiers presented showing exceptions to the claim					
	Analyze errors to identify more efficient ways to execute processes or procedures					
	Facilitate use of resources at the appropriate level of text complexity to find credible and relevant information to support analysis					
_	of logic or reasoning					
	Involve students in taking various perspectives by identifying the reasoning behind multiple perspectives					
	Ask students to examine logic of a response (e.g. group talk, peer revisions, debates, inferences, etc.)					
	mple Teacher Techniques for Monitoring for Learning (Check any category used in the lesson)					
	Use a Group Activity to monitor that students identify and articulate errors in logic or reasoning and/or provide clear support for

Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Helps students produce and defend a claim (assertion of truth or factual statement) by examining their own reasoning or the logic of presented information, processes, and procedures, but less than the majority of students are displaying the desired effect in student evidence at the taxonomy level of the critical content.	Helps students produce and defend a claim (assertion of truth or factual statement) by examining their own reasoning or the logic of presented information, processes, and procedures.  The desired effect is displayed in the majority of student evidence at the taxonomy level of the critical content.	Based on student evidence, implements adaptations to achieve the desired effect in more than 90% of the student evidence at the taxonomy level of the critical content.

Helping Students Revise Knowledge	
Focus Statement: Teacher helps students revise previous knowled	dge by correcting errors and misconceptions as well as
adding new information.	
Desired Effect: Evidence (formative data) demonstrates students r	nake additions, deletions, clarifications, or revisions to
previous knowledge that deepen their understanding.	
Example Teacher Instructional Techniques (Check any technique	e used in the lesson)
<ul> <li>Ask students to state or record how hard they tried</li> <li>Ask students to state or record what they might have done to e</li> </ul>	nhance their learning
☐ Utilize reflection activities to cultivate a growth mindset	milance their learning
☐ Engage groups or the entire class in an examination of how de	eper understanding changed perceptions of previous
content	oper and ordered by contract of promotion
Prompt students to summarize and defend how their understar	
☐ Guide students to identify alternative ways to execute procedure	
☐ Guide students to use repeated reasoning and make generalize	
<ul> <li>Prompt students to update previous entries in their notes or dig examining their reasoning or examining similarities and differer</li> </ul>	
☐ Guide students in a reflection process	1003
Example Teacher Techniques for Monitoring for Learning (Che	ck any category used in the lesson)
☐ Use a Group Activity to monitor that students deepen underst	
☐ Use Student Work (Recording and Representing) to monitor the leaders.	nat students deepen understanding by revising their
knowledge  Use Response Methods to monitor that students deepen under	erstanding by revising their knowledge
☐ Use Questioning Sequences to monitor that students deepen	
Example Student Evidence of Desired Effect (Percent of student	
students deepen understanding by revising their knowledge. Studer	nt evidence is obtained as the teacher uses a monitoring
technique.)	
☐ Explain what they are clear about and what they are confused	ahaut
Explain what they could have done to enhance their learning	about
☐ Actions and reflections display a growth mindset	
☐ Corrections are made to written work (e.g. reports, essay, note	s, position papers, graphic organizers)
☐ Groups make corrections and/or additions to information previous	ously recorded about content
Explain previous errors or misconceptions about content	
Revisions demonstrate alternative ways to execute procedures	
<ul> <li>□ Revisions demonstrate repeated reasoning and generalizations</li> <li>□ Reflections show clarification in thinking or processing</li> </ul>	s about patterns seen in the content
Example Adaptations a teacher can make after monitoring stud	lent evidence and determining how many students
demonstrate the desired learning	<b>,</b>
_ , ,	
Reteach or use a new teacher technique	☐ Modify task
☐ Utilize peer resources	□ Provide additional resources

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Engages students in revision of previous knowledge by correcting errors and misconceptions as well as adding new information, but less than the majority of students are displaying the desired effect in student evidence at the taxonomy level of the critical content.	Engages students in revision of previous knowledge by correcting errors and misconceptions as well as adding new information.  The desired effect is displayed in the majority of student evidence at the taxonomy level of the critical content.	Based on student evidence, implements adaptations to achieve the desired effect in more than 90% of the student evidence at the taxonomy level of the critical content.

### **Helping Students Engage in Cognitively Complex Tasks**

☐ Utilize different coaching/facilitation techniques

□ Reorganize groups

☐ Utilize peer resources

Focus Statement: Teacher coaches and supports students in complex tasks that require experimenting with the use of their

knowledge by generating and testing a proposition, a theory, and/or a hypothesis.					
<b>Desired Effect:</b> Evidence (formative data) demonstrates students prove or disprove the proposition, theory, or hypothesis.					
Example Teacher Instructional Techniques (Check any technique used in the lesson)					
☐ Based on the prior content and learning, model, coach, and support the process of generating and testing					
A proposition					
A proposed theory					
A hypothesis					
☐ Provide prompt(s) for students to experiment with their own thinking					
☐ Observe, coach, and support productive student struggle					
Ask students to design how they will examine and analyze the strength of support for testing their proposition, theory, or					
hypothesis					
Coach students to persevere with the complex task					
☐ Engage students with an explicit decision-making, problem-solving, experimental inquiry, or investigation task that					
requires them to  • Generate conclusions					
Identify common logical errors					
Present and support propositions, theories, or hypotheses					
Navigate digital and traditional resources					
Example Teacher Techniques for Monitoring for Learning (Check any category used in the lesson)					
☐ Use a Group Activity to monitor that students prove or disprove the proposition, theory or hypothesis					
☐ <b>Use Student Work</b> (Recording and Representing) to monitor that students prove or disprove the proposition, theory, or					
hypothesis					
☐ <b>Use Questioning Sequences</b> to monitor that students prove or disprove the proposition, theory, or hypothesis					
Example Student Evidence of Desired Effect (Percent of students who demonstrate achievement of the desired effect that					
students prove or disprove the proposition, theory, or hypothesis. Student evidence is obtained as the teacher uses a					
monitoring technique.)					
☐ Explain the proposition, theory, or hypothesis they are testing					
☐ Present evidence to explain whether their proposition, theory, or hypothesis was confirmed or disconfirmed and support					
their explanation					
☐ Justify the process used to support the proposition, theory, or hypothesis					
☐ Precisely explain perseverance with the task with reasoning and conclusions					
☐ Artifacts/student work indicate that while engaged in generating and testing a proposition, proposed theory, or hypothesis,					
students can					
Generate conclusions					
Identify common logical errors  Property and appropriate the appropriate					
Present and support the proposition, theory, or hypothesis					
Navigate digital and traditional resources					
Identify how multiple ideas are related					
Example Adaptations a teacher can make after monitoring student evidence and determining how many students demonstrate the desired learning					

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Coaches and supports students in complex tasks that require experimenting with the use of their knowledge by generating and testing a proposition, a theory and/or a hypothesis, but less than the majority of students are displaying the desired effect in student evidence at the taxonomy level of the critical content.	Coaches and supports students in complex tasks that require experimenting with the use of their knowledge by generating and testing a proposition, a theory, and/or a hypothesis.  The desired effect is displayed in the majority of student evidence at the taxonomy level of the critical content.	Based on student evidence, implements adaptations to achieve the desired effect in more than 90% of the student evidence at the taxonomy level of the critical content.

☐ Modify task

☐ Provide additional resources

### **Using Formative Assessment to Track Progress**

**Focus Statement:** Teacher uses formative assessment to facilitate tracking of student progress on one or more learning targets.

targets.
Desired Effect: Evidence (formative data) demonstrates students identify their current level of performance as it relates to
standards-based learning targets embedded in the performance scale.
Example Teacher Instructional Techniques (Check any technique used in the lesson)
☐ Help students track their individual progress toward the learning target (i.e. charts, graphs, data notebooks, etc.)
☐ Ask students to explain their progress toward the learning target
☐ Ask students to provide evidence of their progress toward the learning target
☐ Facilitate individual conferences regarding use of data to track progress
☐ Use formative measures to chart individual and/or class progress towards learning targets using a performance scale
Use formative assessment that reflects awareness of cultural differences represented in the classroom
<b>Example Student Evidence of Desired Effect</b> (Percent of students that demonstrate achievement of the desired effect that
students identify their current level of performance. Student evidence is obtained during group activities and/or student work.)
☐ Systematically update their status on the learning targets using a chart, graph, or data notebook
□ Describe their status relative to learning targets using the scale (e.g. exit ticket, summary, etc.)
☐ Individual conferences document that students provide artifacts and data regarding their progress toward learning targets
□ Demonstrate autonomy in providing evidence of progress on learning targets
☐ Responses to formative assessment may involve cultural content
Example Adaptations a teacher can make after monitoring student evidence and determining how many students
demonstrate the desired effect
☐ Utilize peer resources
☐ Modify task
☐ Provide additional resources

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Uses formative assessment to facilitate tracking of student progress on one or more learning targets, but less than the majority of students are displaying the desired effect.	Uses formative assessment to facilitate tracking of student progress on one or more learning targets.  The desired effect is displayed in the majority of students.	Based on student evidence, implements adaptations to achieve the desired effect by more than 90% of the students.

### **Providing Feedback and Celebrating Progress** Focus Statement: Teacher provides feedback to students regarding their formative and summative progress as it relates to learning targets and/or unit goals. Desired Effect: Evidence (formative data) demonstrates students continue learning and making progress towards learning targets as a result of receiving feedback. Example Teacher Instructional Techniques (Check any technique used in the lesson) ☐ Provide specific feedback to students regarding formative and/or summative data as it relates to learning targets ☐ Celebrate individual student progress when formative/summative data indicate gains in achieving learning targets ☐ Celebrate as groups make progress toward learning targets ☐ Implement a systematic, ongoing process to provide feedback ☐ Use a variety of ways to celebrate progress toward learning targets (not general praise) · Show of hands · Certificate of success · Parent notification Round of applause · Academic praise · Digital media ☐ Ensure celebrations involve culturally relevant components ☐ Ask students to explain how they use feedback ☐ Ask students how celebrations encourage them to continue learning Example Student Evidence of Desired Effect (Percent of students that demonstrate achievement of the desired effect that students continue learning and make progress towards learning targets. Student evidence is obtained during group activities and/or student work.) ☐ Show signs of pride regarding their accomplishments in the class (e.g. body language, work production, quality of work, ☐ Show signs of pride regarding development of mathematical practices ☐ Initiate celebration of individual success, group success, and that of the whole class ☐ Use feedback to revise or update work to help meet their learning target ☐ Surveys indicate students want to continue making progress ☐ Actions and responses indicate the teacher is equitable in providing feedback and/or celebrating progress Example Adaptations a teacher can make after monitoring student evidence and determining how many students

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Strategy was called for but not exhibited.	Uses strategy incorrectly or with parts missing.	Provides feedback to students regarding their formative and summative progress as it relates to learning targets and/or unit goals, but less than the majority of students are displaying the desired effect.	Provides feedback to students regarding their formative and summative progress as it relates to learning targets and/or unit goals.  The desired effect is displayed in the majority of students.	Based on student evidence, implements adaptations to achieve the desired effect by more than 90% of the students.

demonstrate the desired effect

☐ Utilize new methods to celebrate success☐ Provide additional opportunities to give feedback

Desired Effect: Evidence (formative data) demonstrates students process content (i.e. new, going deeper, cognitively complex) as a result of group organization.	Organizing Students to Interact with Content					
Example Teacher Instructional Techniques (Check any technique used in the lesson)    Establish routines for student grouping and interaction for the expressed purpose of processing content   Provide guidance regarding group interactions and critiquing the reasoning of others   Provide guidance on one or more cognitive skills appropriate for the lesson   Utilize assignments or tasks at the appropriate taxonomy level of content   Provide guidance on one or more conative skills   Escoming aware of the power of interpretations   Recoming aware of the power of interpretations   Avoiding negative thinking   Taking various perspectives   Interacting responsibly   Handling controversy and conflict resolution   Organize students into ad hoc groups during individual lessons (i.e. use techniques to ensure equity)   Use various group processes and activities to reflect the taxonomy level of the learning targets   Example Student Evidence of Desired Effect (Percent of students that demonstrate achievement of the desired effect that students process content as a result of group organization. Student evidence is obtained during group activities and/or student work.)    Work within groups with an organized purpose   Exhibit awareness of the power of interpretations   Avoid negative thinking   Take various perspectives   Interact responsibly and respectfully critique the reasoning of others   Appear to know how to handle controversy and conflict resolution   Actively ask and answer questions about the content (i.e. assignments or tasks)   Add their perspectives to discussions   Generate clarifying questions about the content   Explain individual student and/or group thinking about the content   Explain individual student and/or group thinking about the content   Explain individual student and/or group thinking about the content   Explain individual student and/or group thinking about the content   Explain individual student and/or group thinking about the content   Example Adaptations a teacher can make after monitoring student	Focus Statement: Teacher organizes students into appropriate gre	oups to facilitate the learning of content.

Establishing and Acknowledging Adherence to Rules and Procedures					
Focus Statement: Teacher establishes classroom rules and procedures that facilitate students working cooperatively and					
acknowledge students who adhere to rules and procedures.					
Desired Effect: Evidence (formative data) demonstrates students know and follow classroom rules and procedures (to					
facilitate learning) as a result of teacher acknowledgment.					
Example Teacher Instructional Techniques (Check any technique used in the lesson)					
☐ Involve students in designing classroom routines and procedures to develop a culturally responsive classroom					
☐ Actively teach student self-regulation strategies					
<ul> <li>☐ Use classroom meetings to review and process rules and procedures to ensure equity</li> <li>☐ Remind students of rules and procedures</li> </ul>					
☐ Ask students to restate or explain rules and procedures					
☐ Provide cues or signals when a rule or procedure should be used					
☐ Physically occupy all quadrants of the room					
☐ Scan the entire room, making eye contact with each student					
☐ Recognize potential sources of disruption and deal with them immediately					
□ Proactively address inflammatory situations					
☐ Consistently exhibit "withitness" behaviors					
☐ Recognize and/or acknowledge students or groups who follow rules and procedures					
☐ Organize physical layout of the classroom to facilitate work in groups and easy access to materials					
Example Student Evidence of Desired Effect (Percent of students that demonstrate achievement of the desired effect that					
students know and follow classroom rules and procedures. Student evidence is obtained during group activities and/or student					
work.)					
Follow clear routines during class					
☐ Explain classroom rules and procedures					
☐ Describe the classroom as an orderly and safe environment					
<ul> <li>☐ Recognize cues and signals by the teacher</li> <li>☐ Self-regulate behavior while working individually</li> </ul>					
☐ Self-regulate behavior while working individually					
☐ Recognize that the teacher is aware of their behavior					
☐ Interact responsibly with teacher and other students					
☐ Explain how the individuality of each student is honored in the classroom					
☐ Describe the teacher as fair and responsive to individual students					
□ Describe the teacher as "aware of what is going on" or "has eyes on the back of his/her head"					
☐ Respond appropriately to teacher direction and/or guidance regarding rules and procedures					
☐ Move purposefully about the classroom and efficiently access materials					
Example Adaptations a teacher can make after monitoring student evidence and determining how many students					
demonstrate the desired effect					
☐ Modify rules and procedures					
☐ Seek additional student input					
□ Reorganize physical layout of the classroom

Uses engagement strategies to engage or reengage students with the content.  The desired effect is displayed in the majority of students.	Based on student evidence, implements adaptations to achieve the desired effect in more than 90% of the students.

### Establishing and Maintaining Effective Relationships in a Student-Centered Classroom Focus Statement: Teacher behaviors foster a sense of classroom community by acknowledgement and respect for the diversity of each student. Desired Effect: Evidence (student action) shows students feel valued and part of the classroom community. Example Teacher Instructional Techniques (Check any technique used in the lesson) ☐ Encourage students to share their thinking and perspectives Seek student input regarding classroom activities and culture ☐ Relate content-specific knowledge to personal aspects of students' lives ☐ Discuss with students about topics in which they are interested ☐ Discuss equity and individual needs of students ☐ Use student input and feedback to maintain an academic focus on rigor ☐ Build student interests into lessons (i.e. incorporate cultural connections) ☐ Use students' personal interests to highlight or reinforce conative skills (e.g. cultivating a growth mindset) ☐ Compliment students regarding academic and personal accomplishments ☐ Engage in conversations with students about events in their lives outside of school ☐ When appropriate, use humor and/or playful dialogue with students ☐ Use nonverbal signals (e.g. smile, nod, "high five", pat on shoulder, thumbs up, fist bump, silent applause, eye contact, ☐ Remain calm in response to inflammatory situations □ Interact with each student in the same calm and controlled fashion ☐ Remain objective and in control by not demonstrating personal offense at student misconduct ☐ Celebrate students' individual diversity, uniqueness, and cultural traditions Example Student Evidence of Desired Effect (Percent of students that demonstrate achievement of the desired effect that their actions show they feel valued and part of the classroom community. Student evidence is obtained during group activities and/or student work.) Change behavior when the teacher demonstrates understanding of their interests and diverse backgrounds Demonstrate verbal and nonverbal behaviors that indicate they feel accepted by their teacher ☐ Respond positively to verbal interactions with the teacher ☐ Respond positively to nonverbal interactions with the teacher ☐ Readily share their perspectives and thinking with the teacher Describe their teacher as respectful and responsive to the diverse needs of each student ☐ Actions show students trust the teacher to advocate for them ☐ Contribute to a positive classroom community through interactions with peers Example Adaptations a teacher can make after monitoring student evidence and determining how many students demonstrate the desired effect ☐ Seek additional input from students □ Seek additional resources for self and students □ Utilize peer resources

### Communicating High Expectations for Each Student to Close the Achievement Gap Focus Statement: Teacher exhibits behaviors that demonstrate high expectations for each student to achieve academic success. Desired Effect: Evidence (student surveys, interviews, work) shows the teacher expects each student to perform at their highest level of academic success. Example Teacher Instructional Techniques (Check any technique used in the lesson) ☐ Use methods to ensure each student is held responsible for participation in classroom activities ☐ Chart questioning patterns to ensure each student is asked questions with the same frequency ☐ Track grouping patterns to ensure each student has the opportunity to work and interact with other students ☐ Does not allow negative or sarcastic comments about any student ☐ Identify students for whom expectations are different and the various ways in which these students have been treated differently Provide students with strategies to avoid negative thinking about one's thoughts and actions ☐ Ask questions of each student at the same rate and frequency Ask complex questions of each student that require conclusions at the same rate and frequency ☐ Rephrase questions for each student when they provide an incorrect answer ☐ Probe each student to provide evidence of their conclusions ☐ Ask each student to examine the sources of their evidence ☐ Allow students who become frustrated during questioning to collect their thoughts and have an opportunity to answer at a later point in the lesson ☐ Probe each student to further explain their answers when they are incorrect ☐ Require perseverance and productive struggle in solving problems and overcoming obstacles Example Student Evidence of Desired Effect (Percent of students that demonstrate achievement of the desired effect that their teacher expects each student to perform at their highest level of academic success. Student evidence is obtained during group activities and/or student work.) ☐ Treat each other with respect Actions show students avoid negative thinking about personal thoughts and actions Respond to difficult questions ☐ Take risks by offering incorrect or alternative answers ☐ Participate in classroom activities and discussions ☐ Artifacts/student work show the teacher won't "let you off the hook" or "won't give up on you" ☐ Artifacts/student work show the teacher holds each student to the same level of expectancy as others for drawing conclusions and providing sources of evidence ☐ Model teacher behaviors that show care and respect for each classmate ☐ Demonstrates perseverance and productive struggle in solving problems and overcoming obstacles Example Adaptations a teacher can make after monitoring student evidence and determining how many students demonstrate the desired effect ☐ Modify questioning techniques and patterns □ Reorganize seating patterns and groups ☐ Reflect on student interactions and change teacher behaviors

		effect.	in the majority of students.	

# Adhering to School/District Policies and Procedures Focus Statement: Teacher adheres to school and district policies and procedures. Desired Effect: Teacher adheres to school and district rules and procedures. Example Teacher Evidence Performs assigned duties Fulfills responsibilities in a timely manner Follows policies, regulations, and procedures (e.g. bullying, HR plans, sexual harassment, etc.) Maintains accurate records (e.g. student progress, attendance, parent conferences, etc.) Understands legal issues related to colleagues, students, and families (e.g. cultural, special needs, equal rights, etc.) Maintains confidentiality of colleagues, students, and families Advocates for equality for each student Demonstrates personal integrity and ethics Uses social media appropriately

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
Makes no attempt to adhere to school and district policies and procedures.	Inconsistently adheres to school and district policies and procedures.	Adheres to school and district policies and procedures.	Adheres to school and district policies and procedures and articulates how they adhere to school and district policies and procedures.	Helps others by sharing evidence of how to support school and district policies and procedures.

### Maintaining Expertise in Content and Pedagogy Focus Statement: Teacher continually deepens knowledge in content (subject area) and classroom instructional strategies (pedagogy). Desired Effect: Teacher provides evidence of developing expertise in content area and classroom instructional strategies. **Example Teacher Evidence** ☐ Participates in professional development opportunities □ Demonstrates content expertise and knowledge in the classroom ☐ Seeks mentorship from subject area experts ☐ Seeks mentorship from highly effective teachers ☐ Actively seeks help and input from appropriate school personnel to address issues that impact instruction ☐ Demonstrates a growth mindset and/or seeks feedback ☐ Implements a deliberate practice or professional growth plan ☐ Seeks innovative ways to improve student achievement ☐ Gathers and keeps evidence of the effects of specific classroom strategies and behaviors on specific categories of students (i.e., different socio-economic groups, different ethnic groups) ☐ Uses a reflection process for analysis of specific strengths and weaknesses of individual lessons and units ☐ Uses a reflection process for analysis of specific instructional strengths and weaknesses ☐ Explains the differential effects of specific classroom strategies on closing the achievement gap ☐ Seeks opportunities to develop deeper understanding of cultural responsiveness ☐ Uses formative and summative data to make instructional planning decisions ☐ Teacher observational data is correlated to student achievement data ☐ Identifies specific areas of strengths and weaknesses within instructional strategies or conditions for learning

	Innovating (4)
deepen knowledge in content area and classroom instructional strategies.  knowledge in content (subject area) and classroom instructional strategies.  knowledge in content (subject area) and classroom instructional strategies and provides evidence area.	Helps others by sharing evidence of how to develop expertise in content area and classroom instructional strategies.

☐ Keeps track of identified focus areas for improvement within instructional strategies or conditions for learning

### **Promoting Teacher Leadership and Collaboration** Focus Statement: Teacher promotes teacher leadership and a culture of collaboration. Desired Effect: Teacher provides evidence of teacher leadership and promoting a school-wide culture of professional **Example Teacher Evidence** ☐ Contributes and shares expertise and new ideas with colleagues to enhance student learning in formal and informal ways ☐ Serves as an appropriate role model (i.e. mentor, coach, presenter, researcher) regarding specific classroom strategies and behaviors □ Documents specific situations of mentoring other teachers ☐ Works cooperatively with appropriate school personnel to address issues that impact student learning ☐ Accesses available expertise and resources to support students' learning needs ☐ Promotes positive conversations and interactions with teachers and colleagues ☐ Fosters collaborative partnerships with parents to enhance student success in a manner that demonstrates integrity, confidentiality, respect, flexibility, fairness, and trust ☐ Encourages parent involvement in classroom and school activities Demonstrates awareness and sensitivity to social, cultural, and diverse needs of families ☐ Uses multiple means and modalities to communicate with families ☐ Seeks a role and participates in Professional Learning Community meetings ☐ Serves as a student advocate in the classroom, school, and community Participates in school and community activities as appropriate to support students and families ☐ Serves on school and district-level committees ☐ Works to achieve school and district improvement goals

Not Using (0)	Beginning (1)	Developing (2)	Applying (3)	Innovating (4)
