Student Services

Student Organizations

Students enrolled at the Technology Campus have the opportunity to become members in student organizations. Student organizations have programs designed to develop leadership and skill competencies. Activities include participation in local, regional, state and national leadership and skill competitions relating to each student's program of instruction.

Students have an opportunity to become a member of the Technology Campus Chapter of the Illinois Association of SkillsUSA. The Tech Campus Chapter is the largest and most successful chapter in the state of Illinois. In order to become a member, the student must complete an application form and receive their instructor's written approval/recommendation and parent signature.

Student Lockers

In most Technology Campus program areas, each student assigned a locker for his/her personal possessions and individually owned tools and materials. Instructors in each program area assign these lockers and **distribute locker combination numbers to students.** Lockers should always be locked when not in use. All personal valuables (purses, wallets, etc.) should be locked up at all times. The Technology Campus maintains the right to search student lockers at any time an administrator feels it is warranted. The Technology Campus is not responsible for lost or stolen items. A student who withdraws from the Tech Campus during the school year must clean out his/her locker on his/her last day at the Campus. All students must clean out their lockers by the last day of attendance before summer vacation.

CROSS REF.: 7:140 (Search and Seizure)

ADOPTED: March 24, 2005
