Eureka Mathematics Curriculum and Instruction Update

6/28/22

Cherry Hill
PUBLIC SCHOOLS

Mission Statement

We shall provide all children with an education that develops open-minded thinkers with the strong academic and interpersonal skills to thrive in an ever-changing world and make it a better place for all.

District Goal

Purpose and Passion:
Develop highly engaging learner-centered experiences within an environment that promotes voice, choice, and passion for learning.

Major Activities

As part of the Blue Print for Student Success, review and analyze the curriculum based on student achievement through the curriculum management and revision cycle.

Purpose of K-12 Mathematics

**Develop Deep
Mathematical
Understanding**

**Understand
and
Critique the
World**

**Experience
Wonder, Joy,
and Beauty**

**NATIONAL COUNCIL OF
TEACHERS OF MATHEMATICS**

How We Teach

What We Teach

Curriculum

**EUREKA
MATH[®]**

Courses	First Year of Implementation
Kindergarten - 5th grade	2019-2020
Math 6, 7, and 8	2021-2022
Algebra	2022-2023

New Jersey Student Learning Standards for Mathematics

“For more than a decade, research studies of mathematics education in high-performing countries have concluded that mathematics education in the United States must become substantially more **focused and coherent** in order to improve mathematics achievement in this country.”

**High School Algebra:
Arithmetic with Polynomials and Rational Expressions**

HSA-APR.A.1

Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.

1st Grade

Sue is writing the number 34 on a place value chart. She cannot remember if she has 4 tens and 3 ones or 3 tens and 4 ones. Use a place value chart to show how many tens and ones are in 34. Use a drawing and words to explain this to Sue.

tens	ones
4	3

|||||
|||
43

tens	ones
3	4

||||
||||
34 😊

2nd Grade

Example:

2 hundreds 6 tens 3 ones

4th Grade

- 1a. On the place value chart below, label the units and represent the number 90,523.

millions	hundred thousands	ten thousands	thousands	hundreds	tens	ones
		9	0	5	2	3

- b. Write the number in word form.

ninety thousand, five hundred twenty-three

- c. Write the number in expanded form.

$$90,000 + 500 + 20 + 3$$

5th Grade

c. 57.281

10 's	1 's	$\frac{1}{10}$'s	$\frac{1}{100}$'s	$\frac{1}{1000}$'s
5	7	2	8	1

$$57.281 = 5 \times 10 + 7 \times 1 + 2 \times \frac{1}{10} + 8 \times \frac{1}{100} + 1 \times \frac{1}{1000}$$

$$= 5 \times 10 + 7 \times 1 + 2 \times 0.1 + 8 \times 0.01 + 1 \times 0.001$$

Middle School

10^9	10^8	10^7	10^6	10^5	10^4	10^3	10^2	10^1	1	$\frac{1}{10^1}$	$\frac{1}{10^2}$	$\frac{1}{10^3}$	$\frac{1}{10^4}$	$\frac{1}{10^5}$	$\frac{1}{10^6}$	$\frac{1}{10^7}$
billions	hundred millions	ten millions	millions	hundred thousands	ten thousands	thousands	hundreds	tens	ones	tenths	hundredths	thousandths	ten thousandths	hundred thousandths	millionths	ten millionths

Write 125 in expanded form.

$$125 = 1 \cdot 10^2 + 2 \cdot 10 + 5$$

Write 432 in expanded form.

$$432 = 4 \cdot 10^2 + 3 \cdot 10 + 2$$

Add the expanded forms of problems 2 and 3 to find the total sum.

$$\begin{aligned} & (1 \cdot 10^2 + 2 \cdot 10 + 5) + (4 \cdot 10^2 + 3 \cdot 10 + 2) \\ &= (1 \cdot 10^2 + 4 \cdot 10^2) + (2 \cdot 10 + 3 \cdot 10) + (5 + 2) \\ &= 5 \cdot 10^2 + 5 \cdot 10 + 7 \end{aligned}$$

Find the sum $(x^2 + 2x + 5) + (4x^2 + 3x + 2)$. Combine like terms.

$$\begin{aligned} (x^2 + 2x + 5) + (4x^2 + 3x + 2) &= (x^2 + 4x^2) + (2x + 3x) + (5 + 2) \\ &= 5x^2 + 5x + 7 \end{aligned}$$

**High School Algebra:
Arithmetic with Polynomials and Rational Expressions**

HSA-APR.A.1

Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.

Guiding Principles for Mathematics Instruction

- All students can and should develop a belief that mathematics is sensible, worthwhile, and doable.
- All students are capable of making sense of mathematics in creative, interactive, and relevant ways.
- All students can and should engage in rigorous mathematics through rich, challenging tasks.

We all see Math DIFFERENTLY

Alina
 $1+2+3=6$

Calendar grid with numbers and small cards.

WHICH ONE DOESN'T BELONG?

$$2 + 4 + 8$$

$$6 + 11 + 5$$

$$7 + 6 + 7$$

$$2 + 9 + 4 + 3$$

Annie Easley

 | This one has all even numbers.

Hertha Ayrton

Alexander Diaz-Lopez

 | 11 is not a single number, It is a tens number, the other numbers are single numbers

Gertrude Blanch

 | I feel that this one doesn't belong because of a number in the 10's place instead of the ones place like the others.

Gloria Gilmer

 | This one has 4 numbers instead of 3.

Jagadish Chandra Bose

 | there have 3 number and 1 has 4 numbers
