

# MAGNET PROGRAMS AT HUNTERDON CENTRAL

HCRHS offers students unique, focused learning experiences in four Magnet Programs: Architectural Design, Biomedical Science, Computer Science, and Robotics.

## BENEFITS OF JOINING A MAGNET PROGRAM:

### Specialized Courses with Advanced Credit Opportunities

Each program is structured as a cohesive series of 3 to 4 courses, creating a “Pathway of Experience”. In addition, there are opportunities to earn college credit and/or industry-valued credential.

### All Levels of Experience Welcome

Each magnet program offers varying “on-ramp” pathways, making participation in a program accessible to all students, regardless of their level of prior experience or readiness.

### Powerful Capstone Learning Experience

A hallmark of the magnets is the capstone learning experience at the conclusion. Students will showcase their knowledge through work-based learning experience, research project, or inquiry investigation.

### Right In Your Own School

These magnet programs are housed right in Hunterdon Central - no need to go to another school to join! Stay with your friends all while gaining experience in a future career path or academic pursuit!
