

GCSE PE Year 10 (Year 1 of course)

INTENT

Physical Education will equip learners with the knowledge, understanding, skills and values to develop and maintain their performance in physical activities and understand the benefits to health, fitness and well-being. This will require them to: develop theoretical knowledge and understanding of the factors that underpin physical activity and sport and use this knowledge to improve performance • understand how the physiological and psychological state affects performance in physical activity and sport • perform effectively in different physical activities by developing skills and techniques and selecting and using tactics, strategies and/ or compositional ideas • develop their ability to analyse and evaluate to improve performance in physical activity and sport • understand the contribution which physical activity and sport make to health, fitness and well-being • understand key socio-cultural influences which can affect people's involvement in physical activity and sport.

	Term 1	Term 2	Term 3	Term 4	Term 5	Term 6	
Year 10	<p>L1 – The functions of the skeleton</p> <p>L2 – Classification of bones</p> <p>L3 – Structure of the skeleton</p> <p>L4 – Classification of joints</p> <p>L5 – Movement possibilities at joints</p> <p>L6 – The role of ligaments and tendons</p> <p>L7 – End of topic test</p> <p>L8 – DIRT</p> <p>L9 – Classification and characteristics of muscle</p> <p>L10 – Location and role of voluntary muscular system</p> <p>L12 – Characteristics of fast/slow twitch muscle fibre</p> <p>L14 – End of Topic Test</p> <p>L15 – DIRT</p>	<p>L16 – Functions of the cardiovascular system</p> <p>L17 – Structure of the cardiovascular system</p> <p>L18 – Structure of arteries, capillaries and veins</p> <p>L19 – redistribution of blood flow</p> <p>L20 – Function of blood cells, platelets and plasma</p> <p>L21 – End of topic test</p> <p>L22 – DIRT</p> <p>L23 – Composition of inhaled and exhaled air</p> <p>L24 – Lung Volumes</p> <p>L25 – Location of main components of respiratory</p> <p>L26 – Structure of alveoli</p> <p>L27 – How the cardio and resp systems work</p> <p>L28 – End of Topic test</p> <p>L29 – DIRT</p>	<p>L30 – Energy:</p> <p>L31 – Energy sources</p> <p>L32 – Short-term effects of physical activity L1</p> <p>L33 – Short-term effects of physical activity L2</p> <p>L34 – Short-term effects of physical activity L3</p> <p>L35 – Long-term effects of exercise</p> <p>L36 – Interpretation of graphical representations</p> <p>L37 – End of Topic test</p> <p>L38 – DIRT</p> <p>L39 – First-, second- and third-class levers</p> <p>L40 – Mechanical advantage and disadvantage</p> <p>L41 – Movement patterns using body planes and</p>	<p>L42 – Movement in the sagittal plane</p> <p>L43 – Movement in the frontal plane</p> <p>L44 – Movement in the transverse plane</p> <p>L45 – End of topic test</p> <p>L46 – DIRT</p> <p>L47 – Definitions of fitness, health, exercise</p> <p>L48 – Components of fitness</p> <p>L49 – Fitness tests</p> <p>L50 – Fitness Tests</p> <p>L51 – Planning training using the principles of</p> <p>L52 – training methods</p> <p>L53 – training methods</p> <p>L54 – Long-term effects</p> <p>L55 – Long-term effects</p>	<p>L56 – The use of a PARQ</p> <p>L57 – Injury prevention</p> <p>L58 – Injuries</p> <p>L59 – RICE</p> <p>L60 – Performance-enhancing drugs</p> <p>L61 – Warm-ups and cool down</p> <p>L62 – End of topic test</p> <p>L63 – DIRT</p>		
End Points	<p>Students will be able to apply knowledge of the following content areas and apply this knowledge to examples from physical activity:</p> <ul style="list-style-type: none"> Location of the major bones in the body. Examples to the functions of the skeleton Major joints and the articulating bones in the knee, elbow, shoulder and hip. Types of movements at hinge joints and ball and socket joints and be able to use practical examples to show and analyse different movements. Name and location of the main muscles groups in the human body and be able to apply them to examples from physical activity/sport. Definitions and roles of the agonist, antagonist, fixator and antagonistic muscle action. Three classes of lever and you will be able to apply examples from physical activity/sport. 	<p>Students will be able to apply knowledge of the following content areas and apply this knowledge to examples from physical activity:</p> <ul style="list-style-type: none"> Planes of movement Axes of rotation The double circulatory system The different types of blood vessels The pathway of blood through the heart. Definitions of heart rate, stroke volume and cardiac output as well as the role of the red blood cells. Structure and pathway of the respiratory system 	<p>Students will be able to apply knowledge of the following areas and apply this knowledge to examples from physical activity</p> <ul style="list-style-type: none"> The role of respiratory muscles in breathing Definitions of breathing rate, tidal volume and minute ventilation. Structure and role of alveoli The role and purpose of gaseous exchange. Definitions of aerobic and anaerobic exercise Application of exercise in relation to intensity and duration. Short-term effects on the cardiovascular, muscular and respiratory systems Collect and use data relating to short-term effects. Long-term effects of exercise on bones, muscles and the cardiovascular and respiratory system <p>Collect and use data relating to long-term effects of exercise.</p>	<p>Students will be able to apply knowledge of the following areas and apply this knowledge to examples from physical activity:</p> <ul style="list-style-type: none"> Definitions Suitable tests Practical example for the following: Cardiovascular endurance Muscular endurance Speed Strength Power Flexibility Agility Balance Coordination Reaction time Collect and use data relating to the components of fitness 	<p>Students will be able to apply knowledge of the following areas and apply this knowledge to examples from physical activity</p> <ul style="list-style-type: none"> 	<p>Students will be able to apply knowledge of the following areas and apply this knowledge to examples from physical activity</p> <ul style="list-style-type: none"> 	
Progress & assessment	<p>Assessment will consist of:</p> <ul style="list-style-type: none"> AO1 style low stakes testing at the start of every lesson. AO1, AO2 and AO3 assessed in tasks/silent study through self/peer assessment. AO1, AO2 and AO3 assessed in end of topic tests at the end of each unit. <p>Progress tracked using OCR grade boundaries for 9-1, grades inputted into class marksheet tracked against target grade.</p>	<p>Assessment will consist of:</p> <ul style="list-style-type: none"> AO1 style low stakes testing at the start of every lesson. AO1, AO2 and AO3 assessed in tasks/silent study through self/peer assessment. AO1, AO2 and AO3 assessed in end of topic tests at the end of each unit. <p>Progress tracked using OCR grade boundaries for 9-1, grades inputted into class marksheet tracked against target grade.</p>	<p>Assessment will consist of:</p> <ul style="list-style-type: none"> AO1 style low stakes testing at the start of every lesson. AO1, AO2 and AO3 assessed in tasks/silent study through self/peer assessment. AO1, AO2 and AO3 assessed in tasks/silent study through self/peer assessment. AO1, AO2 and AO3 assessed in end of topic tests at the end of each unit. PRACTICAL – application of core and advanced skills across 3 sports (main focus on sport 3) <p>Progress tracked using OCR grade boundaries for 9-1, grades inputted into class marksheet tracked against target grade.</p>	<p>Assessment will consist of:</p> <ul style="list-style-type: none"> AO1 style low stakes testing at the start of every lesson AO1, AO2 and AO3 assessed in end of topic tests at the end of each unit <p>Progress tracked using NCFE grade boundaries for L1PMD + L2PMD, grades inputted into class PLC.</p>	

GCSE PE Year 10 (Year 1 of course)

Key	Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding	Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding	Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding				Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding		Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding	Each topic has key terms and vocabulary that students will need to show knowledge of to access the appropriate band for AO1 – knowledge and understanding Practical students will need to know which are core and advanced skills
Connected	<p>Links to practical Core PE – (Year 7-11) The role of the heart delivering blood and oxygen around the body – emphasised in warm-ups. Types of muscle – muscles referred to in practical PE and their role in health and fitness activities. Muscle fibre Types – referred to in Athletics – short and long distance events. Linked to Home learning tasks completed in Years 7,8 and 9 that fit in line with GCSE practical specification. Links to other topics – Coursework, analysing and evaluating performance. A Level PE – Structure and function of joints, movement and muscles. Functional roles of muscles and types of contraction. Biomechanics - levers BTEC Sport Level 3 - Structure and function of the respiratory system, structure and functions of the muscular system; types, contractions and fibre types</p>	<p>Links to practical Core PE – (Year 7-11) The role of the heart delivering blood and oxygen around the body – emphasised in warm-ups. Types of muscle – muscles referred to in practical PE and their role in health and fitness activities. Muscle fibre Types – referred to in Athletics – short and long distance events. Linked to Home learning tasks completed in Years 7,8 and 9 that fit in line with GCSE practical specification. Links to other topics Coursework, analysing and evaluating performance. A Level PE – Biomechanics – levels and mechanical advantage. Movement analysis. Cardiovascular system at rest and during different intensities and recovery. BTEC Sport Level 3 - Structure and function of the respiratory system, structure and functions of the muscular system; types, contractions and fibre types</p>	<p>Links to practical Core PE – (Year 7-11) The role of the heart delivering blood and oxygen around the body – emphasised in warm-ups. Debating tasks, peer assessment tasks and group work give students the opportunity to improve emotional intelligence, empathising with other, respecting others opinions and learn to listen and empathise to other points of views and opinions.		Debating tasks, peer assessment tasks and group work give students the opportunity to improve emotional intelligence, empathising with other, respecting others opinions and learn to listen and empathise to other points of views and opinions.	Debating tasks, peer assessment tasks and group work give students the opportunity to improve emotional intelligence, empathising with other, respecting others opinions and learn to listen and empathise to other points of views and opinions.
	<p>IMPACT: Students will learn the content that is assessed in 2 ways, through an internal and external assessment. Once all content has been covered students will undertake an internal assessment in the form of coursework. At the end of Year 11 pupils will be assessed by a moderator for the practical element, as well as completing 2 papers for external assessment. Students progress will be tracked through frequent assessment points for both the internal and external assessment, progress will be tracked using the OCR grade boundaries (9-1).</p>
