Mill Valley, California 94941

Subject: Phase I Environmental Site Assessment
Renaissance Academy at Mathson
2050 Kammerer Avenue and 600 Sinclair Drive
San Jose, California 95116
Partner Project No. 23-414421.1

Dear Mr. Dorfman:

Partner Engineering and Science, Inc. (Partner) is pleased to provide this Phase I Environmental Site Assessment (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-21 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process and Client Agreement.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate your trust in Partner and the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (702) 365-5414 or CTaylor@partneresi.com.

Sincerely,

Cody Taylor
National Client Manager

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Practice E1527-21, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Education Housing Partners, Inc., for the property located at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, Santa Clara County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Education Housing Partners, Inc., with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the southeastern side of Kammerer Avenue, the northeastern side of Sinclair Drive, and the northwestern side of Lavonne Avenue within a residential and commercial area of San Jose, California. Please refer to the table below for a further description of the subject property:

Subject Property Data	
Addresses:	2050 Kammerer Avenue and 600 Sinclair Drive, San Jose, California
Additional Current Addresses:	2100 Kammerer Avenue and 660 Sinclair Drive
Property Use:	Educational and child care
Land Acreage (Ac):	19.561 Ac
Number of Buildings:	Nine
Number of Floors:	One
Gross Building Area (SF):	60,044 SF (school); unknown (former youth center)
Date of Construction:	Circa 1960 (school); Circa 1998 (former youth center)
Parcel Number:	481-31-005
Type of Construction:	Wood framing; concrete slab-on-grade foundations
Current Tenants:	Renaissance Academy at Mathson (RAM)
Site Assessment Performed By:	Erin Basel of Partner
Site Assessment Conducted On:	July 26, 2023
Regulatory Radius Report Date:	July 20, 2023
Lien Search Date:	N/A
Report Date:	August 01, 2023
FOIAs Date:	July 2023

The subject property is currently occupied by Renaissance Academy at Mathson (RAM) for educational use. On-site operations consist of educational and childcare services, administrative office activities, and routine facility maintenance. In addition to the current structures, the subject property is improved with asphalt-paved parking areas, concrete-paved walkways and flatwork, playgrounds with blacktop, a field with a running track, and associated landscaping and drainage features. The Mexican American Community Services Agency (MACSA) facility on the southeastern side of the subject property was closed and enclosed within a chain-link fence during Partner's site reconnaissance.

According to available historical sources, the subject property was formerly unimproved land as early as 1889 until circa 1899; was developed with a rural residence, farm structure, and agricultural land from at least 1931 until circa 1956; and was developed with the current structures circa 1960 and 1998. Tenants on the subject property have included Alum Rock School District (1961-1966), Mathson Middle/Community School (1971-2022), MACSA Youth Center (2000-2022), and Renaissance Academy at Mathson (present).

The adjoining properties are tabulated below:

Adjoining Properties	
Northeast:	Thompson Creek and an access road, beyond which are single-family residences and Rocketship Elementary School (2249 Dobern Avenue)
East:	Interstate 680/Sinclair Freeway at the Thompson Creek Crossing, beyond which is Minys Preschool Child Care (461 and 471 South Jackson Avenue) and vacant land
Southeast:	Lavonne Avenue, beyond which are single-family residences
Southwest:	Sinclair Drive, beyond which are single-family residences
West and Northwest:	Kammerer Avenue, beyond which is Mayfair Community Center (290 Sunset Avenue and 2039 Kammerer Avenue)

According to a previous subsurface investigation conducted on a nearby property (Case No. T10000001657 at 1936 Alum Rock Avenue), groundwater in the vicinity of the subject property is inferred to be 4 to 12 feet below ground surface (bgs). Based on topographic map interpretation, groundwater flow is inferred to be toward the northwest.

Findings and Opinions

Recognized Environmental Condition

A recognized environmental condition (REC) refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A controlled recognized environmental condition (CREC) refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A historical recognized environmental condition (HREC) refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify evidence of HRECs during the course of this assessment.

Business Environmental Risk

A Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- Due to the age of the RAM buildings, there is a potential that asbestos-containing materials (ACMs) and/or lead-based paint (LBP) are present. Readily visible suspect ACMs and painted surfaces were observed in good condition. A few areas of the building materials were noted during the assessment to be broken, chipped, and/or have signs of water damage. Prior to the disturbance of any suspect ACMs or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired, or removed, a licensed abatement contractor should be consulted.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, Santa Clara County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property. However, evidence of BERs was identified. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Practice E1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, Santa Clara County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-21) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the User to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "landowner liability protections," or "LLPs"). ASTM Standard E1527-21 constitutes "all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with and to the extent necessary to achieve the goal of the requirements set forth in the ASTM Standard E1527-21. This assessment included: 1) a property and adjoining site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments to obtain readily ascertainable information to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched readily available information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-21, AULs include both legal (that is, institutional) and physical (that is, engineering) controls that may include legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, or surface water on the subject property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the compliance and safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

Education Housing Partners, Inc., engaged Partner to perform this assessment in accordance with an agreement governing the nature, scope and purpose of the work as well as other matters critical to the engagement. All reports, both verbal and written, are for the sole use and benefit of Education Housing Partners, Inc.. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with Partner granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against Partner, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold Partner, Client and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such Use. Unauthorized use of this report shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

1.5 Limiting Conditions

The findings and conclusions contain all the limitations inherent in these methodologies that are referred to in ASTM Practice E1527-21. Specific limitations and exceptions to this ESA are set forth below:

- Partner was unable to determine the property use at five-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews. This data gap is not expected to alter the findings of this assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to the San Jose Fire Department (SJFD) for information pertaining to hazardous substances, underground storage tanks (USTs), releases, inspection records, etc. for the subject property. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other resources, this limitation is not expected to alter the overall findings of this assessment.
- Interviews with past or current owners, operators, and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner requested information relative to deed restrictions and environmental liens, a title search, and completion of the AAI User Questionnaire from the Report User. This information was not provided at the time of the assessment. This data gap is not expected to alter the findings of this assessment.
- Partner inspected one classroom and all common areas of RAM. Additionally, access in and around MACSA was limited due to safety concerns related to people breaking into the facility. Based on the size and nature of use of the uninspected units (public school classroom and youth center), this limited method of inspection is not expected to alter the overall findings of this assessment.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, California, is located on the southeastern side of Kammerer Avenue, the northeastern side of Sinclair Drive, and the northwestern side of Lavonne Avenue. According to information obtained from the Santa Clara Assessor, the subject property is identified as Assessor Parcel Number (APN) 481-31-005 and ownership is currently vested in Alum Rock Union School District. A legal description of the subject property parcel was not identified.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by RAM for educational use. On-site operations consist of educational and childcare services, administrative office activities, and routine facility maintenance. The subject property is developed with the RAM school facility in the northwestern portion of the subject property and the former MACSA Youth Center facility in the southeastern portion of the property. The RAM facility includes eight single-story buildings including an administrative office, a multipurpose room, a locker room, and five classroom buildings. The former MACSA facility includes one single-story building. In addition to the current structures, the subject property is improved with asphalt-paved parking areas, concrete-paved walkways and flatwork, playgrounds with blacktop, a field with a running track, and associated landscaping and drainage features. The MACSA facility was closed and enclosed within a chain-link fence during Partner's site reconnaissance.

The subject property is designated for residential development by the City of San Jose.

The subject property is identified as a California Hazardous Material Incident Report System (CHMIRS), a Generators from Hazardous Waste Manifest Data (HAZ GEN), and a Handlers from Hazardous Waste Manifest Data (HAZNET) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjoining Properties

The subject property is located within a residential and commercial area of Santa Clara County. During the vicinity reconnaissance, Partner observed the land uses on adjoining properties, defined in ASTM Practice E1527-21 as any real property or properties the border of which is contiguous or partially contiguous with that of the property, or that would be contiguous or partially contiguous with that of the property but for a street, road, or other public thoroughfare separating them. The adjoining properties are tabulated below:

Adjoining Properties	
Northeast:	Thompson Creek and an access road, beyond which are single-family residences and Rocketship Elementary School (2249 Dobern Avenue)
East:	Interstate 680/Sinclair Freeway at the Thompson Creek Crossing, beyond which is Minys Preschool Child Care (461 and 471 South Jackson Avenue) and vacant land
Southeast:	Lavonne Avenue, beyond which are single-family residences
Southwest:	Sinclair Drive, beyond which are single-family residences
West and Northwest:	Kammerer Avenue, beyond which is Mayfair Community Center (290 Sunset Avenue and 2039 Kammerer Avenue)

The adjoining property to the northwest is identified as a California Environmental Reporting System (CERS) Hazardous Waste Sites (HAZ), a Santa Clara County Certified Unified Program Agency (CUPA SANTACLARA), a Facility Registry Service/Facility Index (FINDS/FRS), a HAZ GEN, a City of San Jose Hazardous Materials Facilities (HAZ SANJOSE), and a HAZNET site in the regulatory database report, as further discussed in Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The 2018 United States Geological Survey (USGS) San Jose East, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 100 feet above mean sea level (MSL). The contour lines on the map indicate the area is sloping towards the northwest.

A copy of the reviewed topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

While under natural and undisturbed conditions, shallow groundwater flow most frequently follows the topography of the land surface, natural or man-made features can affect flow direction, and the presumed flow may not match the actual flow directions at the subject property and vicinity. Topographic map interpretation suggests the direction of groundwater flow in the vicinity of the subject property is toward northwest.

According to a previous subsurface investigation conducted on a nearby property (Case No. T10000001657 at 1936 Alum Rock Avenue), groundwater in the vicinity of the subject property inferred to be 4 to 12 feet bgs.

The nearest surface water in the vicinity of the subject property is Thompson Creek located adjoining to the northeast. No settling ponds, lagoons, surface impoundments, wetlands, or natural catch basins were observed at the subject property during this assessment.

According to available information, a public water system operated by San Jose Water (SJW) serves the subject property vicinity. The sources of public water for SJW are surface water (mountain surface water and imported valley surface water) and groundwater. No public supply wells were identified at the subject property or the adjoining properties.

2.4.3 Geology/Soils

The subject property is located in the Coast Range Physiographic Province of California. The Coast Ranges are northwest-trending mountain ranges (2,000 to 4,000, occasionally 6,000 feet elevation above sea level), and valleys. The ranges and valleys trend northwest, subparallel to the San Andreas Fault. Strata dip beneath alluvium of the Great Valley. To the west is the Pacific Ocean. The coastline is uplifted, terraced and wavecut. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields. The San Andreas Fault is more than 600 miles long, extending from Pt. Arena to the Gulf of California. West of the San Andreas is the Salinian Block, a granitic core extending from the southern extremity of the Coast Ranges to the north of the Farallon Islands.

Based on information obtained from the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Web Soil Survey online database, the subject property is mapped as Urban Land- Still complex, Urban Land- Elpaloalto complex, and Urban Land - Clear Lake complex, as described below:

- The Still series consists of deep, well-drained soils that formed in alluvial material from sedimentary rocks. These soils are on flood plains and alluvial fans.
- The Elpaloalto series consists of very deep, well-drained soils that formed in alluvium from mixed rock sources. These soils are on flood plains and alluvial fans.
- The Clear Lake series consists of very deep, poorly drained soils that formed in fine textured alluvium derived from mixed rock sources. These soils are in flood basins, flood plains and in swales of drainageways.
- The Urban Land designation indicates that more than 85 percent of the original soils have been disturbed or covered by paved surfaces, buildings or other structures. Because of the variability of the soil material, on-site investigation would be required to determine the specific soil composition at the subject property. Most areas are nearly level to gently sloping because of extensive grading and smoothing. Slopes range from zero to two percent.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06085C0252J, dated February 19, 2014, the subject property appears to be located in Zone X (unshaded); defined as minimal risk areas outside the 1-percent and 0.2-percent-annual-chance floodplains.

A copy of the reviewed flood map is included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Years	**Resource**	**Description/Use**
1889-1899	Topographic Maps	Unimproved land
1931-1956	Aerial Photographs, Topographic Maps	Rural residential and agricultural land
1960-Present	Aerial Photographs, City Directories, Topographic Maps, Interviews, Site Observations	Educational and child care

Tenants on the subject property have included Alum Rock School District (1961-1966), Mathson Middle/Community School (1971-2022), MACSA Youth Center (2000-2022), and Renaissance Academy at Mathson (present).

The subject property was historically used for agricultural purposes. There is a potential that agricultural chemicals such as pesticides and fertilizers were used on-site. However, no specific areas of concern (e.g. product mishandling, releases, spills, incidents, etc.) related to agricultural chemical storage and use at the subject property have been identified during the course of this assessment. The subject property has since been redeveloped with the existing improvements and the majority of the site has been covered with relatively impervious surfaces (including buildings and paved areas) since that time, which minimizes direct contact with any potential remaining concentrations in the soil. Additionally, during previous site development activities, near surface soils (where residual agricultural chemical concentrations would have likely been present, if at all) were generally mixed with fill material or disturbed during grading. Also, it is common that engineered fill material is placed over underlying soils as part of the development activities. Furthermore, it is likely that residual agricultural chemicals (if any) would have likely degraded since the site was last utilized for agricultural purposes. Based on these reasons, Partner concludes that the possible former use of agricultural chemicals is not expected to represent an environmental concern at this time.

No other potential environmental concerns were identified in association with the current or former use of the subject property.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Risk Information Services (ERIS) on July 19, 2023. The inferred uses of the subject property and adjoining properties as interpreted from the aerial photographs in Appendix B are tabulated below:

Date:	***1931, 1939, 1948***	***Scale:***	***1"=500'***
Subject Property:	Appears to be developed with residential structure in the western corner, a farm building in the northwestern portion, and agricultural land on the remaining portions.		
Northeast:	Appears to be agricultural land across creek and roadway		
East:	Appears to be agricultural land		
Southeast:	Appears to be agricultural land		
Southwest:	Appears to be agricultural land		
West:	Appears to be developed with multiple residential structures across roadway		
Northwest:	Appears to be agricultural land across roadway		

Date:	1956	Scale:	1"=500'
Subject Property:	No significant changes visible		
Northeast:	No significant changes visible		
East:	No significant changes visible		
Southeast:	Appears to be developed with residential and outbuilding structures across roadway		
Southwest:	No significant changes visible		
West:	No significant changes visible		
Northwest:	Appears to be developed with warehouse structures across roadway		

Date:	1960	Scale:	1"=500'
Subject Property:	Appears to be redeveloped with the current school structures in the northwestern portion of the property; the remainder appears to be vacant land		
Northeast:	Appears to be developed with portion of current residential structures and vacant land on remainder across creek and roadway		
East:	Appears to be developed with commercial structure across creek		
Southeast:	No significant changes visible		
Southwest:	No significant changes visible		
West:	No significant changes visible		
Northwest:	No significant changes visible		

Date:	1963	Scale:	1"=500'
Subject Property:	No significant changes visible		
Northeast:	No significant changes visible		
East:	No significant changes visible		
Southeast:	No significant changes visible		
Southwest:	Appears to be developed with current residential structures across roadway		
West:	No significant changes visible		
Northwest:	No significant changes visible		

Date:	1968	Scale:	1"=500'
Subject Property:	No significant changes visible		
Northeast:	No significant changes visible		
East:	No significant changes visible		
Southeast:	No significant changes visible		
Southwest:	No significant changes visible		
West:	Residential structures no longer visible, appears to be vacant land across roadway		
Northwest:	No significant changes visible		

Date:	1974	Scale:	1"=500'
Subject Property:	The southeastern portion of property appears to be improved with sports fields; no other significant changes are visible		
Northeast:	Appears to be developed with remaining current residential structures across creek		
East:	Appears to be redeveloped with current commercial structure across newly developed highway		
Southeast:	Appears to be vacant land		
Southwest:	No significant changes visible		
West:	Appears to be vacant land/garden across roadway		
Northwest:	Appears to be redeveloped with commercial structure and pool across roadway		

Date:	1981, 1987	Scale:	1"=500'
Subject Property:	No significant changes visible		
Northeast:	Appears to be utilized as industrial storage yard at 283 Preservation Drive across creek and roadway with no other significant changes visible		
East:	No significant changes visible		
Southeast:	Appears to be developed with current residential structures across roadway		
Southwest:	No significant changes visible		
West:	No significant changes visible		
Northwest:	No significant changes visible		

Date:	1998	Scale:	1"=500'
Subject Property:	Appears to be additionally developed with current southeastern youth center structure; no other significant changes are visible		
Northeast:	Appears to be developed with current residential structure at 283 Preservation Drive across creek and roadway with no other significant changes visible		
East:	No significant changes visible		
Southeast:	No significant changes visible		
Southwest:	No significant changes visible		
West:	No significant changes visible		
Northwest:	No significant changes visible		

Date:	2003, 2005	Scale:	1"=500'
Subject Property:	No significant changes visible

West:	No significant changes visible		
Northwest:	Appears to be additionally developed with current commercial structures across roadway		

Copies of reviewed aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner contracted with ERIS to search for fire insurance map (FIM) coverage of the subject property and surrounding area on July 20, 2023. ERIS reported no FIM coverage was available for the subject property or adjoining properties.

A copy of the no coverage documentation is included in Appendix B of this report.

3.3 City Directories

Partner reviewed historical city directories obtained from ERIS on July 21, 2023 for past names and businesses that were listed for the subject property and adjoining properties. The findings are tabulated below:

City Directory Search for 2050 Kammerer Ave (Subject Property)	
Year(s)	**Occupant Listed**
1961	Alum Rock School Dist
1966	Alum Rock School Dist
1971	Mathson L Middl Sch
1976	Alum Rk Mathsn Mddl
1981	Mathson Lee, Mathson Cmmnty Schl, Alum Rk Sc Mathson, Flor en La Cmndad, Amer Samoa Calif, Centro Cultural
1987	Alum Rk Sc Mathson, Mathson Cmmnty Schl
1990/91	Alum Rk Sc Mathson, Mathson Cmmnty Schl
1995	Alum Rk Sc Mathson, Mathson Cmmnty Schl
2001/02	Alum Ak Sc Mathson Lee Mddle
2003	Lee Mathson Middle School
2008	Lee Mathson Middle School
2012	Lee Mathson Middle School
2016	Lee Mathson Middle School
2020	Perales, Patricia, Lee Mathson Middle School
2022	Perales, Patricia, Lee Mathson Middle School
City Directory Search for 660 Sinclair Dr (Subject Property)	
Year(s)	**Occupant Listed**
2001/02	MACSA Youth Center, M a C S a Youth Center
2003	MACSA Youth Ctr
2008	MACSA Mexican American, San Jose Foothill Family Clnc, Foothills Familt Medical Clini
2012	MACSA Mexican American
2016	MACSA Youth Ctr, MACSA Mexican American, Ace Charter High School
2020	MACSA Youth Ctr, Ace Charter High School, San Jose Foothill Family Cmnty
2022	MACSA Youth Ctr, Ace Charter High School, San Jose Foothill Family Cmnty

Based on the city directory review, no environmentally sensitive listings were identified for the subject property addresses.

City Directory Search for 2039 Kammerer Ave (Adjoining Property)	
Year(s)	**Occupant Listed**
1971	Mayfair Nghbrhd Rec, Sn Jse Nghbrhd Cntr
1976	Mayfair Nghbrho Ctr, Sanjse City Pks&rec
1981	Mayfair Cmnty Ctr, Sanuse Cty Cmnty Ct, Sanjse Cty Mayfr Ct, Black Senior Center
1987	Mayfair Cmnty Cntr, Sanjse Cty Cmnty Ct
1990/91	Mayfair Cmnty Cntr, Sanjse Cty Cmnty Ct
1995	Mayfair Cmnty Cntr, Sanjse Cty Cmnty Ct
2001/02	Mayfair Cmnty Cntr, Sanjse Cty Pks Cmty Ct Mayfair
2003	Mayfair Community Ctr

2008	Recreation & Community Svcs
2012	Mayfair Community Ctr
2016	Mayfair Community Ctr
2020	Mayfair Community Ctr
2022	Mayfair Community Ctr

Residential listings dating back to 1961 were identified for the adjoining residential properties to the northeast, southeast, and southwest. Based on the city directory review, no environmentally sensitive listings were identified for the adjoining property addresses.

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from ERIS on July 20, 2023. The following inferred uses of the subject property and adjoining properties interpreted from topographic maps in Appendix B and are tabulated below:

Date:	***1889, 1897, 1899***
Subject Property:	Depicted as unimproved land
Northeast:	Depicted as unimproved land across creek
East:	Depicted as unimproved land
Southeast:	Depicted as unimproved land
Southwest:	Depicted as unimproved land
West:	Depicted as unimproved land
Northwest:	Depicted as unimproved land

Date:	***1943, 1953***
Subject Property:	Depicted with structures in the northeastern portion of the property
Northeast:	No significant changes depicted
East:	No significant changes depicted
Southeast:	Depicted with multiple structures
Southwest:	No significant changes depicted
West:	No significant changes depicted across roadway
Northwest:	No significant changes depicted across roadway

Date:	***1961, 1968***
Subject Property:	Depicted with current northwestern structures (identified as "Mathson Sch" from 1968-1980)
Northeast:	Depicted within an area shaded to indicate development across creek
East:	No significant changes depicted
Southeast:	Depicted with single structure
Southwest:	Depicted with multiple structures across roadway
West:	Depicted within an area shaded to indicate development across roadway
Northwest:	Depicted with single structure within an area shaded to indicate development across roadway

Date:	1973, 1980
Subject Property:	No significant changes depicted
Northeast:	No significant changes depicted
East:	Depicted with unimproved land across highway
Southeast:	No significant changes depicted
Southwest:	No significant changes depicted
West:	No significant changes depicted
Northwest:	No significant changes depicted

Date:	2015, 2018, 2021
Subject Property:	Depicted with two educational facilities within an area shaded to indicate development (structures are not depicted on maps of this time)
Northeast:	Depicted within an area shaded to indicate development across Thompson Creek (structures are not depicted on maps of this time)
East:	Depicted within an area shaded to indicate development across Highway 680 (structures are not depicted on maps of this time)
Southeast:	Depicted within an area shaded to indicate development (structures are not depicted on maps of this time)
Southwest:	Depicted within an area shaded to indicate development across Lavonne Avenue (structures are not depicted on maps of this time)
West:	Depicted within an area shaded to indicate development unnamed roadway (structures are not depicted on maps of this time)
Northwest:	Depicted within an area shaded to indicate development unnamed roadway (structures are not depicted on maps of this time)

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 State Department

Regulatory Agency Data	
Name of Agency:	California Environmental Protection Agency (CalEPA)
Point of Contact:	Regulated Site Portal https://siteportal.calepa.ca.gov/nsite/map/help
Agency Address:	1001 I Street, Sacramento, California 95812
Agency Phone Number:	(916) 323-2514
Date of Contact:	July 19, 2023
Method of Communication:	Online Research
Summary of Communication: No records regarding hazardous substance use, storage, or releases, or the presence of USTs and AULs on the subject property were on file with the CalEPA.	

4.1.2 Health Department

Regulatory Agency Data	
Name of Agency:	Santa Clara County Environmental Health Department (SCCEHD)
Point of Contact:	Angelica Bryan
Agency Address:	1555 Berger Drive, Building 2, Suite 300, San Jose, California 95112
Agency Phone Number:	(408) 918-3428
Date of Contact:	July 19, 2023
Method of Communication:	Online Request
Summary of Communication: No records regarding hazardous substance use, storage, or releases, or the presence of USTs and AULs on the subject property were on file with the SCCEHD.	

4.1.3 Fire Department

Regulatory Agency Data	
Name of Agency:	San Jose Bureau of Fire Prevention (SJBFP)
Point of Contact:	San Jose Public Records Center and San Jose Permits https://sjpermits.org/permits/online-permits.html
Agency Address:	1661 Senter Road, San Jose, California 95112
Agency Phone Number:	(408) 794-7000
Date of Contact:	July 19, 2023
Method of Communication:	Online Request and Research
Summary of Communication: The Bureau of Fire Prevention's Code Enforcement Division conducts inspections of all facilities that use, store, or handle hazardous substances. As of the date of this report, Partner has not received a response from the SJBFP for inclusion in this report. Records on the SJ Permits online database include fire protection and fire safety permits, such as for fire access and fire flow construction.	

4.1.4 Building Department

Regulatory Agency Data	
Name of Agency:	San Jose Building Department (SJBD)
Point of Contact:	San Jose Public Records Center and San Jose Permits https://sjpermits.org/permits/online-permits.html
Agency Address:	200 East Santa Clara Street, San Jose, California 95113
Agency Phone Number:	(408) 535-3555
Date of Contact:	July 19 and 30, 2023
Method of Communication:	Online Request and Research

Summary of Communication:

An online request for building permits directed Partner to search the SJ Permits online database. According to SJ Permits, 2050 and 2100 Kammerer Avenue are associated with parcel 481-31-001, and 660 Sinclair Drive is associated with parcel 984-43-005 (inactive). Records listed for these addresses date as far back to a sewer lateral permit from 1994 (2100 Kammerer Avenue). Only two permits were issued for 660 Sinclair Drive, and both were related to a PCS antenna. Address 2100 Kammerer Avenue was added in 2004 for use by a charter school that occupied the same facility as the public school. No permits for original construction were identified. Some site plans were available that included the size of the RAM buildings: Administration Building A (2,454 SF); Multipurpose Building B (8,038 SF); Classroom Building C (4,534 SF); Classroom Buildings D, E, and F (10,638 SF); and Locker Room Building H (6,272 SF). No information regarding the size of the MACSA Youth Center building was identified.

4.1.5 Planning Department

Regulatory Agency Data	
Name of Agency:	San Jose Planning Department (SJPD)
Point of Contact:	Zoning Map sanjoseca.gov
Agency Address:	200 East Santa Clara Street, San Jose, California 95113
Agency Phone Number:	(408) 535-3555
Date of Contact:	July 19, 2023
Method of Communication:	Online Research

Summary of Communication:

According to reviewed online documents, the subject property is zoned R-2 for Medium to High Density Residential development by the City of San Jose.

4.1.6 Oil & Gas Exploration

Regulatory Agency Data	
Name of Agency:	California Geologic Energy Management Division (CalGEM)
Point of Contact:	Well Finder https://maps.conservation.ca.gov/doggr/wellfinder/
Agency Address:	801 K Street, MS 20-22, Sacramento, California 95814
Agency Phone Number:	(916) 322-1110
Date of Contact:	July 19, 2023
Method of Communication:	Online Research

Summary of Communication:

According to CalGEM, no oil or gas wells are located on or adjoining to the subject property.

4.1.7 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Santa Clara Assessor (SCA)
Point of Contact:	Property Search Database https://www.sccassessor.org/index.php/online-services/property-search/real-property
Agency Address:	70 West Hedding Street, San Jose, California
Agency Phone Number:	(408) 299-5500
Date of Contact:	July 19, 2023
Method of Communication:	Online Research
Summary of Communication: According to records reviewed, the subject property is identified by Assessor Parcel Number (APN) 481-31-05. Ownership and building information are not provided. According to client, the property totals 18.55 acres.	

4.1.8 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	Bay Area Air Quality Management District (BAAQMD)
Point of Contact:	Rochele Henderson
Agency Address:	939 Ellis Street, San Francisco, California 94109
Agency Phone Number:	(415) 771-6000
Date of Contact:	July 19, 2023
Method of Communication:	Online Request
Summary of Communication: No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC), or records indicating the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the BAAQMD.	

4.1.9 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	GeoTracker https://geotracker.waterboards.ca.gov/
Agency Address:	1515 Clay Street, Suite 1400, Oakland, California 94612
Agency Phone Number:	(510) 622-2300
Date of Contact:	July 19, 2023
Method of Communication:	Online Research
Summary of Communication: No records regarding hazardous substance use, storage, or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.	

4.1.10 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	EnviroStor and Hazardous Waste Tracking System (HWTS) https://www.envirostor.dtsc.ca.gov/public/ https://hwts.dtsc.ca.gov/
Agency Address:	1001 I Street, Sacramento, California 95814
Agency Phone Number:	(916) 255-3687
Date of Contact:	July 19, 2023
Method of Communication:	Online Research
Summary of Communication: No records regarding hazardous substance use, storage, or releases, or the presence of USTs and AULs on the subject property were on file with the DTSC EnviroStor database. According to the HWTS database, the subject property is listed with six inactive hazardous waste profiles. Waste removed from the site under manifest has included asbestos-containing waste, polychlorinated biphenyls (PCBs), and other organic solids. These were temporary waste generation events. Based on the inactive status and the reported off-site removal of the waste under manifest, the HWTS records are not considered a REC in connection with the subject property.	

4.1.11 Other Agency

Regulatory Agency Data	
Name of Agency:	Santa Clara Valley Water District (SCVWD)
Point of Contact:	Well Information Database https://gis.valleywater.org/wellinfo/
Agency Address:	5750 Almaden Expressway, San Jose, California 95118
Agency Phone Number:	(408) 265-2600
Date of Contact:	July 19, 2023
Method of Communication:	Online Research
Summary of Communication: No records regarding water supply, extraction, or other wells on the subject property were on file with the SCVWD.	

Copies of pertinent documents obtained from the above-referenced regulatory agencies, if available, are included in Appendix B of this report.

4.2 Mapped Database Records Search

The regulatory database report provided by ERIS documents the listing of sites identified on federal, state, county, city, and tribal (when applicable) standard source environmental databases within the approximate minimum search distance (AMSD) specified by ASTM Practice E1527-21. The data from these sources are updated as these data are released and integrated into one database. The information contained in this report was compiled from publicly available sources.

The environmental database information is used to identify environmental concerns in connection with the subject property. The listings also serve to identify the known indications of the storage, use, generation, disposal, or release of hazardous substance at the subject property and the potential for contaminants to migrate onto the subject property from off-site sources in groundwater or soil in the form of liquids or vapor.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

The following table lists the sites as categorized by the regulatory database within the prescribed AMSD. The locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Database Report Data				
Database	**AMSD Radius (mile)**	**Listings Identified**		
		Subject Property	**Adjoining Properties**	**Surrounding Area Sites of Concern**
Delisted NPL Site	0.50	No	No	No
Federal SEMS Site	0.50	No	No	No
Federal SEMS-ARCHIVE	0.50	No	No	No
Federal RCRA CORRACTS Facility	1.00	No	No	No
Federal RCRA TSDF Facility	0.50	No	No	No
Federal RCRA Generators Site (LQG, SQG, VSQG, CESQG)	Subject and Adjoining	No	No	N/A
Federal IC/EC Registries	Subject Property	No	N/A	N/A
Federal ERNS Site	Subject Property	No	N/A	N/A
State/Tribal Equivalent NPL	1.00	No	No	No
State/Tribal Equivalent CERCLIS	1.00	No	No	No
State/Tribal Landfill/Solid Waste Disposal Site	0.50	No	No	No
State/Tribal Leaking Storage Tank Site (LUST/LPST)	0.50	No	No	No
State/Tribal Registered Storage Tank Sites (UST/AST)	Subject and Adjoining	No	No	No
State/Tribal IC/EC Registries	Subject and Adjoining	No	No	No
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	No	No	No
State/Tribal Spills	0.25	No	No	No
Federal Brownfield Sites	0.50	No	No	No
State Brownfield Sites	0.50	No	No	No
Additional Environmental Records	Varies	**Yes**	**Yes**	No

4.2.2 Subject Property Listings

The subject property is identified in the regulatory database report, as discussed below:

Subject Property Database Listing	
Database:	CHMIRS, HAZ GEN, HAZNET
Site Name:	City of San Jose Dept. of Transportation, Alumrock Union Sch Dist/Mathson, ARUESD - Mathson Middle School, Lee Mathson Middle School, ARUESD/Mathson Middle School
Address:	2050 Kammerer Avenue
Substance Involved:	Ethylene glycol (1997); Polychlorinated Biphenyls & Materials (1997); Asbestos containing waste (1993, 1997, 1998, 2009); and Lead paint chips/debris (2017)
Years of Operation:	1993, 1997, 1998, 2009, & 2017
Status:	Closed

Discussion:

The subject property was identified with multiple waste removal records under the DTSC HWTS database. These have included asbestos (1993, 1997, 1998, 2009, and 2017), polychlorinated biphenyls and materials (1997), and lead paint chips/debris (2017). In addition, the site was listed as a generator of hazardous waste (ethylene glycol) in 1997. There are no reported violations associated with this generation. One hazardous release incident was reported at the site on October 24, 2012. The incident involved the release of approximately 900 gallons of sewage due to a blockage. According to the report, "[Responsible Party (RP)] is reporting that a private party had an overflow from their private lateral which caused the spill into a nearby creek where about 323 gallons was lost into the creek. RP has cleaned up the remaining 577 gallons." The incident was reportedly cleaned up by the reporting party (City of San Jose Department of Transportation). Based on the reported off-site removal of hazardous waste under manifest and the reported response actions taken to cleanup the sewer release incident, these listings are not considered RECs in connection with the subject property.

4.2.3 Adjoining Property Listings

The adjoining property to the northwest is identified in the regulatory database report, as discussed below:

Adjoining Property Database Listing	
Property Name:	City of SJ-Mayfair Community Center, City of San Jose Public Works Dept, CSJ Mayfair Neighborhood Center, Ruben Canela
Address:	2039 Kammerer Avenue
Direction:	Northwest
Hydrological Gradient:	Down-gradient
Database Listing:	CERS HAZ, CUPA SANTA CLARA, FINDS/FRS, HAZ GEN, HAZ SANJOSE, HAZNET
Substance Involved:	Asbestos containing waste (friable)
Years of Operation:	2007
Status:	Closed

Discussion:

This facility is identified as chemical storage facility and a former hazardous waste generator. An asbestos abatement event occurred at the site in 2007. Additionally, violations were found during routine compliance inspections in 2014 and 2020. These violations were administrative in nature and/or ultimately returned to compliance. Based on regulatory oversight, the absence of documented releases, and the inferred direction of groundwater flow, these listings are not expected to represent an environmental concern to the subject property.

Based on the findings, vapor migration from the adjoining properties is not considered an environmental concern at this time.

4.2.4 Surrounding Area Listings of Concern to Subject Property

No surrounding area listings of concern to the subject property are identified in the regulatory database report. Based on various mitigating factors including relative distance from the subject property, inferred direction of groundwater flow, media affected, and/or regulatory status, the sites listed within the specified search radius of the subject property which appeared on local, State, or Federally published databases that report releases of hazardous substances, are not expected to represent an environmental concern.

Based on the findings, vapor migration from the surrounding properties is not considered an environmental concern at this time.

4.2.5 Unplottable Listings

The subject property is identified in the regulatory database report unplottable summary as a HAZ GEN site. This listing was included and discussed in Section 4.2.2 above. No other unplottable listings of concern to the subject property are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM Practice E1527-21, Partner requested the following site information from Education Housing Partners, Inc. (User of this report).

User Responsibilities		
Item	**Provided By User**	**Not Provided By User**
AAI User Questionnaire		**X**
Title Records, Environmental Liens, and AULs		**X**
Specialized Knowledge		**X**
Actual Knowledge		**X**
Valuation Reduction for Environmental Issues		**X**
Identification of Key Site Manager	**X**	
Reason for Performing Phase 1 ESA	**X**	
Prior Environmental Reports		**X**
Other		**X**

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Freitas, key site manager, indicated that they had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

The key site manager further stated that there are no USTs, ASTs, clarifiers, oil/water separators, groundwater monitoring wells, or hazardous substance use/storage/generation on the subject property to the best of their knowledge.

5.1.4 Interviews with Past Owners, Operators, and Occupants

Interviews with past owners, operators, and occupants were not reasonably ascertainable and thus constitute a data gap.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

No actual knowledge of any environmental lien or AULs encumbering the subject property or in connection with the subject property was provided by the User at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

No knowledge of valuation reductions associated with the subject property was provided by the User at the time of the assessment.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or reasonably ascertainable within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

No previous reports or other pertinent documentation was provided to Partner for review during the course of this assessment.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the site reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Erin Basel
Site Assessment Conducted On:	July 26, 2023

The table below provides the subject property personnel interviewed during the site reconnaissance:

Site Visit Personnel for the Subject Property			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Marc Freitas	School District Director of Bonds	marc.freitas@arusd.org	Yes
** Accompanied Partner during the site reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property*			

No potential environmental concerns were identified during the site reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located on the southwestern side of the RAM buildings. An independent solid waste disposal contractor, Recology, removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The San Jose Sanitary Sewer services the subject property vicinity. No wastewater treatment facilities or septic systems were observed or reported on the subject property.

6.1.3 Stormwater and Surface Water Drainage

Stormwater is removed from the subject property primarily by sheet flow action across the paved surfaces towards stormwater drains located on the property and in the public right-of-way. On-site stormwater drains discharge to municipal owned and maintained storm sewer system. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity provided by Pacific Gas & Electric (PG&E) Company. The mechanical system is comprised of rooftop-mounted packaged heating, ventilation, air conditioning (HVAC) units. Hot water is provided by electric water heaters.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial wastewater streams were identified at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies appeared to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a threat to the environmental condition of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains, or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – “Non-PCB;” 2) 50 ppm-500 ppm – “PCB-Contaminated;” and, 3) Greater than 500 ppm – “PCB-Containing.” The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Two pad-mounted transformers were observed on the subject property, one southwest of the RAM buildings and one northeast of the MACSA building. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the RAM transformer. Partner was not able to conduct close observations of the MACSA transformer; overgrown vegetation obscured view of the bottom of the transformer. Based on the good condition of the equipment, the transformers are not considered an environmental concern.

No other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during the site reconnaissance.

6.2.5 Strong, Pungent, or Noxious Odors

No strong, pungent, or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps, and Clarifiers

Floor drains were observed in the cafeteria kitchen. Based on the nature of use and municipal sewer connection, these drains are not considered an environmental concern.

6.2.8 Pits, Ponds, and Lagoons

No pits, ponds, or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be presumed to contain asbestos, for purposes of this regulation. All thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building that have not been appropriately tested are “presumed asbestos-containing material” (PACM).

The subject property buildings were constructed in the late 1950s and 1990s. Partner has conducted a limited, visual evaluation of accessible areas for the presence of suspect ACM at the subject property. The objective of this visual survey was to note the presence and condition of suspect ACM observed. Please refer to the table below for identified suspect ACM:

Suspect ACMs			
Suspect ACM	**Location**	**Friable Yes/No**	**Physical Condition**
Drywall Systems	Throughout Building Interiors	No	Good
Floor Tiles and Mastic	Throughout Building Interiors	No	Good
Acoustical ceiling tile	Throughout Building Interiors	Yes	Poor at MACSA, Good at RAM
Roofing Materials	Building Roofs	No	Not Assessed

Based on the limited interior observation of the MACSA building, several ceiling tiles appeared to have fallen and/or were damaged.

Prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm2 (or 5,000 µg/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X," to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the MACSA buildings (pre-1978), there is a potential that LBP is present. Interior and exterior painted surfaces were observed in good condition and therefore not expected to represent a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Actual material samples would need to be collected or an XRF Survey would need to be completed in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered an environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by SJW serves the subject property vicinity. According to the 2021 Annual Water Quality Report, water supplied by SJW is in compliance with State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.3.6 Wetlands

The subject property does not appear to be a designated wetland area based on information obtained from the United States Fish and Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No settling ponds, lagoons, surface impoundments, wetlands, or natural catch basins were observed at the subject property during this assessment.

6.4 Adjoining Property Reconnaissance

The adjoining property reconnaissance consisted of observing the adjoining properties from the subject property premises. No items of environmental concern were identified on the adjoining properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 VAPOR ENCROACHMENT CONDITIONS

Partner conducted a limited non-intrusive vapor screening on the subject property to identify, to the extent feasible, the potential for vapor encroachment conditions (VECs) in connection with the subject property. This included consideration of chemicals of concern (COC) that may migrate as vapors into the subsurface of the subject property as a result of contaminated soil and groundwater on or near the property.

This screening utilized readily available data sources previously discussed in this Phase I ESA that includes:

- the physical setting of the subject property (Section 2.4),
- standard historical sources for the subject property, adjoining, and surrounding area (Section 3.0),
- known or potentially contaminated sites as identified from information from regulatory agencies and sites on Federal, State, tribal and local databases (Section 4.0), and
- information from the site reconnaissance (Section 6.0) of the subject property and observations of the surrounding properties.

The results of our data collection, reconnaissance, and analysis are tabulated below:

Potential for Vapor Encroachment to Impact the Subject Property	
Area of Concern	***Likely or Known VEC to Subject Property***
Subject Property Existing Operations or Conditions	None identified that impact the subject property.
Historical Uses of the Subject Property	None identified that impact the subject property.
Adjoining Property Operations or Existing Conditions	None identified that impact the subject property.
Historical Uses of Adjoining Properties or Nearby Properties	None identified that impact the subject property.
Regulatory Review of sites identified on Federal, State, tribal and Local Environmental Databases which were located in the AMSD	None identified that impact the subject property.

Based on the findings of the limited non-intrusive vapor screening, vapor intrusion is unlikely to be an issue of concern at the subject property. As such, no further assessment is recommended.

8.0 FINDINGS AND CONCLUSIONS

Findings and Opinions

Recognized Environmental Condition

A REC refers to the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

- Partner did not identify evidence of RECs during the course of this assessment.

Controlled Recognized Environmental Condition

A CREC refers to a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify evidence of CRECs during the course of this assessment.

Historical Recognized Environmental Condition

A HREC refers to a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).

- Partner did not identify evidence of HRECs during the course of this assessment.

Business Environmental Risk

A BER is a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. The following was identified during the course of this assessment:

- Due to the age of the RAM buildings, there is a potential that ACMs and/or LBP are present. Readily visible suspect ACMs and painted surfaces were observed in good condition. A few areas of the building materials were noted during the assessment to be broken, chipped, and/or have signs of water damage. Prior to the disturbance of any suspect ACMs or LBP at the subject property, a comprehensive survey, designed to determine if the suspect materials are regulated, is recommended. If such materials are identified and need to be disturbed, repaired, or removed, a licensed abatement contractor should be consulted.

Significant Data Gaps

No significant data gaps affecting the ability of the Environmental Professional to identify a REC were encountered during this assessment.

Conclusions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, Santa Clara County, California (the “subject property”). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of RECs, CRECs, or HRECs in connection with the subject property. However, evidence of BERs was identified. Based on the conclusions of this assessment, Partner recommends no further investigation of the subject property at this time.

9.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 2050 Kammerer Avenue and 600 Sinclair Drive in San Jose, Santa Clara County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

RE: CITY DIRECTORY RESEARCH
2050 Kammerer Avenue & 600 Sinclair Drive
SAN JOSE,CA 95116

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
2025-2100 of Kammerer Ave
2030-2100 of Lavonne Ave

Request

Please provide public records for the property identified by APN 481-31-005. The current addresses appear to be 2050-2100 Kammerer Avenue & 600-660 Sinclair Drive, San Jose, CA, but please research any other addresses for the parcel that you may find.

The following types of records are of particular interest:

- Compliance and enforcement including permits, inspections, and notices of violations
- Hazardous materials storage, use, spills, and/or releases
- Aboveground and underground storage tanks
- Emergency responses
- Wells (monitoring/potable/agricultural/irrigation/etc.)
- Septic systems, clarifiers, and oil-water separators

Request Closed Public

Good afternoon,

Thank you for your recent record request received on 07/19/23 for the following address(s) in SAN JOSE:

2050-2100 Kammerer Avenue

600-660 Sinclair Drive

Unfortunately, we do not have records for these locations. However, additional electronic documents may be found on the following websites:

- Local Oversight Program (LOP)
- GEOTracker (GT)
- Spill Reports Website – California Office of Emergency Services (Cal OES):

Please be advised that in some cities, other participating agencies may be responsible for maintaining the type of files you requested. This link may be of assistance in determining who will have the documents you are looking for in the future:

- UNIDOCS – Who regulates what in Santa Clara County

CITY OF SAN JOSE
CAPITAL OF SILICON VALLEY

Dear Erin Basel:

The City is in receipt of your Public Records Act Request which you submitted on 7/19/2023. Your request was given the reference number R002089-071923 for tracking purposes.

Records Requested: Please provide public records for the property identified by APN 481-31-005. The current addresses appear to be 2050-2100 Kammerer Avenue & 600-660 Sinclair Drive, San Jose, CA, but please research any other addresses for the parcel that you may find

• Hazardous materials storage, use, spills, and/or releases
• Aboveground and underground storage tank
Thank you!

Our staff is currently searching for and collecting documents. We will notify you by 7/31/2023 of disclosable public records. We will, at that time, also inform you of the costs incurred by the City in copying the responsive documents.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the Public Records Center.

City of San Jose

To monitor the progress or update this request, please log into the Public Records Center

Subject: [Records Center] Public Records Request - City :: R002091-071923
Body:

Hello,

This is in response to your request for public records pertaining to the Building Department only.

All Building Department documents, including permits and Certificates of Occupancy, are available for public inspection online, at no cost. Please follow the steps below to access, view and print Building Department documents.

1. Go to https://sjpermits.org
2. Click on Search for permit, property or zoning info
3. Under Search by Address, enter the House or Building Number and the Street Name (use 1st not First for numerical street names), do not enter street direction such as North, South, etc. Alternately, you may search by the Assessor's Parcel Number (APN) if known.
4. Click Search
5. Click on the appropriate address, if more than one option appears.
6. Click on 'Documents' (at the bottom of the page), this will give you a list of all documents on file for this address.
7. Scroll down the documents list and locate the desired document (i.e., 'C of O' for Certificate of Occupancy).
8. Click on the permit number (first column on the left) to open, view & print the document.
9. Repeat the above for any additional address.

Please note, if there are no Certificates of Occupancy (C of O) on file for this property, the reason there is not one on file is unknown. It is a violation not to have a C of O, but, any enforcement action, that may or may not be taken, is handled on a case-by-case basis. It is the responsibility of the owner, or tenants (for commercial properties), to contact the City of San Jose's Building Permit Center to obtain a Certificate of Occupancy. A new C of O is not required due to a change of owner. A new C of O is required if there is a change of use of the property.

Thank you,

Public Records Request

Please use this form to make a request that "reasonably describes an identifiable record or records." (Government Code § 6253) Most requests to the Air District are for records about a particular facility or address. Please enter as much information as you can below so that we understand what records you seek. Please submit a separate form for each facility or address. You may also request any other records by describing them in the "other" box. We will send you an e-mail confirming each request. We will also contact you before starting work if there will be copying or data compilation costs.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Santa Clara Area, California, Western Part
Survey Area Data: Version 11, Sep 14, 2022

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Jun 11, 2021—Jun 16, 2021

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

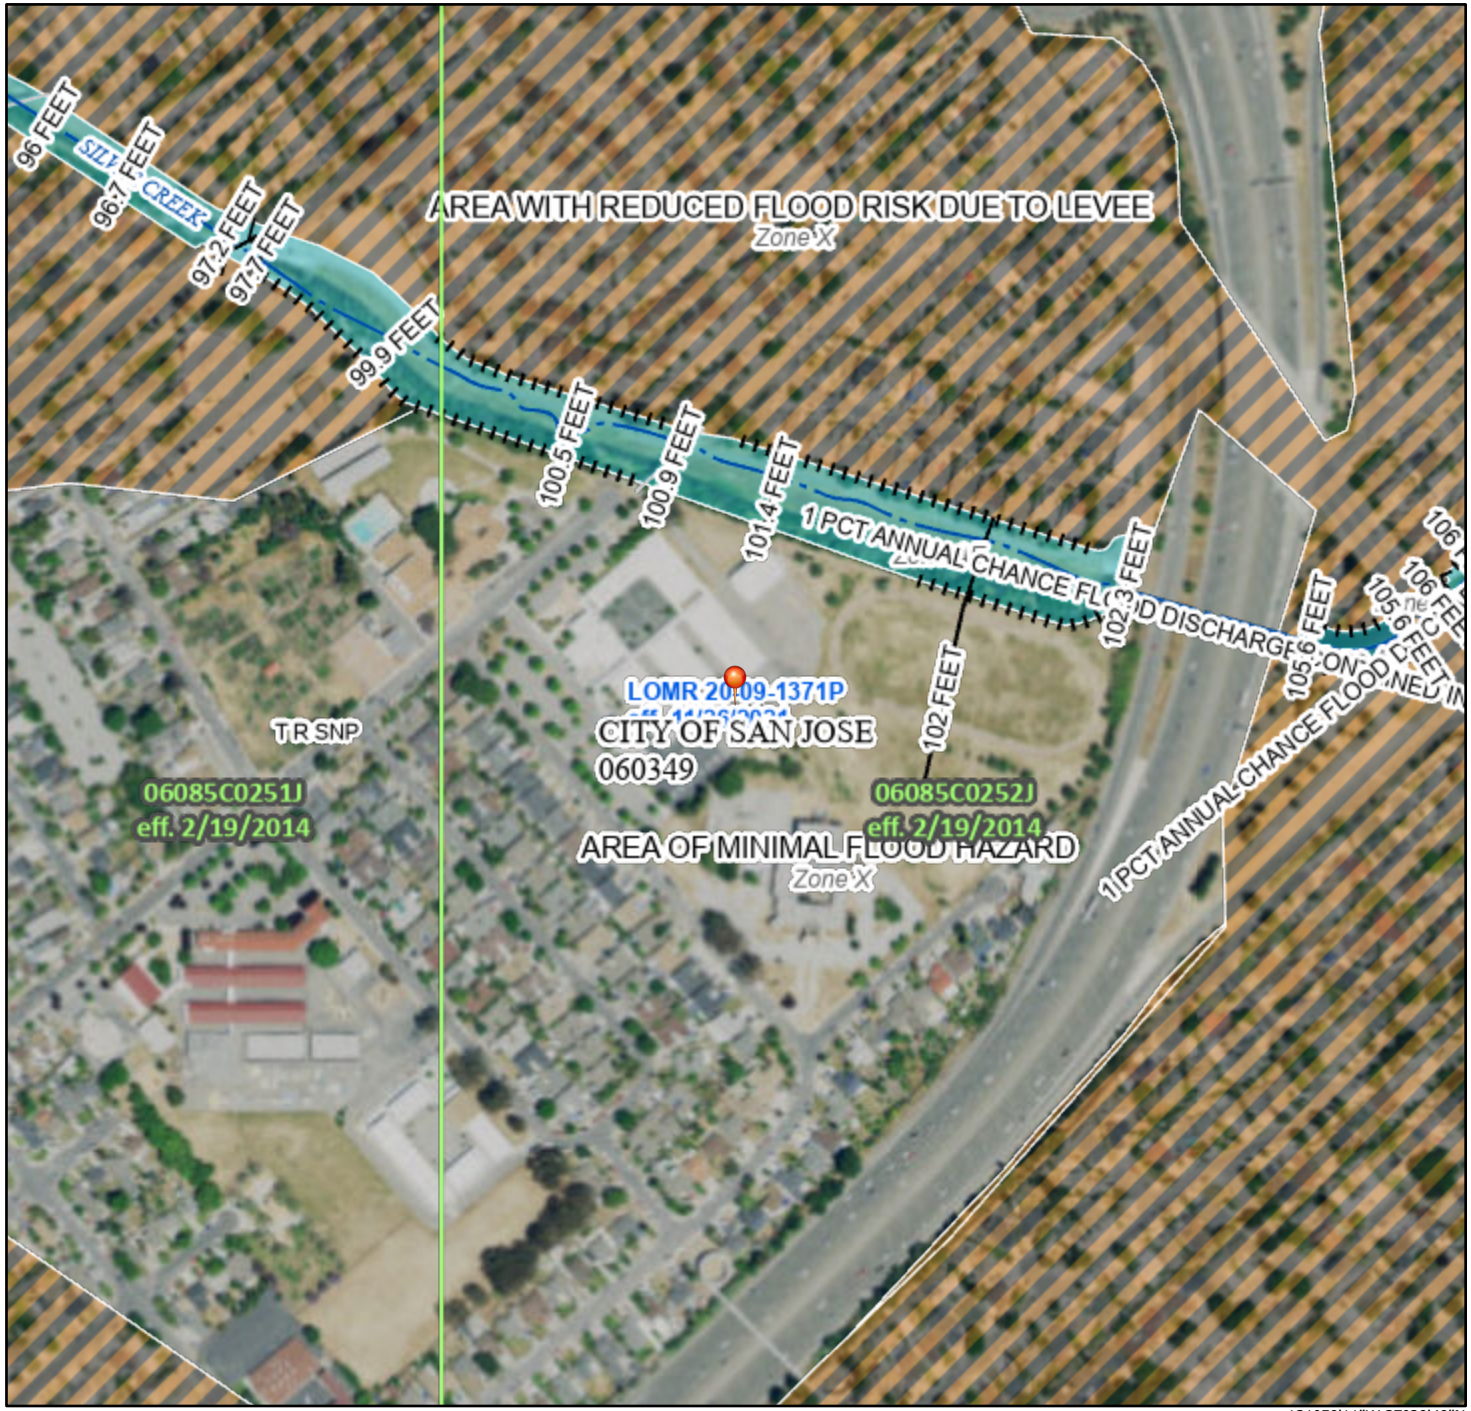

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
130	Urban land-Still complex, 0 to 2 percent slopes	2.1	10.0%
131	Urban land-Elpaloalto complex, 0 to 2 percent slopes	18.7	87.6%
160	Urbanland-Clear Lake complex, 0 to 2 percent slopes	0.5	2.4%

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 7/19/2023 at 10:54 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

CALIFORNIA - EPA Map of Radon Zones

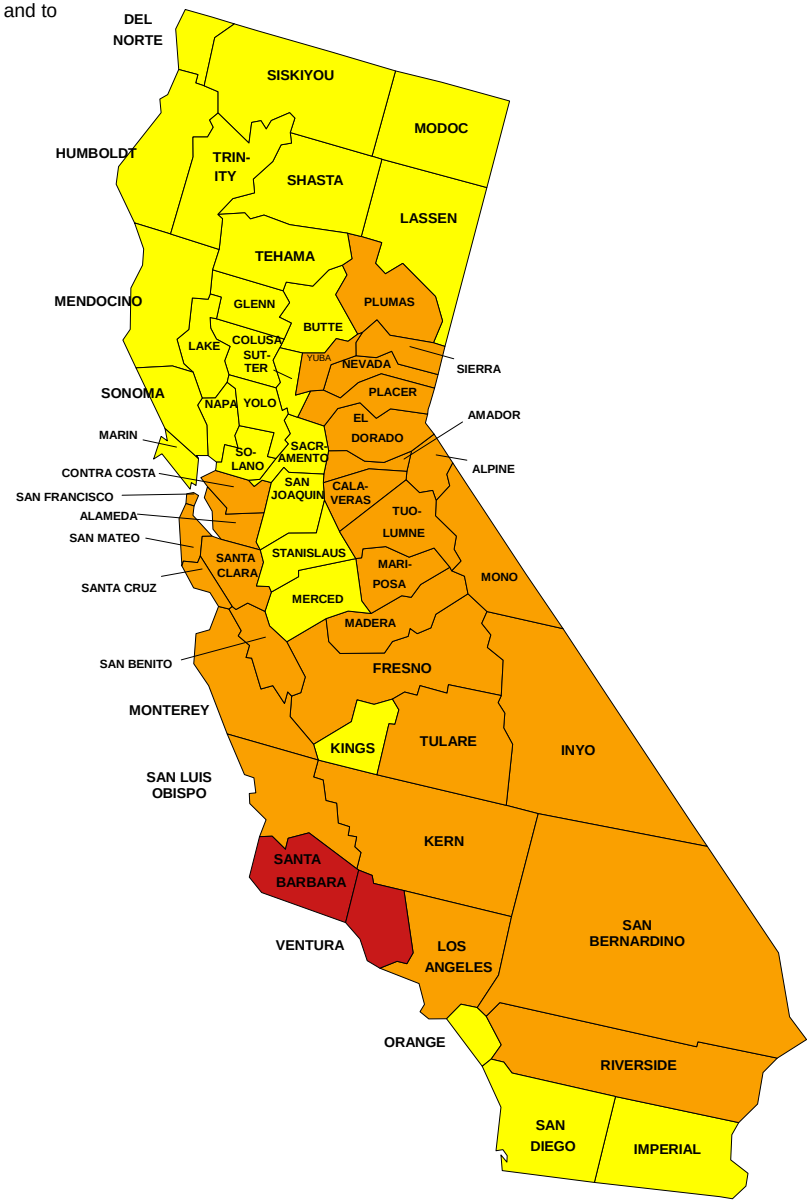

http://www.epa.gov/radon/zonemap.html

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of California" (USGS Open-file Report 93-292-I) before using this map. See http://energy.cr.usgs.gov/radon/grpinfo.html This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

Zone 1 Zone 2 Zone 3

SAN JOSE WATER

Annual Water Quality Report 2022

Clean Water for Our Customers

This brochure provides a snapshot of last year's water quality data for San Jose Water (SJW). Included are details about where your water comes from and how your water quality compares to State standards. SJW is pleased to report that your tap water met all USEPA and State primary drinking water health standards in 2022. As a member of the Partnership for Safe Water, SJW remains focused on water quality and environmental stewardship to ensure continued delivery of safe and high quality water to our customers. Since joining the Partnership for Safe Water, SJW has increased distribution system residual disinfectant levels and outperformed industry benchmarks in early detection of leaks and reducing main breaks. These Partnership-related improvements have contributed to increased water service reliability and enhanced public health protection.

Williams Station wells.

Per- and Polyfluoroalkyl Substances

Per- and Polyfluoroalkyl Substances (PFASs) are manmade chemicals that have been widely used in industry and consumer products ranging from water-repellent textiles to firefighting foam. PFAS are slow to break down in the environment and can move far from their original use areas. The manufacturing and use of these products puts PFAS into the environment, where, over time, they may end up in drinking water supplies.

Your health and the health of your household are our first priority. That's why we look for potentially concerning contaminants like PFAS long before they are regulated. Water quality is regulated to protect public health and drinking water quality is public information. Because of this, water often provides our first clues about trends we need to pay attention to.

In response to data gathered during our monitoring program, SJW has successfully completed an evaluation of treatment methods to remove PFAS at two of the most impacted well fields. We are pleased to report that SJW's largest wellfield, with 15 wells, has moved into the detailed design phase for a treatment facility that will remove PFAS while improving aesthetic issues by removing iron and manganese. This facility will serve as a model for PFAS treatment in SJW's distribution system.

San Jose Water and Valley Water have been working closely with engineers and geologists from the San Francisco Bay Regional Water Quality Control Board to identify sites in the region that could be potential contributors to PFAS contamination. Once identified, further in-depth studies and ultimately, cleanup of these locations will commence. This collaborative work has already resulted in increased monitoring at well locations where PFAS was detected at sites nearby.

How Can We Reduce Exposure to PFAS?

PFAS exposure can vary depending on your local environment, but you can take steps to reduce the PFAS around you. Choosing products that do not have PFAS can require some research, but it is an effective way to reduce your exposure. It can also mean giving up some product features such as "non-stick," or "water- or stain-resistant." Consider replacing older and worn-out products with these features.

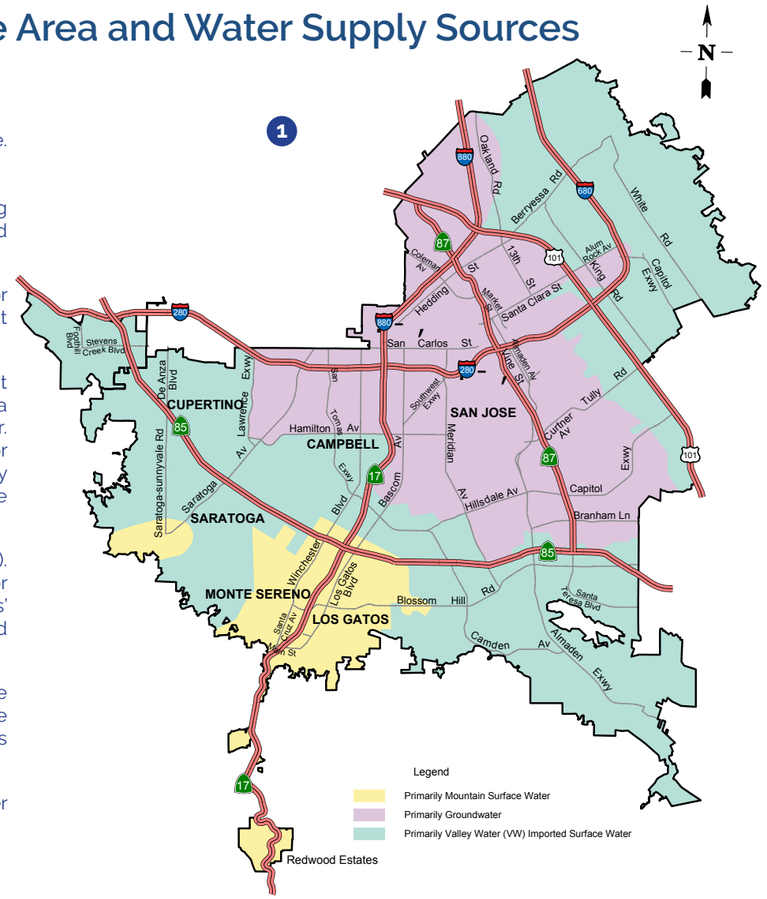

What Can I Do?

- Avoid buying non-stick cookware and stain-resistant furniture and carpeting containing PFAS. Look for 'fluoro' or 'perfluoro' in a list of ingredients or ask the manufacturer.
- Limit eating foods packed in materials that use PFAS. Common food packaging that may have PFAS includes microwave popcorn bags, fast food boxes (like french-fry containers and pizza boxes), and bakery bags.
- Minimize the dust in your home to limit PFAS particles in the air. Change your home's air filter on a regular basis and leave your shoes at the door to avoid tracking in dirt and pollutants.
- Avoid personal care products that contain PFAS. These include certain types of dental floss, nail polish, facial moisturizers, and cosmetics.
- If you want an at-home treatment option, look at the NSF International **list of products certified to remove PFAS** from drinking water in the home.
- **PFASCentral.org** maintains a list of manufacturers and retailers that have taken steps to remove PFAS chemicals from their products.

San Jose Water Service Area and Water Supply Sources

How to Read the Water Quality Table

1. Find your location on the map on this page. Note which is your source water area.
2. Go to this column in the tables on the following pages to find the parameter you are interested in. Remember – no news is good news!
3. This column notes the unit of measurement for the contaminant. For more information about these units see the Definitions section below.
4. This column lists the maximum contaminant level (MCL). The MCL is the highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.
5. This column lists the public health goal (PHG). At that amount or lower, there is no known or expected risk to health from the parameters' presence in drinking water. Not all listed parameters have state or federal goals.
6. Find the column that corresponds to the source water that primarily serves you. This is the amount of the parameter detected in your area's water.
7. The last column lists how the parameter typically gets into your drinking water.

IMPORTANT DEFINITIONS

Detection Limit for Purposes of Reporting (DLR): The lowest level of a constituent that the Department of Public Health requires to be reported.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water, below which there is no known or expected risk to health. MCLGs are set by the U.S. Environmental Protection Agency.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. Primary MCLs are set as close to the PHGs (or MCLGs) as is economically and technologically feasible. Secondary MCLs are set to protect the odor, taste, and appearance of drinking water.

Maximum Residual Disinfectant Level (MRDL): The level of a disinfectant added for water treatment that may not be exceeded at consumer's tap.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Not Applicable (N/A): Not applicable.

Not Detected (ND): If a constituent is not measured at or above a DLR, it is reported as ND.

Not Sampled (NS): Source designated non-vulnerable or testing not required.

Notification Level (NL): A non-regulatory, health-based advisory level for contaminants in drinking water that do not have established Maximum Contaminant Levels. Systems are required to report exceedances to their governing boards and Public Authorities.

Primary Drinking Water Standard (PDWS): MCLs and MRDLs for contaminants that affect health along with their monitoring and reporting requirements, and water treatment requirements.

Public Health Goal (PHG): The level of a contaminant in drinking water below which there is no known or expected risk to health. PHGs are set by the California Environmental Protection Agency.

Regulatory Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements that a water system must follow.

Response Level (RL): A non-regulatory, precautionary health-based level. Water systems are required to remove from service, provide treatment, or notify all impacted customers directly for any water source exceeding this level.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

UNITS

Nephelometric Turbidity Units (NTU): A measure of the cloudiness of the water.

One part per million (ppm): One milligram per liter (mg/L). One ppm corresponds to a single penny in $10,000 or one minute in two years.

One part per billion (ppb): One microgram per liter (µg/L). One ppb corresponds to a single penny in $10,000,000 or one minute in 1,900 years.

One part per trillion (ppt): One nanogram per liter (ng/L). One ppt corresponds to a single penny in $10,000,000,000 or one minute in 1.9 million years.

pCi/L: Picocuries per liter, a measure of radioactivity.

TON: Threshold Odor Number, a measure of odor.

umho/cm: Micromho per centimeter, a measure of electrical conductivity.

2022 SJW Annual Water Quality Report

The State Division of Drinking Water specifies monitoring frequencies for some parameters less often than annually because the concentrations do not change frequently. Some of our data, though representative, are more than a year old.

PRIMARY

Primary standards relate to public health.

* This Consumer Confidence Report (CCR) reflects changes in drinking water regulatory requirement that add the requirements of the federal Revised Total Coliform Rule, effective since April 1, 2016, to the existing state Total Coliform Rule. The revised rule maintains the purpose to protect public health by ensuring the integrity of the drinking water distribution system and monitoring for the presence of microbials (i.e., total coliform and E. coli bacteria). The U.S. EPA anticipates greater public health protection as the rule requires water systems that are vulnerable to microbial contamination to identify and fix problems. Water systems that exceed a specified frequency of total coliform occurrences are required to conduct an assessment to determine if any sanitary defects exist. If found, these must be corrected by the water system. The state Revised Total Coliform Rule became effective July 1, 2021.

SECONDARY

Secondary standards relate to aesthetic qualities such as taste, odor, and color but do not pose any health risk.

7 Typical Sources of Chemical Constituents

1. Erosion or leaching of natural deposits
2. Runoff and leaching from agriculture
3. Residue from some surface water treatment processes
4. Industrial waste
5. Seawater influence
6. Discharge from factories and metal degreasing sites
7. By-product of drinking water disinfection
8. Naturally present in the environment
9. Soil erosion and stream sediments
10. Internal corrosion of plumbing systems
11. Water additive for promotion of public health

Footnotes

1 This parameter is only applicable to surface water treatment techniques

2 There is currently no MCL for chromium-6. The previous MCL of 10 ppb was withdrawn on September 11, 2017. There is also currently no detection limit for reporting. All results less than 1 ppb are considered ND. SJW is continuing to report the sample results for informational purpose

3 Fluoride was not added to these sources.

4 State regulations recommend an optimal fluoride level of 0.7 ppm be maintained in fluoridated treated water. Concentrations listed here are provided by San Jose Water's wholesalers.

Wildlife rests in the San Jose Water watershed.

San Jose Water staff survey the Lake Elsman spillway.

San Jose Water Staff at Austrian Dam.

Water Quality Guidance

Source Water Assessment

An original assessment of the drinking water sources for SJW's water system was completed in December 2002 and is updated as new wells are brought online. SJW's wells are considered most vulnerable to one or more of the following activities, which have not been associated with any contaminants detected in the water supply: dry cleaners, automobile gas stations and repair shops, and underground storage tanks. Some of SJW's wells are also considered vulnerable to metal plating and finishing, photo processing/printing, electrical/electronics manufacturing, chemical/petroleum processing/storage, known contaminant plumes, and plastics/synthetics producers. SJW's surface supplies are considered most vulnerable to low density septic systems. Imported surface water purchased from Valley Water is considered most vulnerable to a variety of land use practices, such as agricultural and urban runoff, recreational activities, livestock grazing, as well as residential and industrial development. In addition, local sources are vulnerable to potential contamination from commercial stables and historic mining practices. Although these activities exist in areas near one or more of SJW's or Valley Water sources, physical barriers, treatment systems, and monitoring programs are in place to ensure that water supplied to our customers is not adversely affected. Customers seeking additional information are encouraged to contact SJW Customer Service at 408.279.7900.

Special Populations

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. USEPA/Centers for Disease Control (CDC) guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbial contaminants are available from the Safe Drinking Water Hotline (1-800-426-4791).

Drinking Water Regulation

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the USEPA's Safe Drinking Water Hotline (1-800-426-4791). The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants, such as salts and metals, that can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides that may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants, including synthetic and volatile organic chemicals, that are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, agricultural application, and septic systems.
- Radioactive contaminants, that can be naturally-occurring or be the result of oil and gas production and mining activities.

Lead

In order to ensure that tap water is safe to drink, the U.S. Environmental Protection Agency (USEPA) and the State Water Resources Control Board (State Board) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. State Board regulations also establish limits for contaminants in bottled water that provide the same protection for public health. If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. San Jose Water is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you do so, you may wish to collect the flushed water and reuse it for another beneficial purpose, such as watering plants. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/lead.

Lead sampling in the system

Data from the 2019 round of Lead and Copper Rule (LCR) sampling can be found in the Primary Standards table under Lead and Copper. To make LCR sampling as meaningful as possible, SJW worked with the state Division of Drinking Water and an outside consultant to identify the areas of highest risk for lead exposure from drinking water in our system. Compliance is determined by the 90th percentile of sample results. The 90th percentile for SJW's 2019 lead results was below the lead detection limit, and both lead and copper results met regulatory standards. SJW's next round of LCR sampling will occur in 2022. If you have reason for concern about lead containing fixtures in your home, please feel free to contact us at (408) 279–7900 to request sampling.

Lead Sampling in Schools

In January 2018, Assembly Bill 746 went into effect requiring water utilities to collect lead samples in all daycare, preschool and kindergarten through 12th grade schools on public property to ensure students have access to safe drinking water. If a private school wished to have their water sampled, the head of the school could request lead testing from their water provider. The timeframe for sample collection ended in July of 2019. Over the span of the program, San Jose Water sampled 330 schools in our area, including all schools that requested sampling. Of the schools assessed, four initially had a result above the action level, but each was promptly resolved through corrective actions. For more information about sampling in your child's school, contact your school officials or check out the website at: https://www.waterboards.ca.gov/drinking_water/certlic/drinkingwater/leadsamplinginschools.html.

Fluoride

For information on fluoride in your water, please refer to our website at https://www.sjwater.com/customer-care/help-information/fluoride, or to see up-to-date concentrations local to your neighborhood.

Nitrate

Nitrate as Nitrogen (Nitrate-N) in drinking water at levels above 10 mg/L is a health risk for infants of less than six months of age. Such Nitrate-N levels in drinking water can interfere with the capacity of the infant's blood to carry oxygen, resulting in a serious illness; symptoms include shortness of breath and blueness of the skin. Nitrate-N levels above 10 mg/L may also affect the ability of the blood to carry oxygen in other individuals, such as pregnant women and those with certain specific enzyme deficiencies. If you are caring for an infant, or you are pregnant, you should ask advice from your health care provider.

Turbidity

Turbidity is a measure of the cloudiness of the water. We monitor it because it is a good indicator of the effectiveness of our filtration systems.

Reminder for Dialysis Patients and Aquarium Owners

Chloramine and chlorine may be present in the water provided by SJW. These chemicals are used to protect public health by destroying disease-causing organisms. Except for a slight chlorinous taste or odor, these disinfectants will not cause any problems for the general public. However, home dialysis patients and aquarium owners must take special precautions before the water can be used in kidney dialysis machines or aquariums. Please consult your doctor or dialysis technician to be sure your home equipment is adequate and proper tests are being performed every time it is used. Before filling an aquarium or fish pond, the disinfectant must be removed. Your local tropical fish store can help determine the best water treatment for your fish.

To Learn More about the Quality of Your Water

Your drinking water is continually tested to ensure compliance with state and federal standards for quality and safety. This annual report summarizes the results of more than 18,000 water quality tests conducted throughout the year. If you have any questions about your water quality, service, or the information contained in this report, please call us at 408.279.7900, Monday to Friday between 8:30AM and 5:30PM. You may also contact the US EPA Safe Drinking Water Hotline at 800.426.4791 for additional public information about the Safe Drinking Water Act or US EPA's drinking water regulatory programs.

Violations

Violation Date:	01/24/2020	**Violation Source:**	CERS
Violation Program:	HMRRP	**Violation Division:**	Santa Clara County Environmental Health
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)		

Violation Notes:

The reportable hazardous materials inventory disclosed on the last HMBP on 1/31/2019 does not include the required federal hazard categories. Within 30 days, revise and resubmit the inventory noting applicable federal hazard categories.

Violation Description:

Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violations

Violation Date: 09/12/2014 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara County Environmental Health
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 01/10/2017. AN ANNUAL HMBP REFRESHER HAS NOT BEEN PROVIDED AND IT HASN'T BEEN DOCUMENTED. PROVIDE TRAINING IMMEDIATELY TO ALL EMPLOYEES RESPONSIBLE FOR MAINTENANCE OF THE POOLS AND BEGIN DOCUMENTING THIS TRAINING.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Violations

Violation Date: 01/24/2020 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara County Environmental Health
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Notes:

Returned to compliance on 02/18/2020. The HMBP site map last submitted on 1/31/2019 is illegible and does not meet the minimum requirements as specified by the reviewer comments on 2/1/2019. Within 30 days, revise and resubmit the Site Map with the required elements listed below.

Violation Description:

Failure to complete and electronically submit a site map with all required content.

Violations

Violation Date: 09/12/2014 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara County Environmental Health
Citation: HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Notes:

Returned to compliance on 01/10/2017. THE LAST TIME YOUR HMBP WAS SUBMITTED AND CERTIFIED TO OUR DEPARTMENT WAS ON 4/23/2012. YOUR HMBP NEEDS TO BE CERTIFIED ANNUALLY. CERTIFIED YOUR HMBP VIA CERS IMMEDIATELY. YOUR HAZARDOUS MATERIALS INVENTORY NEEDS TO INCLUDE THE FOLLOWING: -SODIUM HYPOCHLORITE- 500 GALLONS -MURIATIC ACID- 200 GALLONS -CO2- 1200 POUNDS

Violation Description:

Failure to annually review and electronically certify that the business plan is complete, accurate, and up-to-date.

Violations

Violation Date: 01/24/2020 ***Violation Source:*** CERS
Violation Program: HMRRP ***Violation Division:*** Santa Clara County Environmental Health
Citation: HSC 6.95 25505(a)(4) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)(4)
Violation Notes:

Returned to compliance on 05/27/2020. Per Mr. Guerrero, the 4 technicians who service the pools all have CPO (5-year) certifications, however, annual training in emergency response and safety procedures must also be conducted and documented. Training logs must be documented electronically or in hard copy and must be kept available for inspection for a minimum of 3 years. Template form provided.

Violation Description:

Failure to provide initial and annual training to all employees in safety procedures in the event of a release or threatened release of a hazardous material or failure to document and maintain training records for a minimum of three years.

Site History:	

November 2003 Investigation: Previous site assessment activities included the drilling and sampling of eight onsite exploratory borings, designated SB-1 through SB-8, by AEI in November 2003. Findings of the investigation indicated that petroleum hydrocarbons were present in soil and groundwater beneath the site. Total petroleum hydrocarbons (TPH) as gasoline (TPHg), TPH as motor oil (TPHmo), and benzene were detected in groundwater samples at concentrations of up to 4,200 micrograms per liter (ìg/L), 2,300 ìg/L, and 1,400 ìg/L, respectively. Methyl-tert butyl ether (MTBE) was not detected in any of the soil or groundwater samples collected from borings SB-1 through SB-8. During the investigation, groundwater was encountered at depths of approximately 16 ft below ground surface (bgs). Details of this investigation are presented in an AEI December 8, 2003 report entitled Phase II Subsurface Investigation. September 2004 Investigation: In September 2004, SAIC installed four onsite monitoring wells, designated MW-1 through MW-4, and drilled three onsite exploratory borings, designated SB-9 through SB-11. SAIC also supervised a geophysical investigation at the site to confirm the removal of the USTs, and conducted a file review of eight nearby active and closed UST sites utilizing the online Santa Clara Valley Water District (SCVWD) Groundwater Cleanup Program Database, to determine if the petroleum hydrocarbons beneath the site may be from an offsite source or sources. Findings of the investigation indicated that the USTs were removed from the site, and that the TPHg present in soil and groundwater beneath the site were likely due to historical releases from the USTs and product dispenser island piping during the time the service station was in operation. SAIC identified a Coast Oil bulk plant at 2075 Alum Rock Avenue, located approximately 700 ft northwest of the subject site, as a possible offsite source for petroleum hydrocarbon contamination. During the investigation, groundwater was encountered at a depth of approximately 15 ft bgs, and was calculated to flow toward the north at an approximate hydraulic gradient of 0.001. The highest concentrations of 470,000 ìg/L TPHg, 22,000 ìg/L TPHmo and 13,000 ìg/L benzene were detected in a groundwater sample collected from boring SB-10. MTBE (by Environmental Protection Agency [EPA] Method 8260) was not detected in any of the soil and groundwater samples collected from the borings for MW-1 through MW-4 and SB-9 through SB-11. The origin of TPHmo beneath the site was determined to be unclear, since TPHmo was not detected at or above the laboratory detection limits in the soil and groundwater samples collected from well MW-1, located adjacent to the former waste oil UST. Based on the results of the investigation, the lateral extent of the dissolved-phase petroleum hydrocarbon plume appeared to be adequately delineated, however, additional onsite assessment to further assess the vertical extent of the plume was warranted. SAIC recommended additional onsite investigations to further assess the vertical extent of the plume in the northern and eastern portion of the site. SAIC also recommended the installation of a 4-inch diameter monitoring well in the area of boring SB-10, in order to evaluate water quality trends in the area of the former product dispenser islands. Finally, SAIC recommended the installation of a monitoring well up-gradient of the former UST complex to evaluate the lateral extent of the plume in the southern portion of the site. Details of the above investigations are presented in an SAIC October 27, 2004 report entitled Soil and Groundwater Investigation Report. 2005 Soil and Groundwater Investigation: From December 28 through 30, 2004, and January 3, 2005, two exploratory soil borings, SB-12 and SB-13, and three groundwater monitoring wells, MW-5, MW-6 and MW-7, were installed onsite. Boring SB-12 was drilled to a total depth of 60 ft bgs. Boring SB-13 was drilled to a total depth of 65 ft bgs. Borings for wells MW-6 and MW-7 were each drilled to a total depth of 30 ft bgs. The well boring for well MW-5 was drilled to total depth of 35 ft bgs. The borings were installed to obtain vertical delineation of the dissolved-phase petroleum hydrocarbon plume in the northern and eastern portions of the site, and to confirm that the plume had not migrated towards the municipal water supply wells located approximately 500 ft to the east-southeast. The monitoring wells were installed to assess groundwater quality in the area of the former dispenser islands and up-gradient from the UST complex. The highest concentrations of 190 milligrams per kilogram (mg/kg) TPHg, 8.3 mg/kg toluene, 5.7 mg/kg ethylbenzene, and 18 mg/kg total xylenes were detected in the soil sample collected from well boring MW-5 at a depth of 20 ft bgs. The highest concentration of 4.6 mg/kg benzene was detected in the soil sample collected from well boring MW-5 at a depth of 25 ft bgs. Detectable concentrations of total recoverable petroleum hydrocarbons (TRPH) ranged from 23.4 mg/kg in the soil sample collected from boring SB-12 at a depth of 20 ft bgs, to 51.4 mg/kg in the soil sample collected from well boring MW-5 at 25 ft bgs. TPHd and MTBE were not detected at or above laboratory detection limits in any of the soil samples

analyzed. The highest concentrations of 160,000 ìg/L TPHg, 4,800 ìg/L TPHd, 22,000 ìg/L benzene, and 4,000 ìg/L ethylbenzene were detected in the groundwater sample collected from well MW-7. The highest concentration of 28,000 ìg/L toluene was detected in the groundwater sample collected from well MW-5. The highest concentration of 13,000 ìg/L total xylenes was detected in the groundwater samples collected from wells MW-5 and MW-7. Detectable concentrations of TRPH ranged from 430 ìg/L in the groundwater sample collected from boring SB-13 at firstencountered groundwater, to 6,900 ìg/L in the groundwater sample collected from well MW-5. The highest concentration of 6 ìg/L MTBE by EPA Method 8260 was detected in the depth discrete groundwater sample collected from boring SB-12, at the depth interval of 56 to 60 ft bgs, and in the depth-discrete groundwater sample collected from boring SB-13 at the depth interval of 46 to 48 ft bgs. Details of this investigation are presented in SAIC's February 14, 2005, Results of AdditionalSoil and Groundwater Investigation Report. March 2005 an Aquifer Pumping Test was conducted. Well MW-5 was used for groundwater extraction, and wells MW-2, MW-4 and MW-7 were used as observation wells. Based on the pumping test data, transmissivity was estimated to range between 0.32 square feet per minute (sfpm) and 1.10 sfpm. Based on a saturated thickness of 54 ft, hydraulic conductivity was estimated to range between 5.5 feet per day (ft/day) to 19.1 ft/day. Storativity and specific yield were estimated to be 0.02 and 0.3, respectively. The radius of influence was estimated to be in the range of 77 ft to 163 ft. The constant-rate pumping test time-series data demonstrated the characteristics of a heterogeneous, unconfined aquifer. Storativity and specific yield estimates further characterized the aquifer as unconfined. March 2006 Bench Scale Treatability Study: In March 2006, a bench scale test was performed at the request of the DEH to evaluate several methods of applying Fenton's reagent to soil and groundwater at the site. The results of the bench scale testing are presented in Environmental Bio-Systems, Inc.'s Fenton's Reagent Bench Test Report dated April 16, 2006, which is attached to SAIC's April 28, 2006 Results of Bench Scale Treatability Study. September 2006 Well Installation: In September 2006, SAIC oversaw the installation of onsite groundwater monitoring well, designated MW-8. The well boring for well MW-8 was drilled to a total depth of 30 ft bgs. Soil samples were collected continuously for lithologic logging and samples were preserved at approximate 5-ft depth intervals to the total depth, for possible chemical analysis. The boring for well MW-8 was converted to a groundwater monitoring well by the installation of a 2-inch diameter Schedule 40 polyvinyl chloride (PVC) well casing with a screened interval placed between the depths of 10 ft and 30 ft bgs. Selected soil samples collected from well boring MW-8 detected concentrations up to 170 mg/kg TPHd, 2,100 mg/kg TPHg, 14 mg/kg benzene, 160 mg/kg toluene, 58 mg/kg ethylbenzene, and 260 mg/kg total xylenes from the sample collected at 25 ft bgs. Soil samples were not analyzed for the presence of MTBE. The analyzed grab groundwater sample collected from well boring MW-8 detected concentrations up to 990 ìg/L TPHd, 26,000 ìg/L TPHg, 2,200 ìg/L benzene, 5,100 ìg/L toluene, 790 ìg/L ethylbenzene, and 3,100 ìg/L total xylenes. MTBE was not detected at or above laboratory reporting limits. June 2007 Remedial Well Installation: In June 2007, SAIC oversaw the installation of 7 AS wells, designated AS-1 through AS-7. The borings for wells AS-1 through AS-3 were drilled to a total depth of 24 ft bgs; borings for wells AS-4, AS-6 and AS-7 were drilled to a total depth of 25 ft bgs; and the boring for well AS-5 was drilled to a total depth of 28 ft bgs. All drilling was performed using 8-inch diameter hollow-stem augers. The borings were converted to AS wells by the installation of 1-inch diameter Schedule 40 PVC well casing with 0.020 inch slot size. AS well construction details are included in the boring logs. Selected soil samples were analyzed for the presence of TPHd, TPHg, benzene, toluene, ethylbenzene, and total xylenes (BTEX) and MTBE. Concentrations of TPHd were detected up to 1,300 mg/kg from the sample collected at 25 ft bgs at well boring AS-4. Concentrations of TPHg were detected up to 13,000 mg/kg from the sample collected at 24.5 ft bgs at well boring AS-7. Benzene was detected in concentrations up to 160 mg/kg from the sample collected at 25 ft bgs at well boring AS-6. Toluene, ethylbenzene and total xylenes were detected at concentrations up to 1,400, 310 and 1,400 mg/kg, respectively, from the sample collected at 24.5 ft bgs at well boring AS-7. In June 2007, SAIC also oversaw the conversion of 2 groundwater monitoring wells, MW-7 and MW-8, into SVE wells MW-7 and MW-8. The 2 wells were over-drilled to a total depth of 30 ft bgs using 10-inch diameter augers. The borings were converted to SVE wells by the installation of 4-inch diameter Schedule 40 PVC well casing with 0.020 inch slot size. The screened interval for wells MW-7 and MW-8 is 7 ft to 30 ft bgs. Soil samples were not collected during the conversion of groundwater monitoring wells MW-7 and MW-8 into SVE wells. January 2008, SVE and AS remediation system began operations at the site and continued through May 19, 2008. A new SVE blower was installed and began operation in September 2008 and continued through November 11, 2008. Approximately 120.3 pounds of TPHg, 1.70 pounds of benzene, and 2.06 pounds of MtBE were removed by this remediation system.

REASONS FOR QUARTERLY OR MONTHLY OR OTHER GROUNDWATER MONITORING:
Well Being Sampled for Post-Remedial Action Verification Monitoring - evaluate for closure following 4th quarter 2009
Designated Beneficial Use Desc: Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply
Site History:

November 2003 Investigation: Previous site assessment activities included the drilling and sampling of eight onsite exploratory borings, designated SB-1 through SB-8, by AEI in November 2003. Findings of the investigation indicated that petroleum hydrocarbons were present in soil and groundwater beneath the site. Total petroleum hydrocarbons (TPH) as gasoline (TPHg), TPH as motor oil (TPHmo), and benzene were detected in groundwater samples at concentrations of up to 4,200 micrograms per liter (□g/L), 2,300 □g/L, and 1,400 □g/L, respectively. Methyl-tert butyl ether (MTBE) was not detected in any of the soil or groundwater samples collected from borings SB-1 through SB-8. During the investigation, groundwater was encountered at depths of approximately 16 ft below ground surface (bgs). Details of this investigation are presented in an AEI December 8, 2003 report entitled Phase II Subsurface Investigation.

September 2004 Investigation: In September 2004, SAIC installed four onsite monitoring wells, designated MW-1 through MW-4, and drilled three onsite exploratory borings, designated SB-9 through SB-11. SAIC also supervised a geophysical investigation at the site to confirm the removal of the USTs, and conducted a file review of eight nearby active and closed UST sites utilizing the online Santa Clara Valley Water District (SCVWD) Groundwater Cleanup Program Database, to determine if the petroleum hydrocarbons beneath the site may be from an offsite source or sources. Findings of the investigation indicated that the USTs were

removed from the site, and that the TPHg present in soil and groundwater beneath the site were likely due to historical releases from the USTs and product dispenser island piping during the time the service station was in operation. SAIC identified a Coast Oil bulk plant at 2075 Alum Rock Avenue, located approximately 700 ft northwest of the subject site, as a possible offsite source for petroleum hydrocarbon contamination.

During the investigation, groundwater was encountered at a depth of approximately 15 ft bgs, and was calculated to flow toward the north at an approximate hydraulic gradient of 0.001. The highest concentrations of 470,000 □g/L TPHg, 22,000 □g/L TPHmo and 13,000 □g/L benzene were detected in a groundwater sample collected from boring SB-10. MTBE (by Environmental Protection Agency [EPA] Method 8260) was not detected in any of the soil and groundwater samples collected from the borings for MW-1 through MW-4 and SB-9 through SB-11. The origin of TPHmo beneath the site was determined to be unclear, since TPHmo was not detected at or above the laboratory detection limits in the soil and groundwater samples collected from well MW-1, located adjacent to the former waste oil UST.

Based on the results of the investigation, the lateral extent of the dissolved-phase petroleum hydrocarbon plume appeared to be adequately delineated, however, additional onsite assessment to further assess the vertical extent of the plume was warranted. SAIC recommended additional onsite investigations to further assess the vertical extent of the plume in the northern and eastern portion of the site. SAIC also recommended the installation of a 4-inch diameter monitoring well in the area of boring SB-10, in order to evaluate water quality trends in the area of the former product dispenser islands. Finally, SAIC recommended the installation of a monitoring well up-gradient of the former UST complex to evaluate the lateral extent of the plume in the southern portion of the site. Details of the above investigations are presented in an SAIC October 27, 2004 report entitled Soil and Groundwater Investigation Report.

2005 Soil and Groundwater Investigation: From December 28 through 30, 2004, and January 3, 2005, two exploratory soil borings, SB-12 and SB-13, and three groundwater monitoring wells, MW-5, MW-6 and MW-7, were installed onsite. Boring SB-12 was drilled to a total depth of 60 ft bgs. Boring SB-13 was drilled to a total depth of 65 ft bgs. Borings for wells MW-6 and MW-7 were each drilled to a total depth of 30 ft bgs. The well boring for well MW-5 was drilled to total depth of 35 ft bgs. The borings were installed to obtain vertical delineation of the dissolved-phase petroleum hydrocarbon plume in the northern and eastern portions of the
site, and to confirm that the plume had not migrated towards the municipal water supply wells located approximately 500 ft to the east-southeast. The monitoring wells were installed to assess groundwater quality in the area of the former dispenser islands and up-gradient from the UST complex.

The highest concentrations of 190 milligrams per kilogram (mg/kg) TPHg, 8.3 mg/kg toluene, 5.7 mg/kg ethylbenzene, and 18 mg/kg total xylenes were detected in the soil sample collected from well boring MW-5 at a depth of 20 ft bgs. The highest concentration of 4.6 mg/kg benzene was detected in the soil sample collected from well boring MW-5 at a depth of 25 ft bgs. Detectable concentrations of total recoverable petroleum hydrocarbons (TRPH) ranged from 23.4 mg/kg in the soil sample collected from boring SB-12 at a depth of 20 ft bgs, to 51.4 mg/kg in the soil sample collected from well boring MW-5 at 25 ft bgs. TPHd and MTBE were not
detected at or above laboratory detection limits in any of the soil samples analyzed.

The highest concentrations of 160,000 □g/L TPHg, 4,800 □g/L TPHd, 22,000 □g/L benzene, and 4,000 □g/L ethylbenzene were detected in the groundwater sample collected from well MW-7. The highest concentration of 28,000 □g/L toluene was detected in the groundwater sample collected from well MW-5. The highest concentration of 13,000 □g/L total xylenes was detected in the groundwater samples collected from wells MW-5 and MW-7. Detectable concentrations of TRPH ranged from 430 □g/L in the groundwater sample collected from boring SB-13 at firstencountered groundwater, to 6,900 □g/L in the groundwater sample collected from well MW-5. The highest concentration of 6 □g/L MTBE by EPA Method 8260 was detected in the depth discrete groundwater sample collected from boring SB-12, at the depth interval of 56 to 60 ft bgs, and in the depth-discrete groundwater sample collected from boring SB-13 at the depth interval of 46 to 48 ft bgs. Details of this investigation are presented in SAIC's February 14, 2005, Results of AdditionalSoil and Groundwater Investigation Report.

March 2005 an Aquifer Pumping Test was conducted. Well MW-5 was used for groundwater extraction, and wells MW-2, MW-4 and MW-7 were used as observation wells. Based on the pumping test data, transmissivity was estimated to range between 0.32 square feet per minute (sfpm) and 1.10 sfpm. Based on a saturated thickness of 54 ft, hydraulic conductivity was estimated to range between 5.5 feet per day (ft/day) to 19.1 ft/day. Storativity and specific yield were estimated to be 0.02 and 0.3, respectively. The radius of influence was estimated to be in the range of 77 ft to 163 ft. The constant-rate pumping test time-series data demonstrated the characteristics of a heterogeneous, unconfined aquifer. Storativity and specific yield estimates further characterized the aquifer as unconfined.

March 2006 Bench Scale Treatability Study: In March 2006, a bench scale test was performed at the request of the DEH to evaluate several methods of applying Fenton's reagent to soil and groundwater at the site. The results of the bench scale testing are presented in Environmental Bio-Systems, Inc.'s Fenton's Reagent Bench Test Report dated April 16, 2006, which is attached to SAIC's April 28, 2006 Results of Bench Scale Treatability Study.

September 2006 Well Installation: In September 2006, SAIC oversaw the installation of onsite groundwater monitoring well, designated MW-8. The well boring for well MW-8 was drilled to a total depth of 30 ft bgs. Soil samples were collected continuously for lithologic logging and samples were preserved at approximate 5-ft depth intervals to the total depth, for possible chemical analysis. The boring for well MW-8 was converted to a groundwater monitoring well by the installation of a 2-inch diameter Schedule 40 polyvinyl chloride (PVC) well casing with a screened interval placed between the depths of 10 ft and 30 ft bgs. Selected soil samples collected from well boring MW-8 detected concentrations up to 170 mg/kg TPHd, 2,100 mg/kg TPHg, 14 mg/kg benzene, 160 mg/kg toluene, 58 mg/kg ethylbenzene, and 260 mg/kg total xylenes from the sample collected at 25 ft bgs. Soil samples were not analyzed for the presence of MTBE. The analyzed grab groundwater sample collected from well boring MW-8 detected concentrations up to 990 □g/L TPHd, 26,000 □g/L TPHg, 2,200 □g/L benzene, 5,100 □g/L toluene, 790 □g/L ethylbenzene, and 3,100 □g/L total xylenes. MTBE was not detected at or above laboratory reporting limits.

June 2007 Remedial Well Installation: In June 2007, SAIC oversaw the installation of 7 AS wells, designated AS-1 through AS-7. The borings for wells AS-1 through AS-3 were drilled to a total depth of 24 ft bgs; borings for wells AS-4, AS-6 and AS-7 were drilled to a total depth of 25 ft bgs; and the boring for well AS-5 was drilled to a total depth of 28 ft bgs. All drilling was performed using 8-inch diameter hollow-stem augers. The borings were converted to AS wells by the installation of 1-inch diameter Schedule 40 PVC well casing with 0.020 inch slot size. AS well construction details are included in the boring logs. Selected soil samples were analyzed for the presence of TPHd, TPHg, benzene, toluene, ethylbenzene, and total xylenes (BTEX) and MTBE. Concentrations of TPHd were detected up to 1,300 mg/kg from the sample collected at 25 ft bgs at well boring AS-4. Concentrations

of TPHg were detected up to 13,000 mg/kg from the sample collected at 24.5 ft bgs at well boring AS-7. Benzene was detected in concentrations up to 160 mg/kg from the sample collected at 25 ft bgs at well boring AS-6. Toluene, ethylbenzene and total xylenes were detected at concentrations up to 1,400, 310 and 1,400 mg/kg, respectively, from the sample collected at 24.5 ft bgs at well boring AS-7.

In June 2007, SAIC also oversaw the conversion of 2 groundwater monitoring wells, MW-7 and MW-8, into SVE wells MW-7 and MW-8. The 2 wells were over-drilled to a total depth of 30 ft bgs using 10-inch diameter augers. The borings were converted to SVE wells by the installation of 4-inch diameter Schedule 40 PVC well casing with 0.020 inch slot size. The screened interval for wells MW-7 and MW-8 is 7 ft to 30 ft bgs. Soil samples were not collected during the conversion of groundwater monitoring wells MW-7 and MW-8 into SVE wells.

January 2008, SVE and AS remediation system began operations at the site and continued through May 19, 2008. A new SVE blower was installed and began operation in September 2008 and continued through November 11, 2008. Approximately 120.3 pounds of TPHg, 1.70 pounds of benzene, and 2.06 pounds of MtBE were removed by this remediation system.

Site History:	

1990 Four Underground Storage Tanks (USTs) were removed. It was reported that all of the USTs were corroded and free product was visible in soil and groundwater beneath the UST excavation. The USTs consisted of the following: • One 10,000 gallon UST; • One 8,000 gallon unleaded gasoline UST; • One 6,000 gallon regular gasoline UST; and • One 550 gallon waste oil UST. Numerous on and off-site soil and groundwater investigations have been conducted at the site. 26 groundwater monitoring wells (MW-1 through MW-26 and three extraction wells (COEX-1 through COEX-3).

Site History:

SC Fuels (formerly Coast Oil Company, LLC) owns and operates a petroleum bulk storage facility, which is presently used to store diesel fuel, kerosene, antifreeze, lubricating oil, and motor oil. The site has been a bulk storage/distribution facility for petroleum products since the early 1950's. The facility has more than 50 aboveground storage tanks with a combined capacity of over 900,000 gallons containing diesel fuel, kerosene, bulk oil, and petroleum solvents. During the operational history of this facility, a number of releases have occurred. However, many releases have not been fully documented. The Discharger has conducted investigations of soil and groundwater contamination since 1990 and interim remedial measures were implemented in 1993. An estimated 1,200 to 1,600 gallons of free product have been recovered and over 16.7 million gallons of water have been treated. Soil vapor extraction (SVE) was implemented in January 1995 in the on-site source area to reduce hydrocarbon concentrations in soil and prevent further leaching of hydrocarbons to groundwater. The SVE system was turned off in September 2002 because the influent concentrations of hydrocarbons had been steadily approaching zero. The SVE system has recovered over 110,000 pounds of hydrocarbons.

Action Type: FREE PRODUCT REMOVAL
Begin Date: 9/15/2002
End Date: 7/31/2003
Phase:
Contaminant Mass Removed:
Description: Free product recovery system operated.

Action Type: PUMP & TREAT (P&T) GROUNDWATER
Begin Date: 5/27/1993
End Date: 9/15/2003
Phase: Water
Contaminant Mass Removed:
Description:

Action Type: FREE PRODUCT REMOVAL
Begin Date: 1/19/2004
End Date: 12/8/2004
Phase:
Contaminant Mass Removed: 1,400 Gallons
Description: Free product recovery system restarted. 1,200 to 1,600 gallons of free product estimated to have been removed.

Action Type: SOIL VAPOR EXTRACTION (SVE)
Begin Date: 1/1/1995
End Date: 9/1/2002
Phase: Soil
Contaminant Mass Removed: 110,000 Pounds
Description: 110000 pounds of hydrocarbons recovered.

Limited Site Investigation Workplan

Action Type: Other Regulatory Actions
Action: Site Visit / Inspection / Sampling
Action Date: 12/6/2017
Received Issue Date: 12/6/2017
Doc Link:
Title Description Comments:

Site Inspection and Meeting - Meeting with owner representatives and consultants to discuss steps toward site closure. We observed the former aboveground tank areas. Staff noted soil stains on the surface versus where soil samples were taken for tank removal action. Staff also noted the proximity of adjacent property, now a mental health facility. Since this is a sensitive use for risk assessment purposes, it would warrant determining whether a soil vapor issue is present. The consultant will put together a work plan to address these issues.

Annual Estimate for SCP Cost Recovery Oversight

Action Type: Other Regulatory Actions
Action: Site Visit / Inspection / Sampling
Action Date: 3/1/2017
Received Issue Date: 3/1/2017
Doc Link:
Title Description Comments:

Site Inspection - Staff discussed and observed site conditions since 54 aboveground tanks have been removed. Observed few locations with stains on the surface in former tank areas. Also noted flag markers where the local enforcement agency (San Jose Fire Department) intends to sample soil. The proposed soil sample locations appear to be on a coarse grid and do not coincide the former tank footprints or surface stains. Furthermore, the former tank containment areas appear to have been graded with a layer of gravel leveled across the areas. This masks the former tank footprints as well as any evidence where spot leaks may have occurred. San Jose Fire Department will copy staff on their sampling results and we will make recommendations for any additional sampling or corrective actions at that time.

Military DoD Site: No
No Further Action Dt: 2014-08-25 00:00:00
Qty Rlsd Gallons: 0
Facility Project Sub Type:
Calenviroscreen 3 Score: 71-75%
Calenviroscreen 4 Score: 70-75%
Site History:

October 1995: Product dispensers and underground product piping were replaced by Unocal Corporation. September 1997: Soil gas samples contained maximum concentrations of 12,000 parts per billion by volume (ppbv) total purgeable petroleum hydrocarbons (TPPH), 130 ppbv benzene, and 1,700 ppbv methyl tertiary butyl ether (MTBE). Soil and groundwater investigations were conducted between December 1998 and September 2013. Highway 680 is located downgradient of the site and is topographically lower than the site. There is a Cal Trans dewatering system at this intersection that pumps

approximately 50,000 gallons of water during the dry months and discharges to a nearby surface water. Testing Cal Trans is required to do on their discharge and silt that accumulates in the system have not been reported to be contaminated with site contaminants. Remediation conducted at the site includes soil vapor extraction with air sparging and the application of Plume Stop. Case closure granted under the LTCP.

Qty Rlsd Gallons:	
Facility Project Sub Type:	
Calenviroscreen 3 Score:	71-75%
Calenviroscreen 4 Score:	70-75%
Site History:	

The site is currently a vacant lot with no structure. The current zoning for this site is MS-G Main Street Ground-Floor Commercial District. Previous redevelopment plans included mixed-use with residential and a school; however, development plans have since changed and now include mixed-use with residential and commercial. Redevelopment entitlements are pending. Farmers Supply Store first occupied the property circa 1960, and a 500 gallon UST was in operation prior to 1975. The UST was reported to have been removed without a permit in May 1984. A soil and groundwater sampling investigation in 2006 found that a subsurface release of gasoline had occurred. Investigative work at the site has included soil, groundwater, and soil vapor investigations. Silver Creek is less than 250 feet from the source area, but historical groundwater sampling demonstrates the plume did not extend to the creek. Multiple remedial efforts have occurred. Limited excavation of approximately 20 cubic yards of contaminated soil was completed in 2016, a dual-phase extraction test at the site in 2017 that removed approximately 1,200 lbs. of contamination, and in situ chemical oxidation (ISCO) from 2018 to 2019. It was determined that site conditions satisfied all low threat case closure policy criteria, and the case is now closed.

Fourth Quarter 2010, Quarterly Groundwater Monitoring Report - Report Not Submitted. See email below: ..... Hi Gerald: The fourth quarter 2010 groundwater monitoring event and report were not completed for the case due to following reasons: 1) the Responsible party (RP) did not have adequate funding, and 2) the available funding during 4Q-2010 was spent instead on a two-phase extraction test on well MW-3 completed on October 25, 2010. Please contact me if you have any questions or comments. Thank you. Bill Dugan Project Geologist Tel. (408) 287-2175 Fax (408) 287-2176 E-Mail: dugan@welltest.biz Mail: P.O. Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: May 25, 2023

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the SEMS GIS/REST file layer obtained from EPA's Facility Registry Service.

Government Publication Date: Jan 25, 2023

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jan 25, 2023

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 24, 2023

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by RCRA.

Government Publication Date: Apr 24, 2023

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 24, 2023

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 24, 2023

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 24, 2023

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 24, 2023

Federal Engineering Controls-ECs: FED ENG

This list of Engineering controls (ECs) is provided by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Federal Institutional Controls- ICs: FED INST

This list of Institutional controls (ICs) is provided by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents issued in fiscal years 1982-2021 for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Apr 26, 2023

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: May 25, 2023

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jan 16, 2023

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Sep 13, 2022

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Aug 8, 2022

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Aug 8, 2022

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Aug 30, 2022

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jun 29, 2022

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 25, 2023

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Mar 23, 2023

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 1, 2023

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jun 1, 2023

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jun 1, 2023

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: May 9, 2023

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jun 1, 2023

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 10, 2023

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 10, 2023

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 17, 2023

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Feb 27, 2023

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Feb 27, 2023

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jun 13, 2023

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jan 17, 2023

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Jun 13, 2023

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Apr 12, 2023

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: May 15, 2023

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Apr 12, 2023

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jun 1, 2023

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Feb 27, 2023

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jun 1, 2023

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Feb 27, 2023

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.
Government Publication Date: Feb 27, 2023

Delisted County Records: DELISTED COUNTY
Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.
Government Publication Date: Jul 11, 2023

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 19, 2023

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 26, 2023

County

Santa Clara County - Historic Solvent Case Listing: HSOL SANTACLARA
The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.
Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing: LOP SANTACLARA
A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.
Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks: UST SANTACLARA
List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.
Government Publication Date: Apr 27, 2023

Santa Clara County - CUPA Facilities List: CUPA SANTACLARA
A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.
Government Publication Date: Mar 13, 2021

Santa Clara County - City of San Jose Hazardous Material Facilities: HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Oct 15, 2020

Santa Clara County - Gilroy City CUPA Facilities List: CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jun 3, 2022

Santa Clara County - Sunnyvale City CUPA List: CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jun 10, 2022

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Aug 18, 2022

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Oct 19, 2022

PFOA/PFOS Contaminated Sites: PFAS NPL

List of National Priorities List (NPL) and related Superfund Alternative Agreement (SAA) sites where PFOA or PFOS contaminants have been found in water and/or soil. The site listing is provided by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 28, 2023

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from March 2022 to April 2023. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 24, 2023

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents, and this is cited in the tracker. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map, credited to the Northeastern University's PFAS Project Lab, Silent Spring Institute, and the PFAS-REACH team. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Oct 9, 2022

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the "Material Involved" or "Incident Description" fields. Limitations: The data from the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Apr 15, 2023

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Feb 19, 2023

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Oct 19, 2022

Perfluorinated Alkyl Substances (PFAS) Water Quality: PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Apr 9, 2023

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Apr 16, 2023

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Feb 8, 2023

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jan 25, 2023

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The U.S. Environmental Protection Agency's Enforcement and Compliance History Online system incorporates data from the Integrated Compliance Information System - National Pollutant Discharge Elimination System (ICIS-NPDES). ICIS-NPDES is an information management system maintained by the Office of Compliance to track permit compliance and enforcement status of facilities regulated by the NPDES under the Clean Water Act. This data includes permit, inspection, violation and enforcement action information for applicable ICIS records.

Government Publication Date: Oct 15, 2022

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Apr 15, 2023

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Apr 15, 2023

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset.

Government Publication Date: Jul 12, 2022

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: Jul 12, 2022

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Mar 31, 2021

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United State Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Nov 7, 2022

Surface Mining Control and Reclamation Act Sites: SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Aug 18, 2022

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 1, 2022

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Mar 23, 2023

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS) since 2010. CMS may not reflect the latest developments in a case nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Apr 19, 2023

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2023

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 3, 2022

State

PFAS Sampling Locations: PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Mar 14, 2023

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites: PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Feb 27, 2023

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Apr 30, 2023

PFAS Investigations: PFAS INVEST

This list of potential Per- and Polyfluoroalkyl Substance (PFAS) sites is compiled from the California State Water Resources Control Board's (SWRCB) PFAS Investigations Map tool. The SWRCB issued investigative orders, per California Water Code (CWC) Section 13267 and/or 13383, to these sites. This does not mean that PFAS has been produced, used, or discharged at these sites. Orders were also issued to the public water systems to sample wells in the vicinity of these locations. The data includes locations for airports, landfills, suspected chrome plating facilities, publicly owned treatment works (aka wastewater treatment plants), bulk fuel terminals, refineries, and military facilities that have potential sources of PFAS.

Government Publication Date: Nov 28, 2022

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Mar 16, 2023

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jun 1, 2023

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Nov 18, 2022

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Jun 27, 2023

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jun 2, 2023

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Apr 19, 2023

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Apr 12, 2023

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Feb 27, 2023

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Jun 16, 2023

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Jun 7, 2023

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Feb 27, 2023

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2020

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

PSR
PHYSICAL SETTING REPORT

Property Information

Order Number:		23071900183p
Date Completed:		July 20, 2023
Project Number:		23-414421.1
Project Property:		Renaissance Academy at Mathson 2050 Kammerer Avenue & 600 Sinclair Drive SAN JOSE CA 95116
Coordinates:		
	Latitude:	37.3500801
	Longitude:	-121.8413351
	UTM Northing:	4134407.62465 Meters
	UTM Easting:	602637.398301 Meters
	UTM Zone:	UTM Zone 10S
	Elevation:	105.72 ft
	Slope Direction:	W

Radon Information....503
Appendix....504
Liability Notice....506

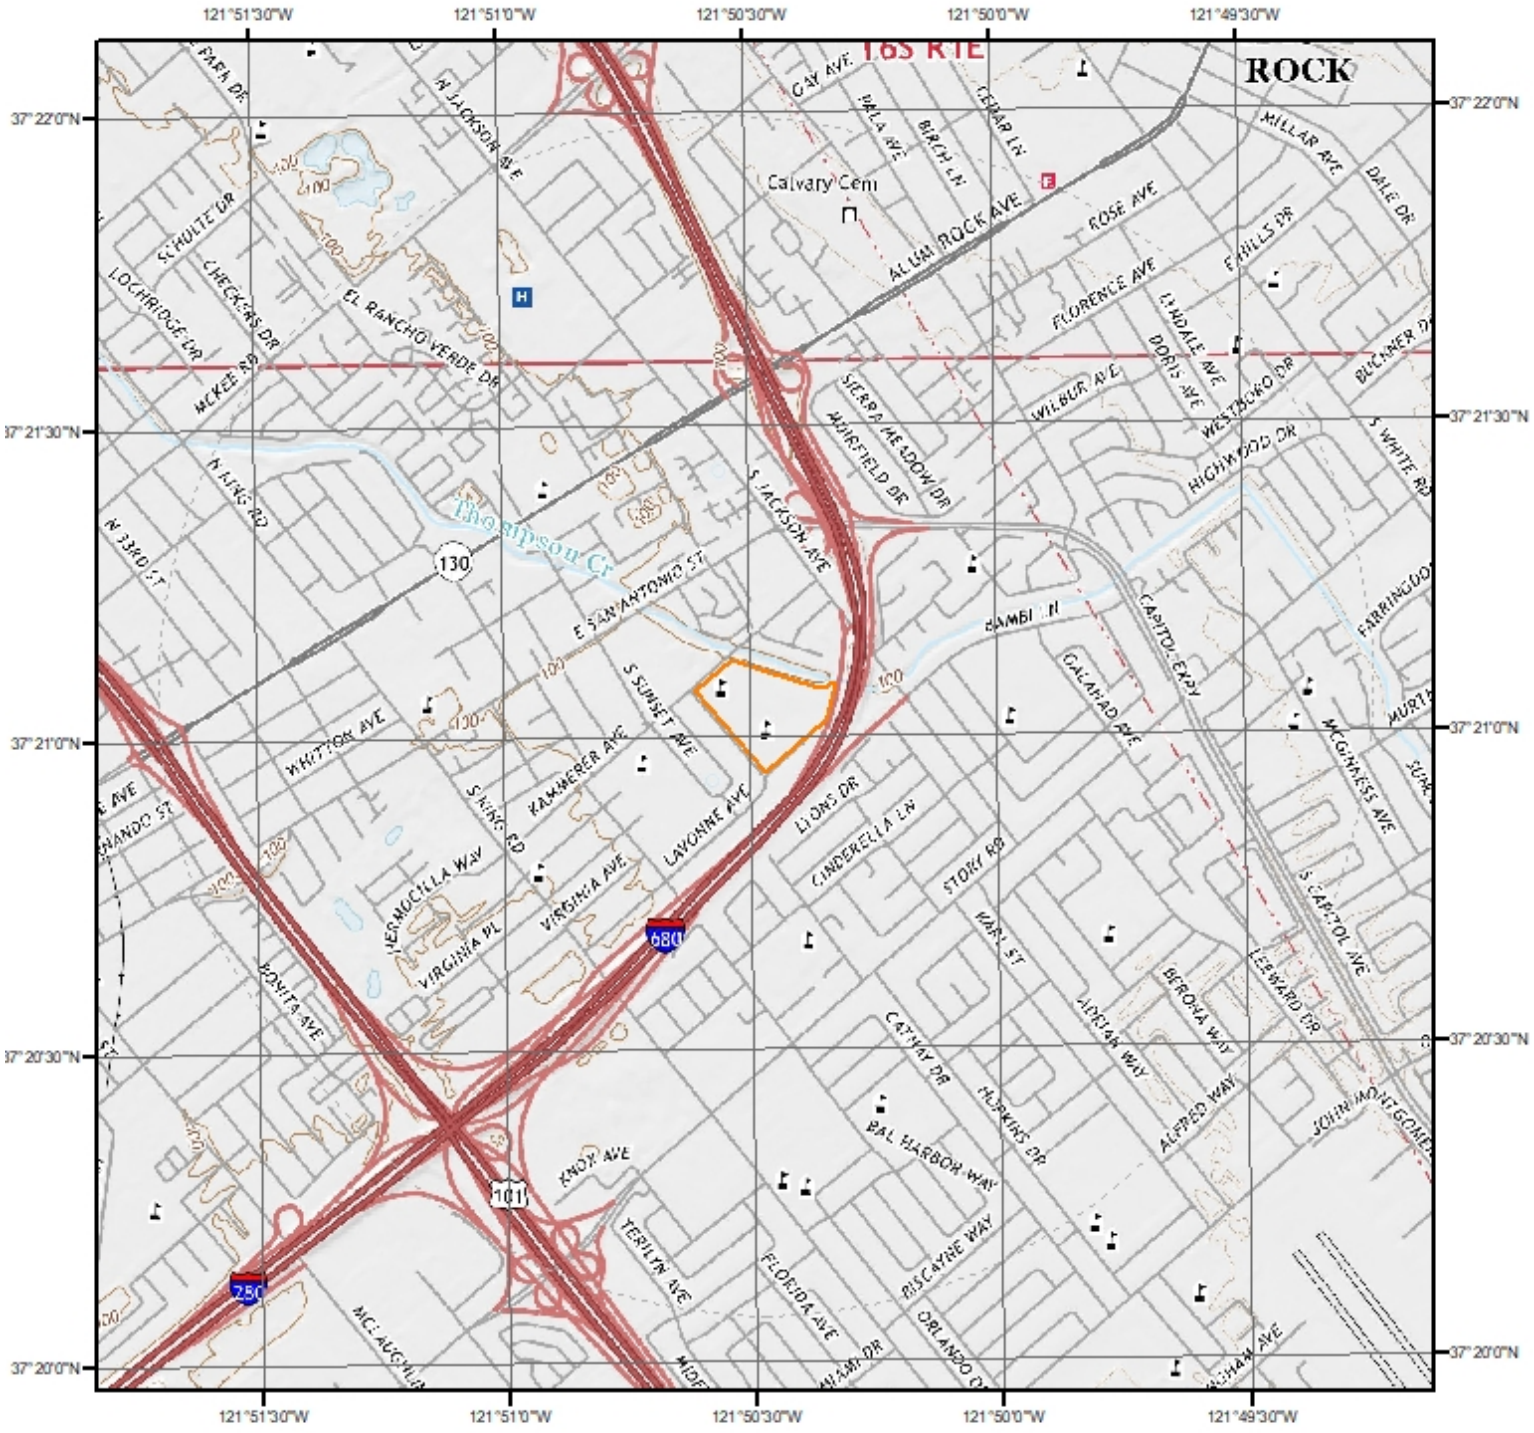

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo (2021)

Quadrangle(s): San Jose East, CA

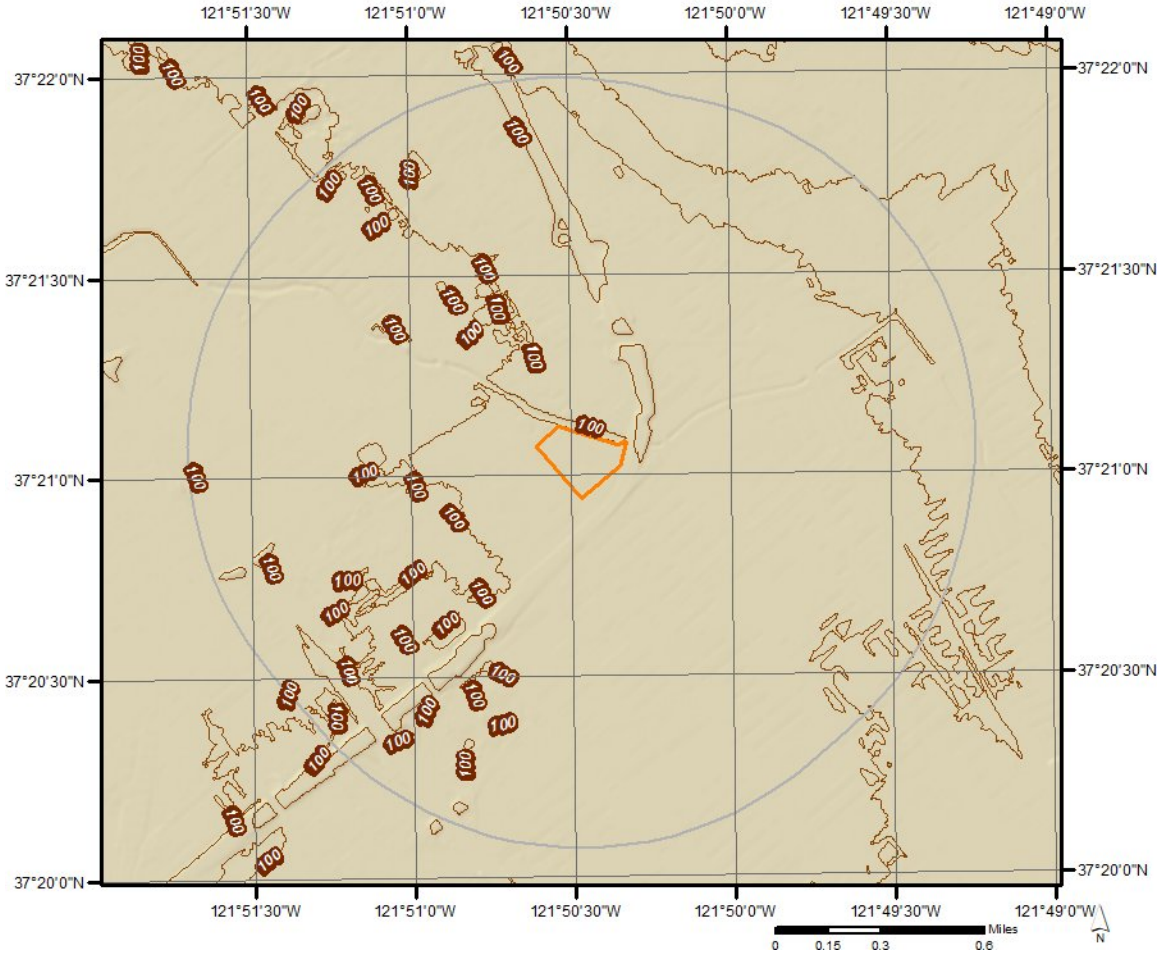

Source: USGS 7.5 Minute Topographic Map

Topographic Information

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

Elevation:	105.72 ft
Slope Direction:	W

Hydrologic Information

Wetland

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 130 (16.38%)

Map Unit Name:	Urban land-Still complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Still(25%)

horizon A1(0cm to 4cm)	Sandy loam
horizon A2(4cm to 30cm)	Very fine sandy loam
horizon Bw1(30cm to 50cm)	Silt loam
horizon Bw2(50cm to 83cm)	Silt loam
horizon 2Ab1(83cm to 95cm)	Loam
horizon 2Ab2(95cm to 130cm)	Loam
horizon 2Bwb1(130cm to 158cm)	Loam
horizon 2Bwb2(158cm to 182cm)	Loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 130 - Urban land-Still complex, 0 to 2 percent slopes

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Still (25%)
The Still component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains, flood plains. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Elpaloalto (5%)
Generated brief soil descriptions are created for major components. The Elpaloalto soil is a minor component.

Map Unit 131 (11.66%)

Map Unit Name:	Urban land-Elpaloalto complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Elpaloalto(23%)

horizon Oi(0cm to 21cm)	Slightly decomposed plant material
horizon A(21cm to 42cm)	Clay loam
horizon Bw1(42cm to 65cm)	Silty clay loam

horizon Bw2(65cm to 90cm)	Silty clay loam
horizon Bw3(90cm to 120cm)	Silty clay loam
horizon Bw4(120cm to 181cm)	Silty clay loam
horizon C(181cm to 240cm)	Silty clay loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 131 - Urban land-Elpaloalto complex, 0 to 2 percent slopes

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Elpaloalto (23%)
The Elpaloalto component makes up 23 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial plains, alluvial fans. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is very high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 75 percent. Below this thin organic horizon the organic matter content is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface.

Component: Still (5%)
Generated brief soil descriptions are created for major components. The Still soil is a minor component.

Component: Hangerone (2%)
Generated brief soil descriptions are created for major components. The Hangerone soil is a minor component.

Map Unit 160 (16.57%)

Map Unit Name:	Urbanland-Clear Lake complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Clear Lake(25%)

horizon Ap1(0cm to 23cm)	Silty clay
horizon Ap2(23cm to 36cm)	Silty clay
horizon Bw(36cm to 82cm)	Silty clay
horizon Bss(82cm to 127cm)	Silty clay
horizon C(127cm to 167cm)	Silty clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 160 - Urbanland-Clear Lake complex, 0 to 2 percent slopes

Component: Urban land (65%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Clear Lake (25%)
The Clear Lake component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on basin floors, basins. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is very high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land

capability classification is 2s. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 2 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Hangerone (5%)
Generated brief soil descriptions are created for major components. The Hangerone soil is a minor component.

Component: Campbell (5%)
Generated brief soil descriptions are created for major components. The Campbell soil is a minor component.

Map Unit 180 (47.59%)

Map Unit Name:	Urbanland-Newpark complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Newpark(20%)

horizon Ap(0cm to 20cm)	Silty clay loam
horizon A1(20cm to 45cm)	Silty clay loam
horizon A2(45cm to 68cm)	Silty clay loam
horizon Ck1(68cm to 91cm)	Silty clay loam
horizon Ck2(91cm to 132cm)	Silty clay loam
horizon C1(132cm to 160cm)	Fine sandy loam
horizon C2(160cm to 200cm)	Fine sandy loam

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 180 - Urbanland-Newpark complex, 0 to 2 percent slopes

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Newpark (20%)
The Newpark component makes up 20 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is moderate. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 1 This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 5 percent. There are no saline horizons within 30 inches of the soil surface.

Component: Still (5%)
Generated brief soil descriptions are created for major components. The Still soil is a minor component.

Component: Elpaloalto (5%)
Generated brief soil descriptions are created for major components. The Elpaloalto soil is a minor component.

Map Unit 317 (7.79%)

Map Unit Name:	Urbanland-Cropley complex, 0 to 2 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Soil Information

Major components are printed below

Cropley(25%)

horizon A1(0cm to 9cm)	Clay
horizon A2(9cm to 28cm)	Clay
horizon Bss1(28cm to 61cm)	Clay
horizon Bss2(61cm to 84cm)	Clay
horizon Bss3(84cm to 130cm)	Clay
horizon BCk1(130cm to 146cm)	Sandy clay loam
horizon BCk2(146cm to 160cm)	Sandy clay loam

Component Description:

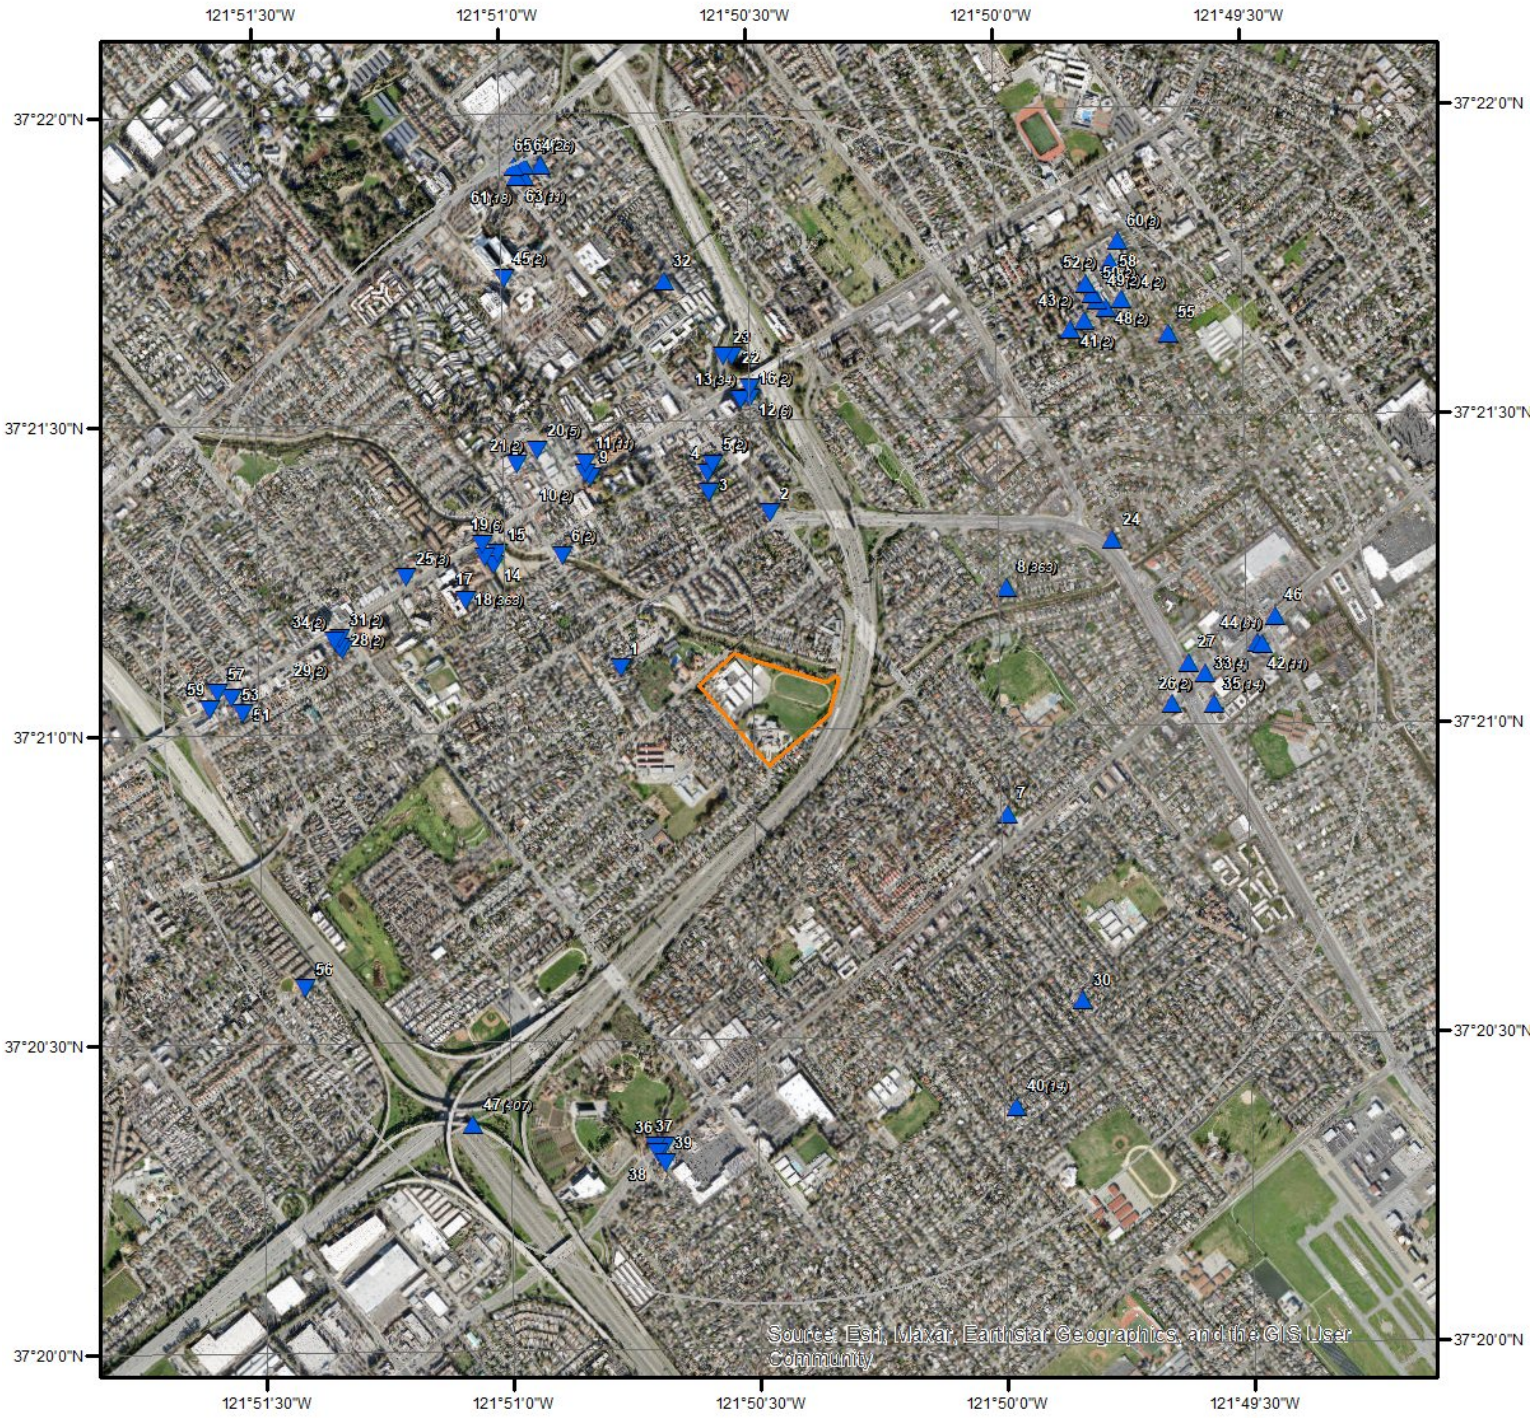

Minor map unit components are excluded from this report.

Map Unit: 317 - Urbanland-Cropley complex, 0 to 2 percent slopes

Component: Urban land (75%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Cropley (25%)
The Cropley component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on alluvial fans, alluvial plains. The parent material consists of alluvium derived from calcareous shale. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is well drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is high. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 2s. This soil does not meet hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 10 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Wells and Additional Sources Detail Report

Resources - Well Completion Reports

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *SANTA CLARA* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *SANTA CLARA* County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

Wells from NWIS — **FED USGS**

The U.S. Geological Survey's National Water Information System (NWIS) is the nation's principal repository of water resources data. The NWIS includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIW dataset contains select Site Types from the overall NWIS Sites data, limited to the following Group Site Types only: Groundwater Group Site Types: Well, Collector or Ranney type well, Hyporheic-zone well, Interconnected Wells, Multiple wells; Spring Group Site Type: Spring; and Other Group Site Types: Aggregate groundwater use, Cistern.

State Sources

Oil and Gas Wells — **OGW**

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of Oil, Gas and Geothermal Resources.

Appendix

Periodic Groundwater Level Measurement Locations **MONITOR WELLS**

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

Well Completion Reports **WATER WELLS**

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX D: QUALIFICATIONS

PARTNER

Erin Basel
Project Manager

Education

BS, Natural Sciences, University of CA Davis, Davis, CA

Training

Groundwater Pollution and Hydrology, Princeton Groundwater, Inc.

Highlights

11 years of experience with Phase I Environmental Site Assessments (ESAs)
8 years of experience with ESA Peer Reviews
8 years of experience with Transaction Screen Assessments
8 years of experience with Environmental Desktop Reports
3 years of experience site remediation

Experience Summary

Ms. Basel currently serves as a Project Manager at Partner Engineering and Science, Inc. (Partner), where her duties primarily include reviewing Phase I Environmental Site Assessments (ESAs) and Transaction Screen Assessments (TSAs) in accordance with ASTM standards, the US Environmental Protection Agency's All Appropriate Inquiries (AAI) rules, and customized client formats, when requested.

Ms. Basel brings over 11 years of experience in environmental consulting, with positions ranging from assessor to management. Ms. Basel has conducted and supervised environmental assessments for multiple private financial institutions and client types, on a large variety of properties including multi-family residential complexes, hospitality sites, golf courses, commercial office buildings, shopping centers, multi-tenant commercial complexes, industrial warehouses, manufacturing facilities, dry cleaning plants, gasoline service stations, automotive repair and body shops, medical facilities, funeral homes, food processing facilities and wineries, quarries, timberland/sawmills, and agricultural properties. This work has included peer review of large portfolios of due diligence reports to ensure compliance with the clients' specific scopes of work.

Ms. Basel's work experience began with monitoring the remediation and closure of cleanup sites, with work increasingly focusing on property due diligence over time. She was honored with the 2015 Rising Star Award by Commercial Real Estate Women.

Project Experience

FDIC Contract Assessments, Various Locations across the US - Ms. Basel worked as a Senior Level Environmental Professional under contract with the Federal Deposit Insurance Corporation (FDIC). The FDIC contract involved reviewing ESAs and Checklists, completed by other companies, to ensure that the reports were completed in compliance with the FDIC scope of work. Ms. Basel prepared review memos that were then used to facilitate FDIC Receiverships.

Sawmill, Boulder Creek, CA - Ms. Basel conducted a Phase I ESA of a mixed-use 6,000-acre timberland property including residences and an inactive sawmill. She identified both active and abandoned oil wells,

a large abandoned aboveground storage tank, and aboveground piping on the subject property. The potential for releases from these features were identified as recognized environmental conditions (RECs).

Multi-Unit Industrial Portfolio, Sparks, NV - Ms. Basel conducted a Phase I ESA for four multi-unit industrial buildings, for which prior ESAs had been conducted. Public records indicated historical solvent use that was not identified in the prior ESAs. She also confirmed a discrepancy in the prior assessed property boundaries and concluded that railroads and spurs were located on the subject property. The historical use of solvents and the presence of railroad spurs in association with industrial property use were identified as RECs.

Commercial/Residential Building, Sacramento, CA - Ms. Basel conducted a Phase I ESA of a mixed-use commercial/residential building for Fannie Mae agency requirements. She observed three commercial units and a representative sample of 50 residential units, researched property use dating back to 1895, and identified no environmental concerns. No sampling was required as part of the recommendations.

Pipeline Designation Area, San Bernardino and Riverside Counties, CA - Ms. Basel conducted a modified Phase I ESA of a 63-mile linear project that spanned across two California counties. Tasks included a windshield survey and database report review for the entire length of the proposed pipeline project and a file review of select areas of interest. The assessment was combined with other environmental documents that helped the client choose a final pipeline placement.

10-Site Residential Portfolio, NC, GA, and F - Ms. Basel managed a project consisting of Phase I ESAs of 10 multi-family residential complexes. The assessments included radon and asbestos sampling according to the client's specific requirements. Duties included managing and reviewing Phase I ESAs.

10-Site Retail/Former Gasoline Service Station Portfolio, AZ, IN, TX, NC, OK, and IL - Ms. Basel managed a project consisting of Phase I ESAs of 10 retail properties previously developed with gasoline service stations. Duties included managing and reviewing Phase I ESAs.

ebasel@partneresi.com

PARTNER

Joel Redding
Senior Project Manager

Education
B.A. Geography, California State University Fresno

Training
OSHA 24-Hour Health and Safety Training

Highlights
16 years of experience in environmental consulting
Phase I Environmental Site Assessments (ESAs)
Environmental Transaction Screens
Desktop Reviews

Experience Summary
Mr. Redding serves as a Senior Project Manager for Partner Engineering and Science, Inc. (Partner), overseeing and managing all aspects of multi-scope projects including Phase I ESAs in accordance with EPA's All Appropriate Inquiry (AAI), Property Condition Assessments (PCAs), Zoning Reports, and Seismic Assessments.

Mr. Redding has over sixteen years of project experience in the environmental consulting industry. Mr. Redding is familiar with all aspects of Due Diligence Property Assessments and the needs and requirements of a varied number of reporting standards, including ASTM E1527-13, EPA's All Appropriate Inquiry (AAI), The U.S. Small Business Administration (SBA), and customized client formats and scopes. Mr. Redding has performed and supervised over 1,000 ESAs and customized environmental assessments of a variety of properties including multi-family residential, hospitality, commercial office buildings, shopping centers, multi-tenant commercial complexes, industrial warehouses, manufacturing facilities, dry cleaning plants, gasoline service stations, automotive repair and body shops, medical facilities, food processing facilities, and agricultural properties.

Project Experience
Junior College Campus and Historical Military and Medical Hospital, Modesto, CA. Mr. Redding prepared a Phase I ESA on a junior college campus in Modesto, the site of a historical World War II era military hospital and subsequent State-run hospital. Multiple recognized environmental conditions (RECs) were identified related to current and historical uses including vehicle and facilities maintenance, underground and aboveground fueling facilities, domestic wastewater treatment systems and septic systems, and asbestos and lead-based paint issues.

2,500-Acre Agricultural Property, Maricopa, CA. Mr. Redding prepared a Phase I ESA on a large agricultural property within an active oil and gas production area. Multiple RECs were identified related to oil and gas well development, oil and gas production, subsurface oil and gas pipelines, aboveground fuel storage, and agricultural chemical use, storage, and application.

Printed Circuit Board Manufacturing Facility, Redwood City, CA. Mr. Redding prepared a Phase I ESA on a printed circuit board manufacturing facility. Multiple RECs were identified related to electroplating, etching, silk screening, chemical storage, and hazardous waste generation, storage, and treatment operations.

10-Site Residential Portfolio, Central CA. Managed a multi-million dollar acquisition project consisting of Phase ESAs of ten, large-acreage, rural agricultural properties throughout Central California for a residential developer. Duties included managing, performing, and reviewing Phase I ESAs.

25-Site Grocery Chain Portfolio, OR and CA. Managed a multi-million dollar rehabilitation financing project consisting of Phase I ESAs of 25 grocery store properties throughout the State of Oregon and Northern California. Duties included managing, performing, and reviewing Phase I ESAs.

50-Site Mobile Home Park Portfolio, MI, OH, IN, and AL. Managed a multi-million dollar acquisition project consisting of 50 mobile home parks in Michigan, Ohio, Indiana, and Alabama. Duties included managing and reviewing Phase I ESAs.

PARTNER

Cody Taylor
National Client Manager

Education
BA, Environmental Analysis and Criminal Justice, University of California Irvine, Irvine, CA

Training
ASTM Technical and Professional Training
Hazardous Materials Management Certificate Courses, University of California Irvine

Highlights
30 years of experience in Real Estate Due Diligence/Consulting and Site Development Engineering
Prepared over 10,000 Phase I Environmental Site Assessments
Managed over 30,000 Phase I Environmental Site Assessments
Managed over 1,000 Phase II Subsurface Soil/Groundwater and Soil Gas Investigations, Asbestos, Lead, and Radon Screenings
Managed Hundreds of Equity Property Condition Assessments with Specialized Inspections, Seismic Evaluations, ALTA Surveys, Zoning, ADA Surveys and BOMA Surveys
Managed Hundreds of Geotechnical Investigations of Commercial Development Projects, Construction Doc and Cost Reviews, and Construction Progress Monitoring

Experience Summary
Mr. Taylor is a Principal and National Client Manager with extensive experience in commercial real estate due diligence and site development engineering throughout the United States. His responsibilities include full-phase site development and environmental consulting, national client management, multi-scope contract negotiation/execution, portfolio project management, and technical report quality control. Mr. Taylor's regional and national expertise compliments the wide variety of Partner projects and client types including national and local lending institutions, asset management/investment groups, restaurant chain developers, commercial/retail developers, attorneys, and commercial real estate professionals.

Mr. Taylor has 30 years of experience in national commercial real estate due diligence consulting including Phase I Environmental Site Assessments, Phase II Subsurface Soil/Soil Gas Investigations, Equity/Acquisition Property Condition Assessments, Seismic Evaluations, Asbestos, Lead-Paint, and Radon Surveys, ALTA Surveys, Zoning, Geotechnical Investigations, Civil Engineering, MEP Special Inspections, Energy Evaluations, and Construction Monitoring.

Mr. Taylor has assessed/managed over 30,000 commercial real estate transactions throughout his professional career including several multi-million dollar asset portfolios consisting of a 100-site ALTA Survey portfolio of bank sites, a 100-site industrial warehouse property acquisition, a 30-site commercial office property acquisition, a 30-site furniture store acquisition, two 1,200-site cellular tower transactions, a 215-site regional shopping center vacancy evaluation, a 25-site regional grocery-store chain environmental/survey evaluation, a 16-site multi-family apartment building acquisition, and a 5-site Class A multi-specialized-scope building acquisition. These transactions have included some or all of Partner's core engineering due diligence services described above. Mr. Taylor routinely manages national asset/developer clients to evaluate the environmental and deficiency/structural risks associated with commercial/industrial properties prior to acquisition. These risks may be associated with past hazardous materials use (i.e., gasoline stations, dry cleaners) which require historical research combined with

subsurface evaluations to assess for contamination that could devaluate the property or create a human health concern to occupants or construction workers; evaluate for asbestos, lead-based paint, and radon to determine the need for abatement or venting systems; evaluate the structural integrity of the building and assess for seismic retrofit; evaluate the roof, mechanical, electrical, plumbing systems (i.e., elevators, HVAC systems, sewer); evaluate for American Disabilities Act (ADA) deficiencies (i.e., ramps, railings, access); survey the property boundaries (i.e., ALTA Surveys); evaluate the subsurface conditions for construction suitability (i.e., Geotechnical Investigations); Civil Engineering/Design, and energy studies of the site building to meet with current requirements and systems efficiencies.

Project Experience

National Boat/RV Storage Chain - Dozens of storage facility acquisition projects which include Phase I Environmental Site Assessments, Property Condition Assessments, Geotechnical Investigations, ALTA Surveys, and Zoning reports. Mr. Taylor manages the projects with attention to client needs/timelines and fieldwork/production in order to advocate the commercial development projects and maintain report efficiencies and acquisition timelines. These projects require multiple scope management and coordination with clients, technical staff, subcontractors, regulatory agencies, and legal entities. Mr. Taylor's due diligence engineering experience as well as Partner's responsiveness and expertise in national commercial real estate development engineering create successful developments and client satisfaction on an ongoing basis.

National Industrial Warehouse/Logistics-Distribution Acquisition - Hundreds of ongoing industrial warehouse acquisition projects which include Phase I Environmental Site Assessments, Property Condition Assessments, HVAC Evaluations, ALTA Surveys and Zoning Reports. Mr. Taylor manages the projects with attention to client needs/timelines and fieldwork/production in order to advocate and maintain report efficiencies and acquisition timelines. These projects require multiple scope management and coordination with clients, commercial real estate brokers, technical staff, subcontractors, and legal entities. Mr. Taylor's due diligence engineering experience as well as Partner's responsiveness and expertise in national commercial real estate development engineering create successful developments and client satisfaction on an ongoing basis.

National Quick-Serve Restaurant Chain - Hundreds of National Quick-Serve Restaurant (QSR) Chain development projects which include Phase I Environmental Site Assessments, Asbestos Surveys, Geotechnical Investigations, ALTA Surveys, Plat Map Survey, and Special Inspections. Mr. Taylor manages the projects with attention to client needs/timelines and fieldwork/production in order to advocate the commercial development projects and maintain report efficiencies and construction budgets. These projects require multiple scope management and coordination with clients, technical staff, subcontractors, regulatory agencies, and construction design/contractor entities. Mr. Taylor's due diligence engineering experience as well as Partner's responsiveness and expertise in national commercial real estate development engineering create successful developments and client satisfaction on an ongoing basis.

National Dental Office Chain - Hundreds of ground-up dental office development projects which include Phase I Environmental Site Assessments, Geotechnical Investigations, and ALTA Surveys. Mr. Taylor manages the projects with attention to client needs/timelines and fieldwork/production in order to advocate the commercial development projects and maintain report efficiencies and construction budgets. These projects require multiple scope management and coordination with clients, technical staff, subcontractors, and construction design/contractor entities. Mr. Taylor's due diligence engineering

experience as well as Partner's responsiveness and expertise in national commercial real estate development engineering create successful developments and client satisfaction on an ongoing basis.

Regional Gas Station/Convenience Store Chain - Multiple ground-up gas station/convenience store redevelopment projects in California which include Phase I Environmental Site Assessments, Phase II Subsurface Investigations/Characterization, Remedial Cost Estimates with Voluntary Cleanup Regulatory Programs, Asbestos Surveys, and Geotechnical Investigations. Mr. Taylor manages the projects with attention to client/agency interaction and fieldwork/production in order to advocate the commercial development projects and maintain report efficiencies and construction budgets. These projects require multiple scope management and coordination with clients, technical staff, subcontractors, regulatory agencies, and construction design/contractor entities. Mr. Taylor's due diligence engineering experience as well as Partner's responsiveness and expertise with commercial real estate development engineering create successful developments and client satisfaction on an ongoing basis.

Beverly Hills Country Club Renovation, Beverly Hills, CA - A $12 million-dollar renovation project which included a Phase I Environmental Site Assessment, Property Condition Assessment, Seismic Evaluation, ADA Survey, ALTA Survey and a comprehensive roof assessment. Multiple engineering professionals were coordinated and dispatched to the project site to complete due diligence assessments and cost studies associated with the planned renovation of the historic facility. The renovation was successful and exemplified Mr. Taylor's due diligence engineering experience as well as Partner's responsiveness and expertise in commercial real estate evaluation.

Commercial Office Portfolio, Philadelphia, PA - A $186 million dollar acquisition project consisting of 29, multi-story commercial office buildings and included Phase I Environmental Site Assessments and Property Condition Assessments with special inspections of HVAC systems, elevators, and roofing systems. Multiple inspectors were coordinated and dispatched to each site within a two-week report completion timeline. Special inspection findings and related repair costs were cross calculated with generalist inspection reporting and incorporated into the Property Condition Assessment spreadsheets for client/lender review. The acquisition was successful and exemplified Mr. Taylor's project management and negotiation skills, coordination of several in-house engineering professionals and subcontracted elevator consultants as well as Partner's responsiveness and expertise of client/lender's expedited timeline.

National Cellular Tower Portfolios - Two multi-million-dollar acquisition projects consisting of over 2,400 cellular towers located throughout the United States which included Phase I Environmental Site Assessments. Multiple national inspectors were dispatched to each mountain-top tower within each state. The inspections incorporated the use of guides and four-wheel drive vehicles (primarily Jeeps) to visually inspect each tower. The acquisition project was successful and exemplified Mr. Taylor's project management skills, coordination of dozens of national inspectors, quality control reviews, and responsiveness to client's timeline.

Grocery Chain Portfolio, various locations throughout OR - A multi-million-dollar rehabilitation financing project consisting of 25 grocery store properties included Phase I Environmental Site Assessments and ALTA Surveys. Multiple inspectors were dispatched to each site within a two-week turnaround. The financing project was successful and the project exemplified Mr. Taylor's negotiation/client management skills, coordination of inspections, quality control and completion of timely reports as well as the responsiveness and professional acumen of Partner's Engineering Team.
