PROJECT DESCRIPTION:

MARINA WEST ELEMENTARY SCHOOL

NEW MODULAR CLASSROOM BUILDINGS

Marina West Elementary School Modular Classroom Buildings Scope Summary

The Marina West Elementary School Modular Classroom Project includes Transitional Kindergarten (TK) and Kindergarten (K) classrooms that fulfill the District Board approved 21st Century Classroom requirements. To expand on the requirements, this includes:

- Minimum of Seventy Five (75) square feet per child of outdoor activity area based on the total licensed capacity and located in an area that is easily and safely accessible by the children, including a shaded rest area with equipment and activities arranged so as not to interfere with each other.
- A four-foot fence is required to enclose the outdoor activity area.
- A minimum of Thirty Five (35) square feet per child of indoor activity space driven by licensed capacity.
- One (1) individual storage space per child + One (1) toilet and one hand washing sink for every fifteen (15) children.
- A separate toilet and sink for use by teachers, staff, ill children, and/or emergency use.
- Child accessible drinking fountains for both indoor and outdoor activity areas.

The above preschool classroom specifications comply with State Title 5, State Title 22, and 21st Century classroom requirements for the TK and K classrooms, expanding their potential use for either preschool, TK or K program use as enrollment may fluctuate from year to year. TK and K classrooms must meet Title 5 requirements of not less than 1,350 square feet, including restrooms accessible from the classroom, storage and teacher preparation spaces, wet and dry areas, and designed supervision of the classroom and play yards. The play yard is designed to provide a variety of activities for the development of large motor skills. Classrooms will provide child learning environments that support the requirements for learning and mastering the Common Core State Standards (CCSS) and Next Generation Science Standards (NGSS).

These specifications meet building code compliance & have been approved by:

- The Office of Public School Construction (OPSC);
- The State Allocation Board (SAB) for State grants;
- The California Department of Education (CDE) for compliance with state requirements;
- The Division of the State Architect (DSA).

Additionally, the project complies with the post-July 1st 2023 new construction photovoltaic and back-up battery requirements.

Prominent scope items include, but are not limited to:

1. New construction of five (5) 72'-0" X 40'-0" modular buildings (pc# 02-121248) with total of:
 - A. Two (2) Preschool (PS) Buildings - Buildings #10 And #11;

Project Budget and Schedule

The total construction budget for the project is \$10,900,000.00. The anticipated project timeline is subject to adjustment based on the timing and processing of administrative approvals, prevailing market conditions, weather and environmental conditions, and unforeseen site conditions. The timeline for the project is as follows:

- **Start Construction:** December 2024
- **End Construction:** November 2025

Phasing of Projects

Work will need to be completed in one concurrent phase and the school will remain operational during the academic year with students and staff in place.

Proposed Site Location

Proposed Site Location

Figures 2 and 3 provide two optional proposed locations for the new classrooms. As planned, the ten new classrooms are proposed to expand and complete existing PS/TK/K facilities at Marina West Elementary, pursuant to the State and proposed 21st century specifications for these facilities. The classrooms are proposed to be located on the southwest corner at the location of the existing early childhood education facilities creating an early childhood education "hub" on campus.

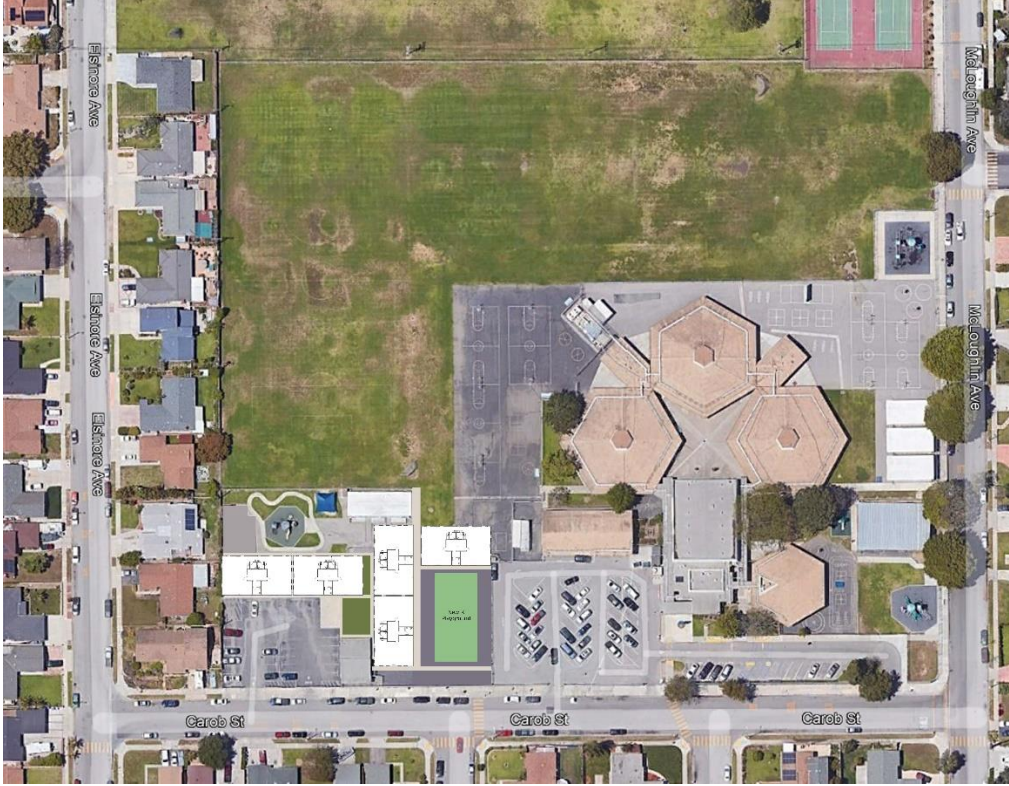

Under both options, the removal of eight existing portables and the existing early childhood education building would be required to make way for the new buildings. The preschool classrooms are proposed be housed in a row of four classrooms above the existing parking lot off Carob Street allowing the use of the existing playground for preschool use. The remaining six classrooms for TK and K are proposed to oriented in a "L" formation surrounding a separate new playground area. The options provide two different placements of two classrooms either in front of (closer to Carob Street) or behind (placed adjacent to the existing field away from Carob Street) the proposed new TK/K playground area creating separate integration options for the school site.

The classrooms will be of modular construction and inclusive of specification of K facilities which allows for their intended use and adaptability in the future, if needed, for preschool, TK, or K facilities. Upon completion, this will bring the total number of State Title 5 compliant classrooms for PS/TK/K at the site to twelve also meeting the additional Title 22 preschool licensing standards.

Method of Delivery

This project shall be delivered in a Lease-leaseback (LLB) matter: The contractor will be expected to collaborate early on with the architect of record to provide constructability reviews of proposed designs, cost estimates, construction schedules, and a site logistics strategy, resulting in a design that meets District specifications, functions, budget and timeline.
