September 2024

**Welcome Back to
Mission Valley School!**

We are truly looking forward to working with all of our students and their families this year! We have an amazing program here at Mission Valley that offers students the unique opportunity to have school curriculum that is designed to meet each student's individual academic needs in a comprehensive and meaningful way. We are excited to share that we will have weekly hands-on enrichment classes (art, music, science, and math) for your child offered on Tuesdays at 10am beginning on September 3rd! We would like to encourage your child to participate in these classes to help enhance their learning experience and earn extra credit! In addition to the weekly classes, we are planning on having some wonderful educational workshops at our school throughout the year as well as some fantastic fieldtrips too!

School Happenings

**Multicultural Music Class
2nd Tuesdays
10am – 11am, Rm 15**

Ms. Crane will be offering a monthly music class where students will be introduced to rhythm patterns, singing techniques, different melodies, musical instruments, and group singing. They will learn songs from around the world in a variety of languages as part of our multi-cultural and fine arts education. Students will also learn hand-motions and movements that go along with the songs as a way of integrating the music in a meaningful way which helps them to remember the words. All students are welcome!

Tutoring at Mission Valley!
Tutoring in all subjects is available for students by their teacher on Thursdays at 10:00am in your child's classroom! Please sign-up with your teacher ahead of time. MV now has its own Resource Teacher, Brett Selvy, offering Special Education services on campus for students! If your child qualifies, they can receive their services here at Mission Valley.

Science Labs

The teachers at MVS are excited to offer science labs to all of our students! These labs are a great opportunity for students to have a hands-on learning experience that connects with the science curriculum to help explore grade-level concepts in a concrete way!
