**Course Outline
U. S. History**

Date: October 2003

Subject Area: U.S. History

Proposed Grade Level(s): 11

Course Length: 1 Year

Grading: A-F

Number of Credits: 5/Semester

Prerequisites: None

BRIEF COURSE DESCRIPTION:

In this course, students apply knowledge gained in previous years of study to pursue a deeper understanding of major turning points in the shaping of the United States and the modern world. In addition, students draw upon their studies of world and United States history to examine current national and world issues and the growing interdependence of people throughout the world.

GENERAL GOALS/ PURPOSES:

United States History and Geography: Continuity and Change in the Twentieth Century

Students in grade eleven study the major turning points in American history in the twentieth century. Following a review of the nation's beginnings and the impact of the Enlightenment on U. S. democratic ideals, students build upon the tenth grade study of global industrialization to understand the emergence and impact of new technology and a corporate economy, including the social and cultural effects. They trace the change in the ethnic composition of American society; the movement toward equal rights for racial minorities and women; and the role of the United States as a major world power. An emphasis is placed on the expanding role of the federal government and federal courts as well as the continuing tension between the individual and the state.

Students consider the major social problems of our time and trace their causes in historical events. They learn that the United States has served as a model for other nations and that the rights and freedoms we enjoy are not accidents, but the results of a defined set of political principles that are not always basic to citizens of other countries. Students understand that our rights under the U. S. Constitution are a precious inheritance that depends on an educated citizenry for their preservation and protection.

Students will:

- Develop socio-political literacy to understand different political and social systems, the relationship between a culture and its laws, and the differences between democratic and non-democratic systems.
- Develop an understanding of different cultural values, belief systems, rights, and responsibilities inherent in participatory citizenship.
- Develop analytical, critical thinking, and study skills, which help students understand major national and international dilemmas occurring today.

STUDENT READING COMPONENT:

Students read from original and supplemental texts as well as primary source documents that are accompanied by reading strategies and followed by measurable tasks. Students answer questions to test their comprehension

of the content.

STUDENT WRITING COMPONENT:

Writing tasks are designed to develop skills that will help students better analyze historical events and the cause and affect of these events. Students practice by writing compositions, narrating pictures, and editing in order to communicate effectively and accurately.

STUDENT ORAL COMPONENT:

The oral component consists of cooperative learning presentation activities to practice using vocabulary, and grammatical structures to express comprehension of historical events.

DETAILED UNITS OF INSTRUCTION:

Each unit covers activities in communication, vocabulary, grammar and culture with focus on a specific theme. The following timeline/outline of state standards for instruction is a guide only.
