Barrington School District Haddon Heights School District Lawnside School District Merchantville School District

Course Name: Social Studies

Grade: 5

Board Approved: AUGUST 2018

^{*}All curriculum is aligned with the NJSLS in accordance with the Department's curriculum implementation timeline and includes all required components (NJ.A.C.6A:8).

New Jersey Student Learning Standards for Social Studies INTRODUCTION

Social Studies

The digital age has transformed social studies education, allowing 21st-century learners to transcend the limits of time and place and experience historic events virtually. By expanding their learning networks through online collaboration with experts and other students from around the world, New Jersey social studies students develop an increased depth of understanding of our global society. At the same time, their understanding of the fundamental principles and values of American democracy and citizenship provides the conceptual framework that allows them to make informed decisions about local, national, and international issues and challenges.

Mission: Social studies education provides learners with the knowledge, skills, and perspectives needed to become active, informed citizens and contributing members of local, state, national, and global communities in the digital age.

Vision: An education in social studies fosters a population that:

- Is civic minded, globally aware, and socially responsible.
- Exemplifies fundamental values of American citizenship through active participation in local and global communities.
- Makes informed decisions about local, state, national, and global events based on inquiry and analysis.
- Considers multiple perspectives, values diversity, and promotes cultural understanding.
- Recognizes the implications of an interconnected global economy.
- Appreciates the global dynamics between people, places, and resources.
- Utilizes emerging technologies to communicate and collaborate on career and personal matters with citizens of other world regions.

Intent and Spirit of the Social Studies Standards

All students receive social studies instruction from Preschool through grade 12. The challenges of the 21st century are complex, have global implications, and are connected to people, places, and events of the past. The study of social studies focuses on deep understanding of concepts that enable students to think critically and systematically about local, regional, national, and global issues.

Authentic learning experiences that enable students to apply content knowledge, develop citizenship skills, and collaborate with students from around the world prepare New Jersey students for the 21st-century workplace. The natural integration of technology in social studies education allows students to overcome geographic borders, apply scientific and mathematical analysis to historical questions and contemporary issues, appreciate cultural diversity, and experience events through the examination of primary sources.

The New Jersey social studies standards and indicators reflect national and state standards and other documents published by the National Center for History Education, National Council for Social Studies, National Council for Geographic Education, Center for Civic Education, National Council on Economic Education, Mid-Continent Research on Education and Learning, National Assessment of Educational Progress, and the Partnership for 21st Century Skills.2

Social studies instruction occurs throughout the P-12 spectrum:

At the **Preschool** level, students participate in interdisciplinary activities that promote cultural awareness, sensitivity to individual differences,

and respect for diversity.

- In grades **K-4**, students learn fundamental concepts about government, citizenship, geography, economics, and history. The focus of instruction is on developing an understanding of core democratic values, the rights and responsibilities of American citizens, and how key people and events contributed to the development of the American heritage. Exploration of cultural universals enables students to realize how the availability of resources, the changing environment, and innovation impact everyday life.
- In grades **5-8**, students build upon K-4 foundational content. Through instruction in U.S. History and World History/Global Studies, they begin to analyze the implications of government structures and economic policies for individuals, communities, nations, and global relationships. The study of migratory patterns and belief systems that in the past led to cooperation and conflict among groups of people enable students to realize the significance of cultural transmission in today's global society. Relevant activities that help students connect content knowledge to current issues and that promote service learning empower students to become civic-minded and socially active.
- In grades 9-12, students continue to study U.S. History and World History/Global Studies. They consider historical viewpoints in order to analyze the role of the individual in society and the significance of fundamental documents to basic human rights. Socratic discussion groups and debate activities enable students to develop sound reasoning and effective communication skills. Opportunities to collaborate with students from around the world and experts in the field, and to develop innovative solutions to real world problems on the local, national, and global levels, mirror the 21st-century workplace and allow students to practice important career skills. By the end of grade 12, students have a heightened understanding of the cause-and-effect relationship between past and present events, recognize patterns of interactions, and understand the impact of events in an interconnected world.

Revised Standards

The 2014 Social Studies Standards provide the foundation for creating local curricula and developing meaningful assessments. Minor revisions were made to the 2009 Social Studies Standards for one of the following four reasons - to provide clarity, increase accuracy, adjust pedagogical expectations or to address grammatical issues. The revisions that were made are intended to clarify the document and do not reflect major changes to the standards. In addition, several new skills were added to the Skills Table to reflect the expectations of the New Jersey Student Learning Standards for English Language Arts & Literacy in History/Social Studies, Science and Technical Subjects.

The Role of Essential Questions

Key essential questions recur throughout the study of history. They provoke inquiry and lead to deeper understanding of the big ideas that enable students to better comprehend how the past connects to the present. The essential questions created for this project, which follow, were used to frame content goals and to inform the development of the cumulative progress indicators.

A. Civics, Government, and Human Rights

- How do citizens, civic ideals, and government institutions interact to balance the needs of individuals and the common good?
- How have economic, political, and cultural decisions promoted or prevented the growth of personal freedom, individual responsibility, equality, and respect for human dignity?

B. Geography, People, and the Environment

• How do physical geography, human geography, and the human environment interact to influence or determine the development of cultures, societies, and nations?

C. Economics, Innovation, and Technology

• How can individuals, groups, and societies apply economic reasoning to make difficult choices about scarce resources? What are the

- possible consequences of these decisions for individuals, groups, and societies?
- How have scientific and technological developments over the course of history changed the way people live and economies and governments function?

D. History, Culture, and Perspectives

- How do our interpretations of past events inform our understanding of cause and effect, and continuity and change, and how do they influence our beliefs and decisions about current public policy issues?
- How can the study of multiple perspectives, beliefs systems, and cultures provide a context for understanding and challenging public actions and decisions in a diverse and interdependent world?

Organization of the Standards

The organization and content of the 2014 social studies standards reflects N.J.A.C. 6A:8-5.1(a)1.iv., which requires at least 15 credits in social studies, including satisfaction of N.J.S.A. 18A:35-1 and 2; five credits in world history; and the integration of civics, economics, geography, and global studies content in all courses.

- Standard 6.1 U.S. History: America in the World applies to grades P-12; at the P and K-4 levels, content is organized by strand only; at the 5-8 and 9-12 levels, content organized by era and strand.
- Standard 6.2 World History/Global Studies applies only to grades 5-12; at both the 5-8 and 9-12 levels, content organized by era and strand.
- Standard 6.3 Active Citizenship in the 21st Century applies to grades P-12; at all levels (P, K-4, 5-8, and 9-12) content is organized by strand only.

Standard	Grade Level	Organization
6.1 U.S. History: America in the World	P-4	By strand only
	5-8	By era and strand
	9-12	By era and strand
6.2 World History/Global Studies	5-8	By era and strand
	8-12	By era and strand
6.3 Active Citizenship in the 21st Century	P-4	By strand only
	5-8	By strand only
	9-12	By strand only

The organizational scheme of the social studies standards highlights the interrelationship among government/civics, economics, and geography during each time period throughout history. (For a full listing of the eras studied, see the Social Studies Time frame Table.) In addition, the integration of social studies content and skills is essential for understanding and for developing habits of mind that are necessary for students to become informed citizens and contributing members of society. Thus, four key social studies skills (chronological thinking, spatial thinking, critical thinking, and presentational skills) have been identified and elaborated for the three K-12 grade clusters (K-4, 5-8, 9-12). These skills should be systematically integrated into instruction and assessed in conjunction with content. (See the Social Studies Skills Table).

STANDARD: 6.1 U.S. History: America in the World: All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.

Unit 1: Discovery		
ESTABLISHED GOALS	TRANSFER	
 ★ 6.1.8.B.3.d: Explain why New Jersey's location played an integral role in the American Revolution. ★ 6.1.8.B.3.a: Assess how conflicts and alliances among European countries and Native American groups impacted the expansion of the American colonies. ★ 6.1.8.B.2.b: Compare and contrast how the search for natural resources resulted in conflict and cooperation among European colonists and Native American groups in the New World. ★ 6.1.8.d.1.a: Compare and contrast gender roles, religion, values, cultural practices, and political systems of Native American 	Students will be able to independently use their knowledge to - Summarize the impact of religion and location on the founding of the New England Colonies (NJ) - Explain the reasons for the conflict between Spain and England. - Analyze why the English founded a colony on Roanoke Island. - Interpret the problems the first colonists encountered and how they solved them. - Explain how the Native Americans helped the Pilgrims. - Describe the types of governments set up in the 1st settlements. - Compare and contrast 1st settlements.	
groups.	М	EANING
	UNDERSTANDINGS	ESSENTIAL QUESTIONS
	 ★ Understand native American cultures patterns of and European settlement. ★ New Jersey is home to a rich variety of cultures that includes the Lenni-Lenape ★ Lenni-Lenape culture is evident for 10,000 years before settlers ★ Settlers overcame many challenges to survive and create the 1st colonies 	 ★ How did the first Americans adapt to their environments? ★ How did Europeans explore and establish settlements in the Americas?

Unit Duration: Instructional Days		
40 days		

STANDARD: 6.1 U.S. History: America in the World: All students will acquire the knowledge and skills to think analytically about how past and present interactions of people, cultures, and the environment shape the American heritage. Such knowledge and skills enable students to make informed decisions that reflect fundamental rights and core democratic values as productive citizens in local, national, and global communities.

Unit 4: War		
ESTABLISHED GOALS TRANSFER		
Students will be able to independently use their knowledge to		
★ 6.1.8.D.3.b: Explain why the Declaration of Independence was written and how its key	Understand wars were fought to gain independence	

principles evolved to become unifying ideas • of American democracy. ★ 6.1.8.D.3.c: Analyze the impact of George Washington as general of the American revolutionary forces and as the first **MEANING** president of the United States. ★ 6.1.8.D.3.d: Analyze how prominent UNDERSTANDINGS (can utilize content **ESSENTIAL QUESTIONS** individuals and other nations contributed to statement for this) ★ What principles of government are expressed in the causes, execution, and outcomes of the Students will understand that... the Declaration of Independence? American Revolution. ★ 6.1.8.B.3.d: Explain why New Jersey's ★ The Revolutionary War was fought to ★ How was the Continental army able to win the location played an integral role in the gain independence. war for independence from Great Britain? American Revolution. ★ The Declaration of Independence ★ 6.1.8.B.3.c: Use maps and other geographic outlines reasons for fighting and a tools to evaluate the impact of geography on principles for our new government. the execution and outcome of the American ★ Individuals chose to fight for either the Revolutionary War. Continental army or England. ★ The Continental Army had many heros from many different countries ★ Militias played a very important role in the revolution (New Jersey) ★ Alliances with France, Spain, and natives were essential to winning the ★ The Americans had great successes and bitter suffering throughout the war. ★ England sought peace with independence after nine years of war.

Unit 4: Grade 5 - Lessons

I. Lexington Concord Tweets

II. Hero Hall of Fame

III. Declaration Signer Facebook Page

IV. "All men are equal" poster

V. Visit a Revolutionary War site (Valley Forge,

Red Bank National Park, Trenton Barracks,

Washington's crossing, Revolutionary War

Museum, Independence Hall)

VI. Create a timeline of events (battles)

VII. Valley Forge/Morristown Letters Home

VIII. New Jersey Revolutionary War Sites tour.

IX. Mock debate between loyalists and patriots.

District/School Formative Assessment Plan	District/School Summative Assessment Plan
Formative assessment informs instruction and is ongoing throughout a unit to determine how students are progressing against the standards.	Summative assessment is an opportunity for students to demonstrate mastery of the skills taught during a particular unit.
Discussions with Peers in Small Groups/Pairs, Turn and talk	
Practice/Homework	
Strategic, H.O.T. (Higher Order Thinking) Questioning	Teacher created tests
Graphic Organizers	Individual/Group Presentations
