

Zoom instructions for Students

How to participate in the virtual meeting using Zoom

1. Your teacher will post information about your Zoom meeting, including a web link to join.

2. Once you click on the provided web link for your meeting, Zoom will ask you if you would like to download the Zoom application or join the meeting using your web browser. Click on "Download and Run Zoom" and follow the prompts on your computer to install and run the app:

If you are on a Chromebook, it might ask you to download the extension from the webstore. Download the extension.

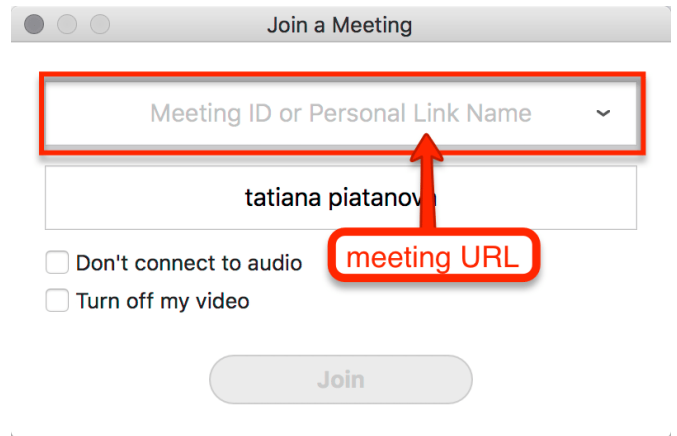

3. Once you have downloaded the extension or app, go back to the link provided by your teacher and click it again.

NOTE: if you have trouble with the download process, click the 'Join from your browser' option (circled in yellow above)

4. The Zoom app will automatically download to your computer and open Zoom dashboard. From your App dashboard then click on "Join" button:

5. Zoom then will prompt you to enter meeting's web link into a pop-up window:

NOTE: You will only need to install Zoom App once it once. Once installed every time you join the meeting simply open the app and then enter the URL of the meeting in the Join the meeting field.

6. Once you click Join, you might be asked to enter your name. Enter your **first name so your teacher knows who is in the meeting**. If your teacher cannot recognize the name, he/she will not let you in the meeting. This is a safety precaution.

The video and audio controls in Zoom are located on the bottom left and should connect to your computer's mic and camera automatically.
