

THINK TWICE BEFORE SAYING YES TO DRUGS.

Whether you're at a party, pulling an all-nighter, or just hanging with friends, it's important to know how to say **NO** to drugs. The pressure can come from anywhere, but the choice is always **yours**. Knowing when to stand your ground and make the right decision can keep you safe and in control of your future. Protect yourself, and don't let anyone push you into doing something you're not comfortable with. Remember: **Think Twice** before saying Yes to Drugs.

The effects of drugs can be long lasting. Here are things to consider before saying yes:

One Pill CAN Kill: Teen drug experimentation is no longer safe. Fake pills are killing teens as young as 13. Educate yourself about fake pills.

Fentanyl is deadly, even in small doses. Chances are that you could get a lethal dose if the pill you take is contaminated with fentanyl.

Fentanyl is in our community. In Lake County, there have been nearly **100 fentanyl overdoses** since 2020.
