SUBJECT LEARNING JOURNEY
Design Technology

INTENT

Within our Design Technology Department (DT, Food and Textiles), students are able to blend the creative and the practical using ingredients and materials to solve genuine, relevant problems within different contexts whilst considering their own and others' needs, wants and values. We encourage the development of high skills and resilience in a safe environment, allowing students to demonstrate commitment and act on feedback.

IMPACT

We foster awareness, understanding and expertise in those areas of creative thinking which can be expressed and developed through investigation, planning, designing, making and evaluating, working with materials and tools.
