The technology behind UniteGPS is the most advanced in the industry. Our service is provided by what is known as Software as a Service (SAAS). This means that our software is not located at your premises and never sits on your computers. Instead of our service running on servers and using up data storage at your school district, our company handles everything from our data center.

Your transportation department, school administrative staff, and parents need only log into the UniteGPS website, and everything is provided. SAAS applications in line with UniteGPS School Bus are on the cutting edge of versatility, speed and simplicity.

Route View

Here is where parents can track their child's bus journey when it's occurring in real-time

Click on the top dropdown to pull up a student's route

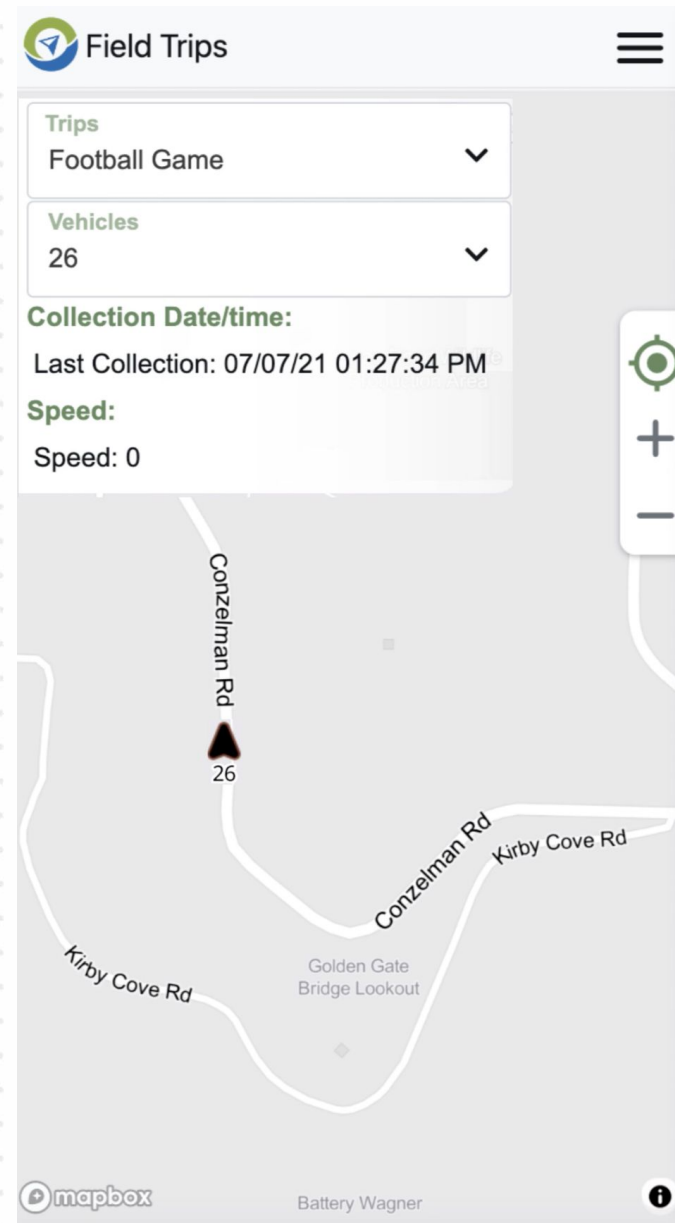

View the pickup location, pickup time, drop off location, and drop off time

Field Trips

Field Trips allows parents to follow their children's field trip or sporting event in real-time with data uploading every five seconds

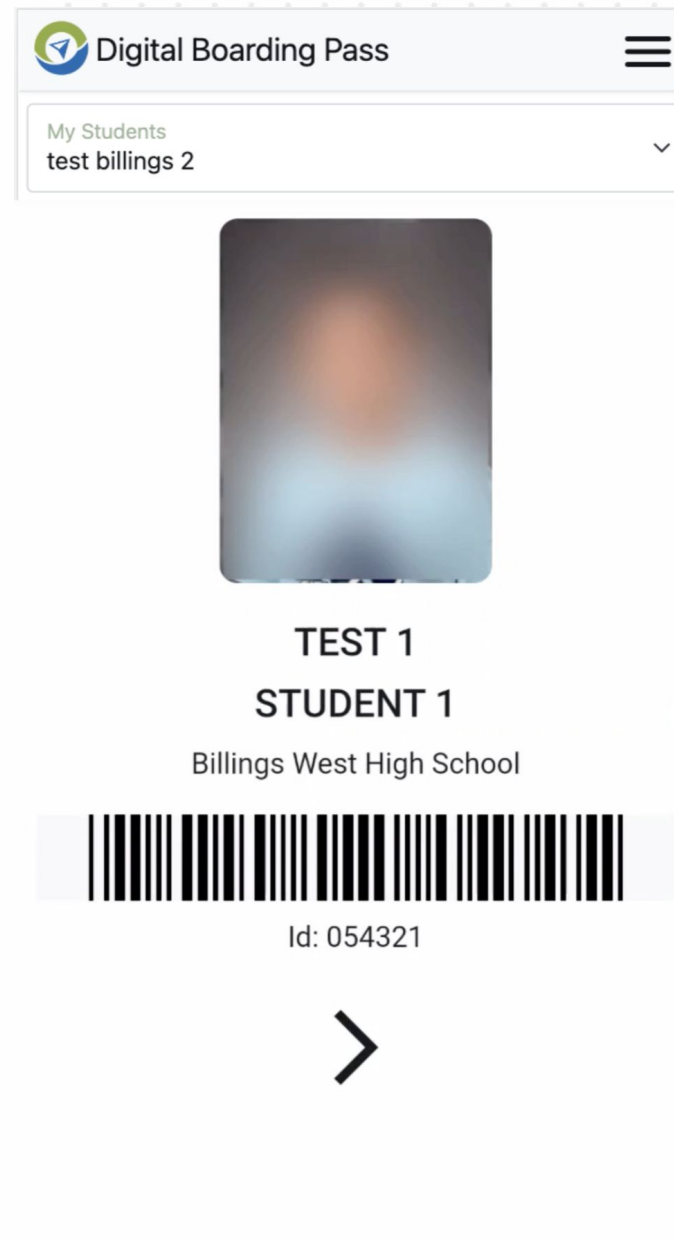

We see the vehicle assigned to the field trip, collection date and time, as well as speed when the trip is happening

Digital Boarding Pass

Allows students to board the bus via mobile phones

Parents with multiple children can switch between student passes by clicking on the My Students dropdown

Transportation Plan

Parents go here to view their children's assigned routes and bus stops

Each line on the list is an individual student route assignment

We see the student name, route, stop, ETA, the days in which the student is assigned to the route, and the driver
