Mathematics standards are focused mainly in grades 6-12 as there are no technology requirements in grades K-5. Standards for Mathematical Practice (MP) are also referenced as they encompass use of appropriate technology tools across various standards.

The Scope and Sequence identifies at which grade levels the skills need to be Introduced (I), Developed (D) and Proficient (P).

ISTE Student Standards Alignment

The student technology skills are grouped within the [ISTE Students Standards](#) categories defined below.

1. Empowered Learner (Foundational skills such as computer input devices, word processing, and troubleshooting)
