

## **District Weekly Update**

**September 23, 2024**

### **1. Weekly Update**

The weekly update is designed to inform the public about some school-related activities through our district website.

### **2. LPES Flooring**

I just want to remind the Board that the floor installers are working from 3:30-11 PM so there is virtually no contact between the workers and the students and staff.

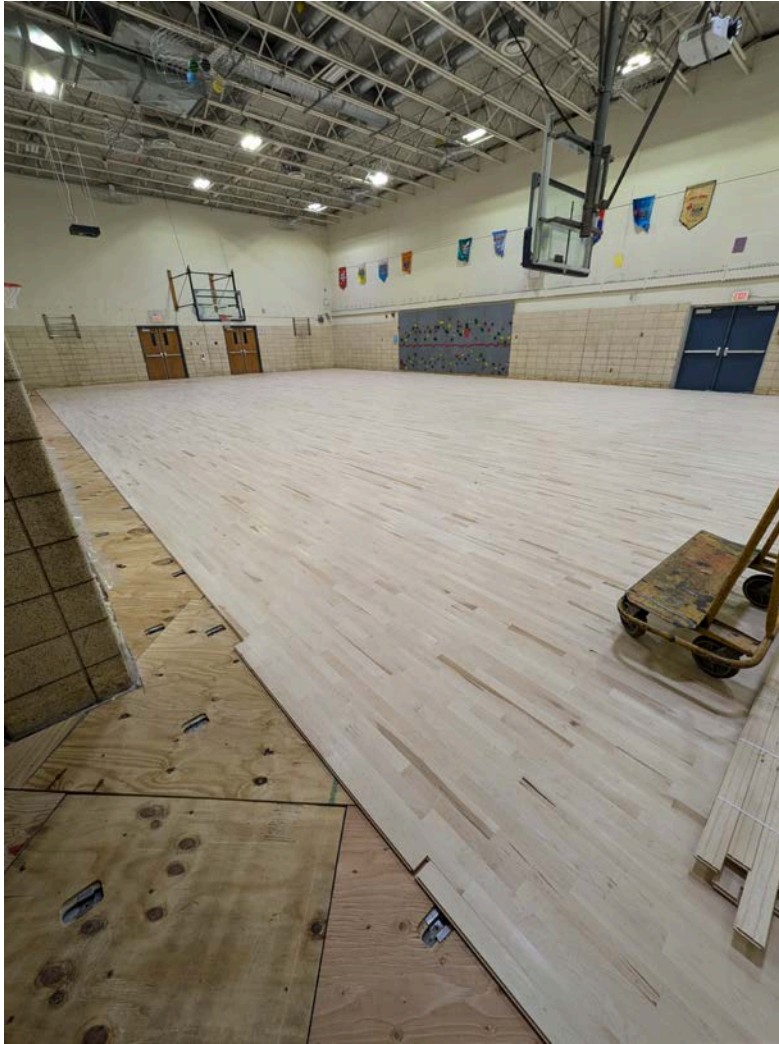

Progress on the floor installation is going well. I'm sharing three pictures for your information.

- The first shows the plastic water barrier and the special plywood which goes directly over the plastic.
- The second shows the flip side of the plywood, which has a cushioned strip.
- The others are of the maple floor installation.

### 3. Back To School Night

I had an opportunity to visit both Back to School night activities. Both were well attended, well organized and highly successful. Melissa had to run her parent meeting in the cafeteria because the gym is not finished. Both Melissa and David should be commended for a job well done.

### 4. Construction

The construction project at LPES has begun. Below please find pictures of some preliminary work for the foundation for the addition. The anticipated completion date is late Summer, 2025.

### 5. QSAC Scores

We received the scores for last year's QSAC review, which were recognized on the September 17 Board of Education agenda. I'm pleased to announce that the District is "high performing" based on this State monitoring process. Special note of thanks to all those who contributed to the QSAC process for the District.

- Instruction and Program 80%
- Fiscal Management 88%
- Operations 95%
- Personnel 91%
- Governance 93%
