

MS Varsity Tutors Program

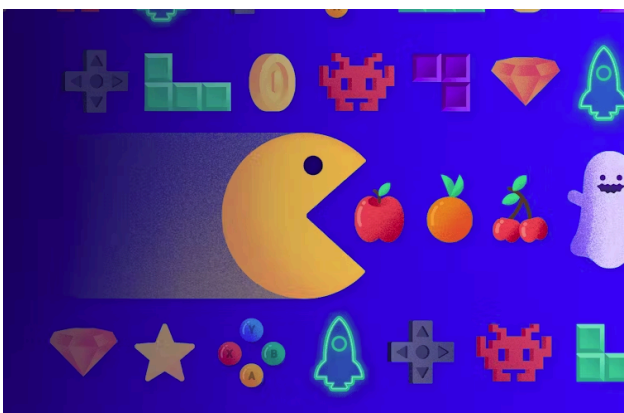

Descriptions

StarCourses

What's better than learning from a celebrity? Enroll in Varsity Tutors StarCourses to learn from the stars. Discover how your favorite games were designed and coded like Pong, Pac-Man, Frogger, and Fortnite. Learn about river ecosystems from two famous otters (that's right, otters!) Uncover the mysteries of the ancient Egyptian pyramids from a well-known archaeologist. And so many more! Visit the Varsity Tutors platform to see them all.

Codeverse

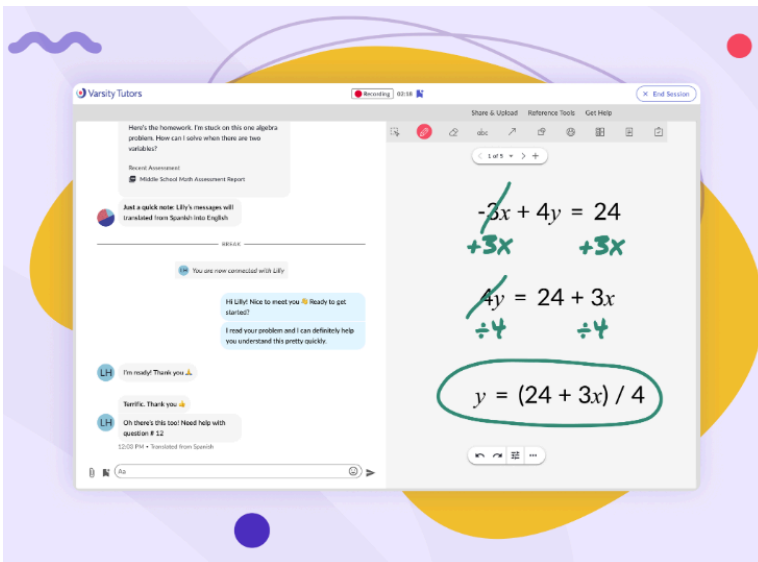

Do you want to create the next big app or video game? Do you have an idea for something really cool or useful? Learn how to code to bring your ideas to life! On the Varsity Tutors platform, you can learn coding languages like Python, Java, JavaScript, C++, and HTML. You can also learn how your favorite games were designed and coded like Pong, Pac-Man, Frogger, and Fortnite. And in Varsity Tutors Codeverse, you'll design, create, and play your own games!

Summer Scholars

Did you know that most students like you experience summer learning loss, which means you'll lose some of the skills you learned as you enter the next grade? Enroll in Varsity Tutors classes over the summer to avoid this "summer slide!" From classes that help you bridge the gap in skills like math and reading, to fun celebrity-led StarCourses, to interactive sessions with live tutors, there's plenty to explore to keep engaged in learning over the summer break!

24/7 Chat with a Live Tutor

Sometimes when you're learning a new skill, it's helpful to have someone to talk to about the questions you have or to see things in a new way. With the Varsity Tutors platform, you can reach out to an expert in the subject or skill you're learning! Whether it's homework or a new hobby, you can request a chat with a tutor 24/7.
