

Temecula Valley Unified School District
COVID-19 Safety Plan (CSP)

TEMECULA VALLEY
UNIFIED SCHOOL DISTRICT

Updated
May 17, 2022

Presented to the TVUSD Board - June 14, 2022

Version 3

This COVID-19 Safety Plan/Version 3 replaces the Version 2 dated December 15, 2021 and has important revisions reflecting new state and local measures taking effect after April 1, 2022. It is a fluid working document that may be adjusted as conditions and/or guidance change. To receive this plan in an accessible format, please call (951)506-7907

Forward

Temecula Valley Unified School District (TVUSD) is committed to providing students with on-campus and independent learning in a manner that is safe for students and staff and in accordance with the California Department of Public Health (CDPH), Division of Occupational Safety and Health (Cal/OSHA), and Riverside University Health System - Public Health (RUHS-PH) guidelines.

This is the third version of the COVID-19 Safety Plan (CSP). The initial COVID-19 Safety Plan was TVUSD Board approved on February 16, 2021 and RivCoPH and CDPH approved on March 5, 2021. That initial plan was revised and updated in December 2021. Version 2 was presented to the TVUSD Board and public on December 15, 2021.

The initial CSP was prepared in consultation with many District stakeholders, including the labor organization units representing both certificated and classified staff members. The updated plans will be presented at TVUSD Board meetings where input in the form of public comments will be taken. This revised CSP will be available for public review on the District website prior to the Board meeting with a link to provide comments. Any comments received will be evaluated and added to the CSP if appropriate and in compliance with regulatory requirements.

The District recognizes that public health and regulatory organizations' guidance can change regularly to protect the community from the further spread of COVID-19. The District is committed to making revisions as the guidance changes to provide further protections for all students and staff.

District Administration

General Measures

The original COVID-19 Safety Plan (CSP), was TVUSD Board approved on February 16, 2021 and RivCoPH and CDPH approved on March 5, 2021 has been updated to reflect updated California Department of Public Health (CDPH), Riverside University Health System - Public Health (RUHS-PH) and Cal/OSHA procedures and guidelines. This revision replaces Version 2 of the plan dated December 15, 2022.

Continuity of Services

While in quarantine, students have access to their daily assignments and students in grades 6-12 have optional access to live virtual teacher support. All teachers are expected to post their classroom assignments daily on the students' SeeSaw(K-5) or Canvas(6-12) dashboard. Students can both access and submit their assignments per the deadlines via the SeeSaw(K-5) or Canvas(6-12) learning management system (LMS) throughout their quarantine period. Students in grades 6-12 who are in quarantine are provided times when they can access a credentialed teacher through a Zoom conference when they need additional support with an assignment. English language development (ELD) students in quarantine are provided consistent virtual access to a credentialed bilingual teacher. Students on quarantine also have access to a member of the social emotional learning team for live virtual social emotional support, as needed. Staff can contact Risk Management for available social emotional resources, as needed. All students, staff, and families within the Temecula Valley Unified School District have full access to services contracted through Care Solace. Food services are available by contacting Nutrition Services, (951) 506-7902.

Face Coverings and Other Essential Protective Gear

AGE/GRADE	FACE COVERING GUIDELINES
Students in Grades TK-12	Strongly recommend
Staff	Strongly recommend with exceptions when they must be worn*

Use of Face Coverings

On February 28, 2022, CDPH issued an update on face coverings. Per CDPH, “After March 11, 2022, the universal masking requirement for K-12 and Childcare settings will terminate. CDPH strongly recommends that individuals in these settings continue to mask in indoor settings when the universal masking requirement lifts.” After March 11, 2022, masks are strongly recommended for students, children, teachers, and staff regardless of vaccination status. In some situations, staff may be required to wear a mask based on protocols from state and local officials.

Please note it is strongly recommended that visitors and volunteers wear masks when on school campuses.

Per CDPH’s Get the Most out of Masking document, “An effective mask has both good fit and good filtration. A well fitted mask has no gaps between the face and mask, such as above the nose or at the sides. With gaps, air that has virus particles can easily leak in or out around the sides of the mask. Good fit forces the air that you breathe out and breathe in to go through the mask and be filtered. Good filtration blocks the virus particles from going through the mask itself. You can get good filtration with the right materials and by using more layers.”

Personal face masks will be allowed in compliance with the dress code policy.

No person can be prevented from wearing a mask as a condition of participation in an activity or entry into a school, unless wearing a mask would pose a safety hazard (e.g., watersports).

When are Masks Required for Employees?

- If an outbreak is declared per Cal/OSHA’s definition, all employees in the exposed group regardless of vaccination status must wear face coverings when indoors, or when outdoors and less than six feet from another person, unless an exception applies.

- Per Riverside County Public Health’s Protocols for Staff in K-12 School Settings, staff returning from isolation before Day 11 are required to wear a mask that fits snugly over their nose and mouth when sharing indoor airspace for a total of 10 days from symptom onset or if no symptoms, from test collection date.
- Per Riverside County Public Health’s Protocols for Staff in K-12 School Settings, staff who are exposed to a COVID-19 positive individual and are asymptomatic, are required to wear a well-fitting mask when sharing indoor airspace for 10 days from last close contact.
- Per Riverside County Public Health’s Protocols for Staff in K-12 School Settings, if a staff member has symptoms (regardless of an exposure), tests negative, and symptoms are resolving or resolved, staff must mask for 10 days from symptom onset if returning to work.

Availability of Face Coverings

Staff

- Paper masks are widely available on every campus.
- Clear masks may also be provided for staff who work with students who require visual access to the movement of lips for instruction.
- Respirators, upon request, are available to any employee along with instructions on how to ensure the mask fits appropriately.

Students

- Paper masks will be available in classrooms and on each school bus.

Exemptions and Accommodations - Employees

If an employee is required to wear a facemask due to an outbreak, returning early from isolation or due to an exposure, or voluntarily wants to wear a mask and is unable to do so due to a medical condition, mental health condition, or disability, that employee shall work through the interactive process with Risk Management.

Other Essential Protective Gear

We evaluate the need for personal protective equipment (PPE) (such as gloves and face shields) as required by California Code of Regulations (CCR) Title 8, section 3380, and provide such PPE as needed. PPE, cleaning and sanitizing supplies can be ordered through Maintenance and Operations. At school sites, administrators will monitor the PPE supplies.

Health Screenings for Students and Staff

The health and safety of students and employees on school campuses and District facilities is of extreme importance. All TVUSD on-campus, in-person employees, students, volunteers, and visitors are asked to perform a self assessment at home prior to coming onto campus and stay home if experiencing COVID-19 symptoms.

Each campus and division at the District Office has a unique QR code so that itinerant staff are able to be notified if there is an exposure at the workplace.

Healthy Hygiene Practices and Ventilation

Hand Washing and Respiratory Etiquette

Hand Washing

- Washing hands and/or using hand sanitizer can keep a person healthy and prevent the spread of infections from one person to another person.
- Frequent handwashing for a minimum of 20 seconds minimizes the spread of COVID-19.
- Proper hand washing instructions have been placed above sinks in bathrooms at all school sites.
- Posters regarding hand washing have been placed in classrooms.
- Hand sanitizer stations have been placed in each classroom to ensure that staff and students have easy access.

Respiratory Etiquette

TVUSD asks that employees, students, and campus visitors or volunteers follow these safety guidelines:

- Cover your mouth and nose with a tissue (when available) when coughing or sneezing; if a tissue is not available, students/staff/volunteers/visitors are asked to cover their mouth and nose or sneeze into their arm to prevent the direct spread of respiratory droplets.
- Use the nearest waste receptacle to dispose of the tissue after use;
- Perform hand hygiene (e.g., hand washing with non-antimicrobial soap and water, alcohol-based hand rub, or antiseptic handwash) after having contact with respiratory secretions and contaminated objects/materials.

Ventilation

Classrooms

- HVAC units have been evaluated and filters changed, and where possible higher MERV rated filters have been installed. TVUSD HVAC units are equipped with filters, using a MERV 11 equivalent rating.
- Units will be set to begin operation one hour prior to the start of school and will continue operation for one hour after school.
- The District continues to evaluate the operation of HVAC units and has set their prompt repair as an operational priority. If a unit will be out of service for a sustained period of time, occupants of that space will be moved to another space on campus.
- Continued evaluation is given to additional ventilation and air cleaning technology as it becomes available.

Identifying Students or Staff with Symptoms and Student Isolation/Transition Rooms

Procedures for Identifying Staff and Students with Symptoms at a School Site

- Students demonstrating or reporting symptoms will be sent to the isolation room on campus and must be picked up immediately by a parent or emergency contact. Parents will be provided information regarding symptoms of COVID-19 and resources.
- Symptomatic students will remain home until symptoms have resolved and they are fever free for at least 24 hours without the use of medication/fever-reducing medication.
- Protocols for School Staff in K-12 School Settings, which were revised by Riverside County Public Health on May 2, 2022 will be followed, along with current State and Cal/OSHA guidelines for symptomatic staff members.
- If significant COVID-19 symptoms continue after the 10-day isolation period OR if an individual decides not to get tested and is still exhibiting COVID-19 like symptoms, the district will recommend a staff member and/or student see their doctor.

Procedures for Sending Students to Isolation/Transition Rooms

In the event that staff observe a student exhibiting symptoms of COVID-19 and/or a student notifies any employee that they are not feeling well, the employee will immediately call the health office and triage protocol will be implemented by the site.

Designated, trained employees will be identified at each site and will be responsible for meeting the student and taking the student's temperature while standing outside. The employee will then notify the health clerk of the results. The health clerk will then be able to meet the student outside, once the designated employee has walked the student up to the front building.

The health clerk can then triage the student, per protocol, and the student will be escorted either to the health office or the Isolation/Transition room based on triage criteria.

Isolation/Transition Rooms

After following TVUSD triage protocol, if a student displays any COVID-19 symptoms at school, the student will be placed in an Isolation/Transition room and the parents will be called to pick up the student immediately.

The student cannot return to school until cleared. The parent/guardian must submit the clearance form and/or medical clearance to the school site for review before their student can return.

If there is a positive COVID-19 case, the District Lead Nurse and/or contracted agency will immediately notify Riverside County Public Health. Students will adhere to Riverside County Public Health guidelines with regards to return to school, quarantine, or isolation.

Site staff will also connect the families with other support that might be needed, such as the delivery of school meals and other District or community services.

Isolation/Transition Room Procedure

Upon arrival,

- Isolation/Transition room staff may wear the appropriate PPE (N-95, gloves, face shield) when evaluating and waiting with a student in the transition room.
- The nurse trained designee will begin the evaluation and check-in process.
- The nurse/ trained designee will call the student's parent/guardian to immediately pick the student up from school.
- The nurse/trained designee will wait with and monitor the student until the parent/guardian arrives.
- The nurse/trained designee will verify the parent/guardian and check the student out.
- The staff member will discard or store as appropriate all PPE items after use.
- The nurse/trained designee will document in Infinite Campus the student's medical symptoms.
- Appropriate school staff will be notified.

Identification and Tracing of Contacts and Isolation, Quarantine and Testing Guidance

TVUSD adapts to new public health guidance and revises its protocols for both students and staff.

Procedures for Confirmed or Suspected Cases

TVUSD has a systematic procedure for the identification and contact tracing of individuals who have exhibited COVID-19 symptoms, reported a positive case, or have reported a possible COVID-19 exposure.

TVUSD Student Protocols for COVID-19 Positive and Exposure Cases

Student Tests COVID-19 Positive

TVUSD receipt of results may come through self-reporting, parent reporting, staff report, absence information, TVUSD COVID-19 testing clinic, or RUHS-PH. TVUSD's designated contact will notify RUHS-PH within 24 hours regarding the positive case and list of possible exposures through the Riverside County Contact Line List.

Group tracing will be used to determine possible student exposure and notifications will be sent out following the current RUHS-PH Protocols for Students in K-12 School Settings. Staff will be notified by Risk Management of a possible exposure to a student who tested COVID-19 positive.

TVUSD Student Isolation Protocol

TVUSD is implementing the option of a lower-risk exposure management plan for students who have tested positive for COVID-19 and is following Riverside University Health System - Public Health's Protocols for Students in K-12 School Settings.

Students who have a positive test result and/or have one or more of the symptoms associated with COVID-19 must isolate (stay in their home or other residence) for a period of at least 5 days from the date symptoms first appeared or the date of the positive test. Parents/Guardians report a COVID-19 positive for a student to the student's individual school site.

They may return to school if:

- 5 days have passed from the start of symptoms or the date of the positive test
- AND student tested negative using an antigen or PCR test on day 5 from the start of symptoms or the date of the positive test
- AND no fever for at least 24 hours, without the use of medication
- AND other symptoms have improved.

TVUSD Student Quarantine Protocol

The shorter incubation period and increased transmissibility of recent COVID variants suggest that a quicker and broader response to contact tracing for cases identified in school settings is warranted. The CDPH and Riverside University Health System - Public Health are therefore encouraging schools to move from the Individual Contact Tracing approach TVUSD was following to the Group Contact Tracing. These protocols also allow schools to provide safe in-person instruction without the intense demand of individual contact tracing. TVUSD transitioned to the Group Contact Tracing on March 12, 2022.

The Group Tracing approach is as follows:

- School team will notify students who spent more than a cumulative total of 15 minutes (within a 24-hour time period) in a shared indoor airspace (e.g., classroom, teammates, cohorts, etc.) with someone with COVID-19 during their period of infectiousness.
- Notifications should be provided to all individuals considered exposed, including those who are vaccinated and/or recently infected.
- Students should remain home if they have one or more of the symptoms associated with COVID-19 or test positive.
- Exposed students may continue to take part in all aspects of K-12 schooling, including sports and extracurricular activities, unless they develop symptoms or test positive for COVID-19.

- Per the CDPH guidance on group tracing, when group tracing is used, all students who shared a common airspace with a person who was contagious with COVID-19 for 15 minutes or more in a 24 hour period shall test on Day 3, 4, or 5 to remain in school. This includes students who are fully vaccinated and those who have recovered from a prior lab-confirmed infection within the last 90 days.
- Schools are not required to track test results. Parents/Guardians are expected to inform the school when their student tests positive or develops symptoms.
- Parents/Guardians must monitor for symptoms for 10 days from the date of last exposure.

TVUSD Employee Protocols for COVID-19 Positive and Exposure Cases

Employee Tests COVID-19 Positive

Employees are asked to report their positive test to the District's [Let's Talk page](#). TVUSD receipt of results may come through self-reporting, mandated testing results, supervisor reporting, absence information, or RUHS-PH. TVUSD's designated contact will notify RUHS-PH through the SPOT system regarding a positive case and list of possible exposures through that reporting platform.

TVUSD's designated staff will contact trace utilizing information received through that process to contact potential staff exposure to the positive staff member and current State/County/Cal/OSHA guidance for quarantining exposed staff will be followed. Names of identified students who were in close contact or who meet the group tracing criteria to the COVID-19 positive staff member will be provided to the school site for group tracing notification.

If an Employee Tests Positive and is Symptomatic:

Employees who test positive for COVID-19 and have symptoms, must stay in isolation until

- At least 5 days have passed since symptoms began
- AND no fever
- AND currently have no symptoms or symptoms are significantly improved and resolving
- AND a viral diagnostic specimen collected no sooner than Day 5 is negative. To comply with the testing requirements of the Cal/OSHA Emergency Temporary Standards (ETS), an over-the-counter (OTC) COVID-19 test may be both self-administered and self-read if verification of the results, such as a time and date stamped photograph of the result or an OTC test that uses digital reporting with time and date stamped results, is provided.

Employees meeting all of the above criteria may exit isolation Day 6. If isolation is discontinued after day 5, staff is required to wear a well-fitting mask when sharing indoor airspace for a total of 10 days, especially in indoor settings.

If on Day 5, symptoms have not improved, the employee continues to isolate until symptoms have improved or the above qualifications have been met. No test necessary to return after completing 10 full days of isolation if no longer experiencing symptoms.

If staff is unable to test or choose not to test, staff must remain in isolation until after Day 10 if fever-free for 24 hours

If an Employee Tests Positive and is Asymptomatic:

Employees who test positive for COVID-19 and have no symptoms, must stay on isolation until

- At least 5 days have passed since positive test collection date
- AND if remained asymptomatic
- AND a viral diagnostic specimen collected no sooner than Day 5 is negative. To comply with the testing requirements of the Cal/OSHA Emergency Temporary Standards (ETS), an over-the-counter (OTC) COVID-19 test may be both self-administered and self-read if verification of the results, such as a time and date stamped photograph of the result or an OTC test that uses digital reporting with time and date stamped results, is provided.

If staff develop symptoms during isolation, refer to the Positive COVID-19 and Symptomatic section.

Employees meeting all of the above criteria may exit isolation Day 6. If isolation is discontinued after day 5, staff is required to wear a well-fitting mask when sharing indoor airspace for a total of 10 days, especially in indoor settings. No test necessary to return after completing 10 full days of isolation if no symptoms developed.

If staff is unable to test or choose not to test, staff must remain in isolation until after Day 10 if fever-free for 24 hours.

If an Employee is Exposed and is Asymptomatic (Regardless of Vaccination Status):

If an employee is a close contact (employee who were within six feet of a COVID-19 case for a cumulative total of 15 minutes or more in any 24-hour period within or overlapping with the "infectious period") then testing is required 3 - 5 days after last exposure if the employee remains asymptomatic. Persons infected with COVID-19 within the prior 90 days do not need to be tested, quarantined, or excluded from work unless symptoms develop. Testing can be a PCR test, an antigen test or an at home test that is date and time stamped. Tests results will be submitted to the Google Form provided to an employee who has a close contact.

Staff are required to wear a well-fitting mask when sharing indoor airspace for 10 days per the masking requirements in the Cal/OSHA ETS.

If symptoms develop, the employee should go home, test, and refer to the Employees Who Display Symptoms of COVID-19 section below.

If a staff member tests positive, they are asked to report their positive test to the District's [Let's Talk](#) page and the above referenced protocols will be followed.

Employees Who Display Symptoms of COVID-19 (Regardless of Vaccination Status):

Report through the District's [Let's Talk](#) page. Testing can be completed at the onset of symptoms but please note that subsequent testing may be required on day 3 through 5 or later. While the test is pending, continue home isolation. If a staff member tests positive, the Positive COVID-19 and Symptomatic procedures will be followed.

If a staff member does not have a known exposure, tests negative, and symptoms are resolving or resolved, staff may return to work and should mask for 10 days from symptom onset.

If a staff member has a known exposure, tests negative, and symptoms are resolving or resolved, staff may return to work and must mask for 10 days from symptom onset. The protocols outlined in the previous section regarding an employee exposure and symptomatic will be followed.

If a staff member refuses or is unable to test, that staff member must remain in home isolation through day 10 of symptom onset and can return on day 11 if 24 hours have passed since resolution of fever without the use of fever-reducing medications and symptoms are not present or are resolving.

Physical Distancing

Per CDPH's COVID-19 Public Health Guidance for K-12 Schools in California, 2021-22 School Year, CDPH recommends focusing on the other mitigation strategies provided in this guidance instead of implementing minimum physical distancing requirements for routine classroom instruction.

Staff Training and Family Education

Staff

The Illness and Injury Prevention Plan (IIPP) COVID-19 Addendum contains information for staff related to proper procedures in the prevention of COVID-19 spread, housekeeping, hand hygiene, personal protective equipment, and physical distancing. The IIPP is available on the District's website.

Families

School Site principals will communicate site specific safety guidelines for their campuses.

Testing for COVID-19

Currently, self swab PCR COVID-19 testing for staff is available at each site, the District Office and the Maintenance, Operations and Transportation office Monday through noon on Wednesday. Abbott BinaxNOW rapid antigen testing is also available by appointment at the District Office and additional site locations during select times and days of the week for both students and staff. Confirmatory PCR testing is also available for students and staff based on current testing recommendations and the CDPH requirements regarding symptoms and exposure. Finally, at home tests have been provided and are available to staff and students.

Vaccination Information

Voluntary vaccination clinics were held at TVUSD in the spring semester of 2020-21 school year for both employees and eligible students. Vaccination resources are available on the TVUSD website where both staff and parents/guardians can access the information.

As per Governor Gavin Newsom's Public Health Order of August 11, 2021, all school staff will be required to either show proof of full vaccination or be tested at least once per week for COVID-19.

Communication Plans

The Superintendent and Executive Cabinet will work closely with RUHS-PH, Risk Management, and the Lead Nurse to develop public notifications regarding COVID-19. At all times, student and staff confidentiality will be of utmost importance, and names or other identifying information will not be disclosed per HIPPA and FERPA requirements.

Consultation

The initial CSP was prepared in consultation with many District stakeholders, including the labor organization units representing both certificated and classified staff members. Updated plans will be presented at TVUSD Board meetings where input in the form of public comments will be taken. Revised CSPs will be available for public review on the District website prior to the Board meeting with a link to provide comments. Any comments received will be evaluated and added to the CSP if appropriate and in compliance with regulatory requirements.

Definitions

Definitions:

- Symptomatic Testing - Testing that occurs when an individual is demonstrating symptoms of COVID-19
- Response Testing - Testing that is required when there is the potential that an individual may have been exposed to COVID-19 (the individual may be symptomatic or asymptomatic at the time of the test)
- Asymptomatic Testing - Testing that occurs when an individual is not demonstrating symptoms of COVID-19
- PCR Test (Polymerase Chain Reaction) - Also called a molecular test, this COVID-19 test detects the genetic material of the virus using a lab technique called polymerase chain reaction (PCR). A fluid sample is collected by inserting a long nasal swab (nasopharyngeal swab) into the nostril

and taking fluid from the back of the nose or by using a shorter nasal swab (mid-turbinate swab) to get a sample. In some cases, a long swab is inserted into the back of the throat (oropharyngeal swab), or the individual may spit into a tube to produce a saliva sample. Results may be available in minutes if analyzed onsite, within a few days, or longer in locations with test processing delays. PCR tests are very accurate when properly performed by a healthcare professional, but the rapid test can miss some cases.

- Antigen Test - This COVID-19 test detects certain proteins in the virus. Using a long nasal swab to get a fluid sample, some antigen tests can produce results in minutes. Others may be sent to a lab for analysis. A positive antigen test result is considered accurate when instructions are carefully followed, but there's an increased chance of false-negative results — meaning it's possible to be infected with the virus but have a negative result. Depending on the situation, the doctor may recommend a PCR test to confirm a negative antigen test result.
