

LAKWOOD SCHOOL DISTRICT #306
ADMINISTRATIVE PROCEDURES
BOARD POLICY # 2410

Procedure - High School Graduation Requirements

I. PUBLICATION OF GRADUATION REQUIREMENTS

Prior to registering in high school and each year thereafter, each student and his or her parents or guardians will be provided with a copy of the graduation requirements in effect for that student (those in effect when the student enrolled in ninth grade). Graduation requirements may also be included in the student handbook.

II. CREDIT REQUIREMENTS

Period of Eligibility to Earn Credits

Generally, credit towards high school graduation will be earned in grades nine through twelve. However, unless requested otherwise by the student and the student's family, the district will award high school credit towards fulfilling graduation requirements to a student who has completed high school courses while in seventh or eighth grade if one of the following applies:

- A. The course was taken with high school students, and the student successfully passed the same course requirements and examinations as the high school students enrolled in the class; or
- B. The course taught at the middle school level has been determined by the district to be similar or equivalent to a course taught at the high school level.

Students who have taken and successfully completed high school courses under the above circumstances shall not be required to take an additional mastery/competency examination or perform any other additional assignment to receive credit.

At the request of the student and the student's parent or guardian, high school credit earned before high school may be transcribed with a nonnumerical grade, such as "pass" or "credit." A nonnumerical grade will not be included in the student's high school grade point average calculations. High school credit earned prior to high school and transcribed with a nonnumerical grade will apply to fulfilling high school graduation requirements.

Before the end of eleventh grade, a student and the student's parent or guardian must inform the school if they do not want credit for the course or courses taken before attending high school or if they want the credit to be transcribed with a nonnumerical grade.

Awarding of High School Credit

The district will award high school credit for successful completion of a specified unit of study. A student successfully completes a specified unit of study by doing one of the following:

- A. Earning a passing grade according to the district's grading policy;
- B. Demonstrating proficiency or mastery of content standards as determined by the district (the district will establish a process for determining proficiency or mastery for credit bearing courses of study); or

- C. Successfully completing an established number of hours of planned instructional activities to be determined by the district.

Credits from Other Programs

The principal or designee is responsible for determining which credits will be recognized by the district for students enrolling from another state approved learning program (public school, approved private school, or home school) or from an out-of-state or out-of-country program. The district will accept credits from another Washington public school or accredited state private school or accredited out-of-state public or private school to the extent the credit matches a district graduation requirement—or the credits may be counted as elective credits. The district will evaluate credits from unaccredited programs or home schools as described below for home school students. Decisions of the principal or designee may be appealed to the superintendent or designee within fifteen school days of the initial decision.

Subject and Credit Requirements for Graduation

The following are the subject and credit requirements that a student must meet to graduate:

- A. Four credits in English.

- B. Three credits in mathematics.

- 1.

- 1. The three mathematics credits must include Algebra I or integrated mathematics I, Geometry or integrated mathematics II, and a third credit of high school mathematics that aligns with the student's interests and high school and beyond plan.

- 1.

- 2. A student who prior to ninth grade successfully completes one or more high school level math courses with a passing grade that is automatically transcribed on the student's high school transcript or a student who demonstrates mastery or competency in high school math subjects and has received credit for them may use those credits to meet his or her graduation requirement.

- 1.

- 3. A student who prior to ninth grade successfully completes one or more high school level math courses with a passing grade and opts to receive no high school credit for that course or those courses or a student who demonstrated mastery or competency in those subject but did not receive high school credits may do one of the following:

- 1.

- 1.

- i. Repeat the course or courses for credit in high school; or

- 1.

- 1.

- ii. Earn three credits of high school mathematics in different math subjects than those completed before high school. The student must take Algebra I or integrated mathematics I and Geometry or integrated mathematics II in high school if the student did not complete those courses at a high school level prior to high school. However, the student does not need to repeat courses if the student already took the courses at a high school level.

- 1.

- 4. A student may substitute a computer science course aligned to state computer science learning standards as an alternative to a third year of mathematics so long as:

- 1.

- 1.

- i. Before substituting the mathematics course, the counselor provides the student and the student's parent/guardian with written notification of postsecondary consequences due to the substitution;

1.
 1.
 - ii. The student, the student's parent or guardian, and the school principal or counselor agree to the substitution;
1.
 1.
 - iii. The substitution aligns with the student's high school and beyond plan; and
1.
 1.
 - iv. The student has not already substituted a third-year science course for a computer science course.

C. Three credits in science.

1.
 1. Two science credits must be in laboratory science.
1.
 2. A student may choose the content of the third science credit based on his or her interests and his or her high school and beyond plan, with agreement of the student's parent or guardian. If the parent or guardian is unavailable or does not indicate a preference for a specific course, the school counselor or principal may provide agreement.
1.
 3. A student may substitute a computer science course aligned to state computer science learning standards as an alternative to a third year of science so long as:
 1.
 - i. Before substituting the mathematics course, the counselor provides the student and the student's parent or guardian with written notification of postsecondary consequences due to the substitution;
 1.
 - ii. The student, the student's parent or guardian, and the school principal or counselor agree to the substitution;
 1.
 - iii. The substitution aligns with the student's high school and beyond plan; and
 1.
 - iv. The student has not already substituted a third-year mathematics course for a computer science course.

D. Three credits in social studies.

1.
 1. One social studies credit must be in United States history.
1.
 2. One-half social studies credit must be in contemporary world history, world geography, and world problems. Courses in economics, sociology, civics, political science, international relations, or related courses with emphasis on contemporary world problems may be accepted as equivalencies.

1.
 3. One-half social studies credit must be in civics.
1.
 4. One social studies credit must be in an elective course or courses.
1.
 5. Although a student does not need to receive credit for such a course, a student must complete a Washington State history and government course.
- E. Two credits in world languages or personalized pathway requirements.
 1.
 1. "Personalized pathway requirement" means up to three credits chosen by a student that are included in a student's personalized pathway and prepare the student to meet specific post-secondary career or educational goals.
 1.
 2. "Personalized pathway" means a locally determined body of coursework identified in a student's high school and beyond plan that is deemed necessary to attain the post-secondary career or educational goals chosen by the student.
- F. Two credits in the arts. One of the two arts credits may be replaced with a personalized pathway requirement.
- G. One-half credit in health.
- H. One and one-half credit in physical education.
- I. One credit in career and technical education.
 1.
 1. A career and technical education credit is a credit resulting from a course in a career and technical education program or an occupational education credit.
 1.
 2. A student who earns credit through a career and technical education course determined by the district or by the Office of the Superintendent of Public Instruction to be equivalent to a noncareer and technical education core course will not be required to pass a course in the noncareer and technical education subject to earn a credit in that subject. The student earns one credit while meeting two graduation requirements, a career and technical education requirement and the noncareer and technical education subject requirement. The total number of credits required for graduation remain unchanged, and the student will need to earn an additional elective credit.
- J. Four elective credits.

Total number of credits required to graduate: 24.

Alternative Programs

The district may grant credit toward graduation requirements for planned learning experiences primarily conducted away from the facilities owned, operated, or supervised by the district.

A proposal for approval of out-of-school learning activities will be submitted prior to the experience, will be at no additional cost to the district, and will include at least the following information:

- A. The name of the program or planned learning experience;
- B. The length of time for which approval is desired;
- C. The objective(s) of the program or planned learning experience;

- D. The state learning goals and related state learning standards are part of the program or planned learning experience;
- E. A description of how credits will be determined in accord with WAC 180-51-050(1);
- F. The content outline of the program and/or major learning activities and instructional materials to be used;
- G. A description of how student performance will be assessed;
- H. The qualifications of instructional personnel;
- I. The plans for evaluation of the program; and
- J. How and by whom the student will be supervised.

The district will keep a list of approved programs on file in the superintendent's office. The superintendent or designee will communicate the reasons for approval or disapproval to those making the request.

Running Start

The Running Start program allows high school juniors and seniors to attend community college classes (100 level or above) for part or all of their schedule. Students must be of junior standing or above to be eligible for the program. Rising juniors, those who have completed their sophomore year and have yet to begin their junior year, may enroll for up to ten quarter credits, or the semester equivalent, during the summer academic term.

Students earn college credit, which is also converted and applied to their high school transcript.

The district will provide general information about the Running Start program to students in grades ten, eleven, and twelve and the parents and guardians of those students. The information will include information about the opportunity to enroll in the program through online courses available at community and technical colleges and other state institutions of higher education, enrollment opportunities during the summer academic term, and the college high school diploma options under RCW 28B.50.535.

In order to enroll in the Running Start program, students need to do the following:

- A. Check with their high school counselor and/or determine the options for demonstrating college-level placement via assessments or courses taken. At a minimum, college-level skills in reading and writing are required.
- B. Speak with their counselor to assess credits needed for graduation, then decide which courses they would like to take at the college. Note that part-time Running Start students will need to coordinate college classes so that they do not interfere with their high school classes. Full-time Running Start students will generally not be enrolled in courses at the high school, even when the community college they attend is not in session. A student enrolled full-time at a college may use .2 FTE to enroll at the high school for the purpose of accessing college courses online. Students are permitted to enroll in a combined annual average of 1.2 FTE between the high school and the college.
- C. Obtain a Running Start verification form from the college or their high school counselor. Work with high school counselor and/or college to verify course decisions and coverage of tuition via state funding for selected courses. Parent consent is required if the student is under 18 years old.
- D. Register for classes via the college's online registration system. First time Running Start students will need to enroll in the college before completing the registration process. The verification process in "C" needs to occur to ensure state funding for college courses.
- E. Work with school counselor to ensure transmission of the authorization form to the college prior to established deadlines to ensure continued enrollment.

Credit for Career and Technical Work-Based Learning

The district regards work experience as a part of the educational program of students as part of the secondary school curriculum rather than just a device to relieve a staffing shortage. The district may grant credit for work experience based upon the following factors:

- A. The school will supervise the work program.
- B. The work experience will specifically relate to the student's school program.
- C. The work experience will represent growth in the student, and the type of work will have definite educational value.
- D. The work experience will provide a varied job experience.
- E. The career placement counselor will supplement the work experience with an adequate program of guidance, placement, follow-up, and coordination between job and school.
- F. The work experience may be a planned part of the credit given for a school subject (e.g., sales training class).
- G. The district may grant one credit for not less than 180 hours for instructional work-based learning experience and not less than 360 hours of cooperative work-based learning experience related to a student's school program. Alternatively, the district may grant one credit on a mastery/competency basis as provided under WAC 180-51-050 (1)(b).
- H. The employer will legally employ the student, who must have passed his or her sixteenth birthday.
- I. The employer will file a report of the student's work record with the school, indicating the student made satisfactory progress on the job.
- J. The regular state apprenticeship program and school cooperatively develop the student's training, which meets graduation-requirement standards.
- K. The program standards and procedures align with the state career and technical work-based learning standards.

College in the High School

The college in the high school program is a dual credit program located on a high school campus or in a high school environment in which a high school student may earn both college credit and high school credit by achieving a passing grade in a college level course. A college in the high school program will be governed by a local contract which will include qualifications for students to enroll in the program.

Additionally, applicable information regarding students in the program includes the following:

- A. Students who have not yet received a high school diploma, and are eligible to be in the ninth, tenth, eleventh or twelfth grades may participate in the high school in the college program.
- B. Students will receive credit for the courses they complete. If a student completes a course for which there is not a comparable course with the district, then an administrator will determine how many credits the student will receive for the course. Such a determination shall be issued in writing by an administrator prior to the student beginning the course.
- C. Students may be required to pay a tuition fee to receive college credit for a course. Students will not be required to pay a tuition fee for high school credit.

National Guard High School Career Training

The district may grant credit for National Guard high school career training in lieu of either required or elective high school credits. Approval by the district will be obtained prior to a student's participation in a National Guard training program as follows:

- A. MIL Form 115 or an equivalent form provided by the National Guard will be completed and filed with the district.
- B. The number of credits toward high school graduation to be granted will be calculated and agreed upon by the student and an authorized representative of the district. Such agreement will be noted on MIL Form 115 or an equivalent form.
- C. The district may grant credit toward high school graduation upon certification by a National Guard training unit commander that the student has met all program requirements.

Home School Credit

Guidelines for granting high school credit for homeschooling are as follows:

- A. To gain credit for a course of study, a student will provide the following:

- 1.
 - 1. A journal that reflects the actual work completed during a home-study course of study;
- 1.
 - 2. Exhibits of any specific projects completed (e.g., themes, research papers, art and/or shop projects); or
- 1.
 - 3. Any such other performance-based exhibits of specific course-related accomplishments.

- B. To gain credit for a course of study, a student must demonstrate proficiency at a minimum of 80% of the objectives of the course. Such testing will be available as an ancillary service of the district if it is regularly available to all students. If not, the parent may engage district-approved personnel to conduct such an assessment at a cost determined by such personnel.

- C. Credit is granted for the following approved schools:

- 1.
 - 1. Community colleges, vocational-technical institutes, four-year colleges and universities, and approved private schools in the state of Washington; and
- 1.
 - 2. Other schools or institutions that are approved by the district after evaluation for a particular course offering.

III. HIGH SCHOOL AND BEYOND PLAN REQUIREMENT

Each student must have a high school and beyond plan to guide the student’s high school experience and inform course taking that is aligned with the student’s goals for education or training and career after high school.

A. Plan Development

Beginning by the seventh grade, each student will be administered a career interest and skills inventory, which is intended to inform eighth grade course scheduling and the development of an initial high school and beyond plan.

No later than eighth grade, each student must have begun development of a high school and beyond plan that includes a proposed plan for first-year high school courses aligned with graduation requirements and secondary and postsecondary goals.

By ninth grade, each student who has not earned a score of level 3 or 4 on the middle school mathematics assessment identified in RCW 28A.655.070 must have the high school and beyond plan updated to ensure the student takes a mathematics course in both the ninth and tenth grades. These courses may include career and technical education equivalencies in mathematics adopted pursuant to 28A.230.097 and district policy.

With staff support, students must update their high school and beyond plan annually, at a minimum, to review academic progress and inform future course taking. The high school and beyond plan must be updated in 10th grade to reflect high school assessment results in RCW 28A.655.061, ensure student access to advanced course options per the district's academic acceleration policy, assess progress toward identified goals, and revised as necessary for changing interests, goals, and needs.

For students who have not met the standard on state assessments or who are behind in completion of credits or graduation pathway options will be given the opportunity to access interventions and academic supports, courses, or both, designed to enable students to meet all high school graduation requirements. The parents or legal guardians shall be notified about these opportunities as included in the student's high school and beyond plan, preferably through a student-led conference that includes the parents or legal guardians, at least annually until the student is on track to graduate.

For students with an individualized education program, the high school and beyond plan must be developed and updated in alignment with their school to postsecondary transition plan. The high school and beyond plan must be developed and updated in a similar manner and with similar school personnel as for all other students.

The district will involve parents and legal guardians to the greatest extent feasible in the process of developing and updating the high school and beyond plan. The plan will be provided to the student and students' parents or legal guardians in a language the student and students' parents or legal guardians understand and in accordance with the district's language access policy and procedures, which may require language assistance for students and parents or legal guardians with limited English proficiency.

The district will annually provide students in grades eight through twelve and their parents or legal guardians with comprehensive information about the graduation pathway options offered by the district. The district will begin to provide this information beginning in sixth grade. The district will provide this information in accordance with the district's language access policy and procedures.

The district may partner with student-serving, community-based organizations that support career and college exploration and preparation for postsecondary and career pathways. Partnerships may include high school and beyond plan coordination and planning, data sharing agreements, and safe and secure access to individual student's high school and beyond plans.

B. Components of the High School and Beyond Plan

All high school and beyond plans must, at a minimum, include the following elements:

1. Identification of career goals and interests, aided by a skills and interest assessment;
2. Identification of secondary and postsecondary education and training goals;
3. An academic plan for course taking that:
 - a. Informs students about course options for satisfying state and local graduation requirements;
 - b. Satisfies state and local graduation requirements;
 - c. Aligns with the student's secondary goals, which can include education, training, and career preparation;
 - d. Identifies available advanced course sequences per the District's academic acceleration policy, that include dual credit courses or other programs and are aligned with the student's postsecondary goals;
 - e. Informs students about the potential impact of their course selections on postsecondary opportunities;
 - f. Identifies available career and technical education equivalency courses that can satisfy core subject area graduation requirements under RCW 28A.230.097;

- g. If applicable, identifies career and technical education and work-based learning opportunities that can lead to technical college certifications and apprenticeships; and
- h. If applicable, identifies opportunities for credit recovery and acceleration, including partial and mastery-based credit accrual to eliminate barriers for on-time grade level progression and graduation per RCW 28A.320.192;

4. Evidence that the student has received the following information on federal and state financial aid programs that help pay for the costs of a postsecondary program:

- a. The college bound scholarship program established in chapter 28B.118 RCW, the Washington college grant created in RCW 28B.92.200, and other scholarship opportunities;
- b. The documentation necessary for completing state and federal financial aid applications; application timelines and submission deadlines; and importance of submitting applications early;
- c. Information specific to students who are or have been the subject of a dependency proceeding pursuant to chapter 13.34 RCW, who are or are at risk of being homeless, and whose family member or legal guardian will be required to provide financial and tax information necessary to complete applications;
- d. Opportunities to participate in advising days and seminars that assist students and, when necessary, their parents or legal guardians, with filling out financial aid applications in accordance with RCW 28A.300.815; and
- n. A sample financial aid letter and a link to the financial aid calculator created in RCW 28B.77.280.

5. By the end of the twelfth grade, a current resume or activity log that provides a written compilation of the student's education, any work experience, extracurricular activities, and any community service including how the district has recognized the community service.

IV. GRADUATION PATHWAY OPTIONS

A student may choose to pursue one or more of the pathway options described below to demonstrate career and college readiness as long as the option chosen is in alignment with the student's high school and beyond plan.

The district will provide annual notice, in a way that conforms with Board Policy 4218 – Language Access to students in grades eight through twelve and their parents or legal guardians with comprehensive information about the graduation pathway options offered by the district.

At least annually, the district will examine data on student groups participating in and completing each graduation pathway option that the district offers. At a minimum, the data on graduation pathway participation and completion will be disaggregated by the student groups described in RCW [28A.300.042](#) (1) and (3), and by:

- Gender;
- Students who are the subject of a dependency proceeding pursuant to chapter [13.34](#) RCW;
- Students who are experiencing homelessness as defined in *RCW [28A.300.542](#)(4); and
- Multilingual/English learners.

If the results of the analysis required under the statute show disproportionate participation and completion rates by student groups, then the school district will identify reasons for the observed disproportionality and implement strategies as appropriate to ensure the graduation pathway options are equitably available to all students in the school district.

Statewide High School Assessment

A student may demonstrate career and college readiness by meeting or exceeding the graduation standard established by the State Board of Education on the statewide high school assessments in English language arts and mathematics.

Dual Credit Courses

A student may demonstrate career and college readiness by completing and qualifying for college credit in dual credit courses.

“Dual credit course” means a course in which a student is eligible for both high school credit and college credit at the level of 100 or higher upon successfully completing the course. Examples of such courses include running starts, college in the high school courses, and career and technical education dual credit courses.

Before course scheduling or course registration for the next school term, the district will provide the following information to students in grades nine through twelve and their parents: information about each available dual credit program and any financial assistance available to reduce dual credit course and exam costs for students and their families. The information will be provided by email and other communication methods. To the extent feasible, the information will be translated into the primary language of each parent or legal guardian.

High School Transition Courses

A student may demonstrate career and college readiness by earning high school credit in a high school transition course in English language arts and mathematics. A high school transition course is a course offered in high school where successful completion by a high school student ensures the student college-level placement at participating institutions of higher education as defined in RCW 28B.10.016. High school transition courses must satisfy core or elective credit graduation requirements established by the State Board of Education.

AP Courses and International Baccalaureate Programs

A student may demonstrate career and college readiness by meeting the requirement of A or B below in the AP, international baccalaureate, and Cambridge international courses in English language arts or mathematics that the state board of education designates as eligible to be used to meet this standard:

- A. Earning high school credit with a grade of C+ or higher in each term in the eligible AP, international baccalaureate, and Cambridge international courses in English language arts or mathematics course; or
- B. Earning at least the minimum score of three on advanced placement exams, four on standard-level and higher-level international baccalaureate exams, or scores of E(e) or higher on A and AS level Cambridge international exams for the corresponding courses.

SAT or ACT Scores

A student may demonstrate career and college readiness by meeting or exceeding the scores established by the state board of education for the mathematics portion and the reading, English, or writing portion of the SAT or ACT.

Performance-based Learning Experience

Complete a performance-based learning experience through which the student demonstrates knowledge and skills in a real-world context, providing evidence that the student meets or exceeds state learning standards in English language arts and mathematics. The performance-based learning experience may take a variety of forms, such as a project, practicum, work-related experience, community service, or cultural activity, and may result in a variety of products that can be evaluated, such as a performance, presentation, portfolio, report, film, or exhibit. The performance-based learning experience must conform to the graduation proficiency targets and associated rubrics established by the state board of education.

Combination of Options

A student may demonstrate career and college readiness by meeting any combination of at least one English language arts option and at least one mathematics option described above.

Armed Services Vocational Aptitude Battery

A student may demonstrate career and college readiness by meeting standard in the armed services vocational aptitude battery by scoring at least the minimum established by the military for eligibility to serve in a branch of the armed services at the time the student takes the assessment. The state board of education will post eligibility scores on its website at least annually by September 1st.

Career and Technical Education Courses

A student may demonstrate career and college readiness by completing a sequence of career and technical education courses that are relevant to a student's postsecondary pathway that meet either the curriculum requirements of core plus programs for aerospace, maritime, health care, information technology, or construction and manufacturing; or that meet the minimum criteria identified in WAC 180-51-230(h) and RCW 28A.700.030.

[District note: Districts have discretion in determining which pathway options they will offer to students.]

V. INTERNATIONAL BACCALAUREATE PROGRAMME DIPLOMA

A student who fulfills the requirements for an International Baccalaureate Programme diploma is considered to have satisfied at least one of the graduation pathway options and the minimum state requirements for graduation from high school, but the district may require the student to complete additional local graduation requirements.

To receive an international baccalaureate diploma, a student must complete and pass all required diploma program courses, as scored at the local level; pass all internal assessments, as scored at the local level; successfully complete all required projects and products, as scored at the local level; and complete the final exams administered by the international baccalaureate organization in each of the required subjects.

VI. STUDENT'S WITH AN INDIVIDUALIZED EDUCATION PROGRAM (IEP)

A student's IEP team must determine whether the graduation pathway options described above are appropriate for the student.

The following process will be followed to help a student with an IEP graduate:

- A. By the age of 14, the student will participate with the IEP Team (including a special education teacher, general education teacher, parents, student, and other school personnel and agency representatives who will assist the student in achieving the goals of the IEP) in a discussion of transition service needs that focuses on the student's course of study.
- B. As an outcome of the discussion, the IEP will include appropriate graduation requirements based on the student's individual needs and abilities consistent with the student's transition plan. Modifications to the district's standard graduation requirements may include the following:
 1.
 1. Attainable alternate classwork or individualized activities substituted for standard requirements;
 1.
 2. An extension of time for the student to remain in school to complete graduation requirements. The student may remain in school up to and including the school year in which the student reaches twenty-one years of age.
- C. The student will, in cooperation with his or her parent or guardian and the IEP team, determine the following:
 1.
 1. The projected date by which all graduation requirements will be met; and

1.
 2. The projected date and conditions under which the student will participate in the graduation ceremony.
- D. The student will have an IEP that incorporates all issues and decisions from the above procedures. Any decision that modifies the district's standard graduation requirements will be made through the IEP process. Annually or as needed, the IEP will be reviewed or revised to accommodate the student's progress and development.

VII. SEAL OF BILITERACY

To be awarded the Washington Seal of Biliteracy, graduating high school students must meet the following criteria:

- A. Demonstrate proficiency in English by (1) meeting statewide minimum graduation requirements in English as established by the Washington State Board of Education and (2) meeting state standards on the reading and writing or English language arts assessment; and
- B. Demonstrate proficiency in one or more world languages. For purposes of this section, "world language" is defined as a language other than English, including American Sign Language, Latin, and Native American or other indigenous languages or dialects. The fact that a language is not written is not a barrier to receive the Seal of Biliteracy. Proficiency may be demonstrated by one of the following methods:
 1.
 1. Passing a foreign language Advanced Placement exam with a score of three or higher;
 1.
 2. Passing an International Baccalaureate exam with a score of four or higher;
 1.
 3. Demonstrating intermediate-mid level or higher proficiency on the American Council on Teaching of Foreign Languages (ACTFL) guidelines using assessments approved by OSPI for mastery/competency-based credits; and demonstrating proficiency using reading assessments approved by OSPI (when developed);
 1.
 4. Qualifying for four mastery/competency-based credits by demonstrating proficiency in speaking, writing, and reading the world language at intermediate-mid level or higher on the ACTFL proficiency guidelines according to Policy 2409, Credit for Competency-Proficiency; or
 1.
 5. Demonstrating proficiency in speaking, writing, and reading the world language through other national or international assessments approved by OSPI. OSPI and the federally recognized Tribes in Washington have a language proficiency system in place to determine tribal language proficiency with students for the Seal of Biliteracy."

VIII. GRADUATION CEREMONIES

If students fulfill graduation requirements by the end of the last term of their senior year, they may participate in graduation ceremonies. Each student will be awarded a diploma after satisfactorily completing local and state requirements. Upon request, each graduating student will receive a final transcript. Each student will be notified of this opportunity at least one month prior to the close of the school term.

Any student receiving services under an IEP who will continue to receive such services between the ages of 18 and 21 will be allowed to participate in the graduation ceremonies and activities after four years of high school attendance with his or her age-appropriate peers and receive a certificate of attendance.

The district will allow students who are members of a federally recognized tribe to wear traditional tribal regalia or objects of Native American cultural significance along with or attached to a gown at the graduation

ceremony or related school event. Additionally, the district will not require such students to wear a cap if it is incompatible with the regalia or significant object they have chosen to wear. Otherwise, the district has discretion to determine the conduct for graduation ceremonies as described below.

Graduation ceremonies will be conducted in the following manner:

- A. Each participating student must participate in the graduation ceremony rehearsal. Each student who participates will purchase or rent the proper cap and gown as designated by the school administration and the class advisor and officers.
- B. With the exception of allowing tribal regalia as stated above, caps and gowns will be worn in the proper manner, as designated by the school administration and class advisor.
- C. Students who participate will use good taste in their choice of accessories for their attire.
- D. Each student who participates will cooperate with the class advisor and participate in all parts of the graduation ceremonies.
- E. Failure to comply with the above requirements may forfeit a student's privilege to participate in the graduation ceremonies.

IX. AWARDING DIPLOMAS POSTHUMOUSLY

At the request of a parent, guardian, or custodian, the district may issue a high school diploma to a deceased student if the student:

- Was enrolled in a public school in the district at the time of death
- Was deemed on-track to graduation before the time of death; and
- Died after matriculating into high school.

The high school diploma will bear the inscription "honoris causa" and may not be issued before the graduation date of the class in which the student was enrolled. The district is not required to award the diploma at the same ceremony or event as other students. The district may retroactively issue high school diplomas posthumously at its discretion.

X. WITHHOLDING OF A DIPLOMA

The district may withhold a student's diploma based on the student's damage to property in accordance with Board Policy 3250 – Student Fees, Fines, or Charges.

Any student discipline will be in accordance with Board Policy 3241 - Student Discipline. Student discipline may include denying the student's participation in graduation ceremonies. Such exclusion from graduation ceremonies is regarded as a school suspension. In such instances, the district will grant the diploma.
