

An illustration of a classroom. On the left is a dark blue bookshelf with several books. On top of the bookshelf is a small globe. In the center, a long, thin light fixture hangs from the ceiling. On the right, a whiteboard is mounted on the wall, displaying a diagram of a circle with a horizontal line through its center, a triangle with a vertical line through its apex, and the equation  $2+2=4$ . Below the whiteboard is a wooden desk with a laptop, a stack of books, and a chair. The background wall is a light beige color, and the floor is a light green color.
