CS CONNECTIONS WITH CODE.ORG - ELA

In this CS and ELA integrated lesson for new coders, students will learn to code a digital book cover. First, they will look at existing book covers and discuss what graphic design choices were made. Next, students will look at an digital book cover example before creating several of their own. Students will learn to select sprites to represent the characters in a book and to use events to make the characters speak. Teachers need not have programming experience to facilitate this lesson.
