Planning Units

- Are the building blocks of a school attendance boundary
- Currently 419 planning units across the county
- PU319 and PU157 (Pratt Park) were subdivided to create more flexibility
- Are bounded by major roads, subdivisions, natural or man-made geographic features

Factors to Consider (per Policy 1403)

Any or all of these factors *may be* relevant in a redistricting process:

- Proximity of schools to student residences,
- Forecasted school enrollment and capacity,
- Walking distances,
- Busing times and costs,
- Walking and busing safety,
- Natural and man-made geographic features,
- Impact on neighborhoods, School feeder patterns,
- Contiguous school attendance areas,
- Capital Improvement Plan,
- Enrollment Accommodation Plan,
- Socioeconomic characteristics of school populations,
- Distribution of programs and resources,
- Overall impact on families and students,
- Comparative long-term costs,
- Parental input
- Frequency of previous changes for affected neighborhoods.

What We've Heard (Common threads)

- Keep students at their closest schools
- Consider road safety, traffic and student drivers
- Look at feeder pattern alignment
- Consider planning unit splits
- Consider North Stafford HS - space limitations (i.e. hallways narrower)
- Less buses on roads / shorter bus rides
- Consider grandfathering options for non-seniors
- Use natural geographic barriers (i.e., major roads)
- Limit future boundary changes
- Be prepared to open another high school or small vocational high school by 2032
- Make each school a true community where all students can succeed
