Impact	Teacher and students will be able to measure progress using tracking sheets in wbooks. Assessments will use BTEC marking criteria, will be moderated through dept meetings it will be possible to measure progress over time this will highlight areas which the students are struggling with. Students are able to look for connections or links between the different areas.					
Literacy	Textbooks and Modules: Similar to the A-Level courses, students are required to read core textbooks and materials for each unit, covering subjects like human development, psychology in health, social care practices, and working with service users. Case Studies and Scenarios: Students read case studies and scenario-based questions that relate theory to practice. This helps them apply theoretical knowledge to real-world situations within health and social care settings. Government Guidelines and Policy Documents: Reading official guidelines, policies, and frameworks (e.g., safeguarding policies, health care regulations) is explicitly included to understand professional standards and protocols in the care sector.					
SMSC	Spiritual Development: Person-Centered Care and Individual Beliefs: Students are taught the importance of respecting individual beliefs and values in health and social care settings. This encourages students to understand and accommodate the spiritual needs of others when providing care. Care for the Whole Person: The concept of holistic care involves caring for a person's emotional, mental, spiritual, and physical needs, promoting students' reflection on what it means to support human well-being in its broadest sense.					
British Values	Mutual Respect and Tolerance: Respect and tolerance are central to this course, as students learn about person-centered care and the importance of treating people with dignity and compassion in health and social care settings. Students also study the effects of discrimination and how to provide inclusive care. Individual Liberty: The course emphasizes the rights of individuals to make choices about their own care, promoting autonomy and supporting clients' decision-making processes. This aligns with the value of individual liberty. Rule of Law: Students learn about the legal frameworks governing health and social care, including safeguarding policies, patient rights, and professional standards. The rule of law is essential in maintaining ethical standards in care and protecting					
Cultural Capital	Understanding of Health and Social Care Systems: This subject helps students understand how health and social care systems operate in the UK and globally. This knowledge is part of their cultural capital, especially as healthcare and social services are central to everyday life and public discourse. Exposure to Diverse Health Needs and Social Contexts: Students learn about the health needs of individuals from different cultural, religious, and social backgrounds. Understanding diversity in healthcare helps students develop cultural empathy and the ability to provide person-centered care, which is essential for social engagement and professional success in a multicultural society.
