Habka

Chicago waxay isticmaashaa doorsoomayaal ka socda Sahanka Bulshada Mareykanka, oo ah sambal sanadle ah oo ay sameyso Xafiiska Tirakoobka Mareykanka. ACS waxay soo tabineysaa celcelis ahaan hal sano iyo celcelis ahaan 5 sano helitaan tirakoob ah. Xogta ugu dambeysay ee la heli karo waa tan 2018, marka celceliska sanadka 5 waxaa ku jira 2014 - 2018.

- Qoyska dakhliga hexdhexaadka ah
- Boqolayda guryaha ay dagan yihiin dadka iska leh
- Boqolayda qoysaska ay maamulo hal waalid
- Boqolayda qoysaska luuqaad aan Ingiriis ahayn looga hadlo
- Gaaritaanka waxbarashada - celcelis ahaan dhibcaha xogta 5 ee miisaanka
 - Aan haysanin dhibloomada sugsi sare (0.2)
 - Dhibloomada sugsi sare (0.4)
 - Qaar kuleej akhrista (0.6)
 - Shashaada koobaad ee jaamacadeed (0.8)
 - Shashaada koobaad ee jaamacadeed oo Sare (1.0)

Habka

Mid kasta oo doorsoomayaal ah ayaa loo kala qaadaa si loogu qoondeeyo boqolley kasto oo tirakoob kasta ah Shanta boqolleey ayaa markaa la isku daraa si loo helo qayb kasta oo tirakoob ah "dhibco dhaqan iyo dhaqaale ah". Iyadoo la adeegsanayo xogta ACS ee boqolleyda carruurta da'da dugsi gaadhay, tirakoobka ayaa markaa la siiyaa "heer" oo leh boqolkiiba isku mid ah ardayda tier kasta (25% heerka 1, 25% heerka 2, 25% heerka 3, 25% gudaha tier 4.) Heerka1aad wuxuu muujinayaa astaamo tirakoob oo leh dhibcaha dhaqan-dhaqaale ee ugu hooseeya.

Fiiro gaar ah: Chicago sidoo kale markii dambe waxay ku dartay halbeeg waxqabadka dugsi xisaabinta dhibcaha dhaqan-dhaqaale. Waa celcelis miisaankeedu yahay waxqabadka imtixaannada qiimeynta gobolka ee ku saleysan tirada ardayda dhigata dugsiyada ku jira habka tirakoobka. Fudeyd dartiis, tan laguma darin falanqaynta tarjumaha halkan lagu sameeyay, maadaama aan u baahanahay inaan gaarno Boston iyo MA go'aamo gaar ah.

Khariirada Shuruudaha Boston

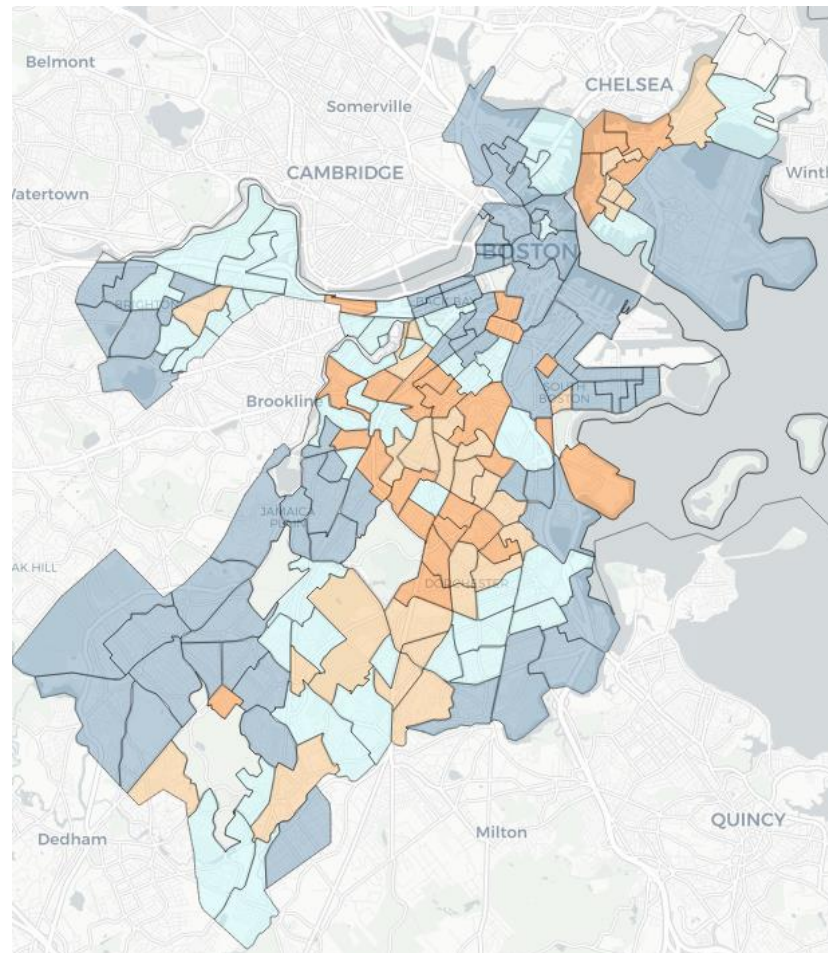

Heerarka waxaa lagu sameeyaa heerka marinka tirakoobka. Tirada dabagalka ee heer kasta waxay la xiriiraan boqolleyda carruurta da'da iskuulka ku jirta, sida lagu go'aamiyey Sahanka Bulshada Mareykanka.

Heerka 1 (baahida ugu badan) = 27 qeybood

Heerka 2 = 29 qeybood

Heerka 3 = 47 qeybood

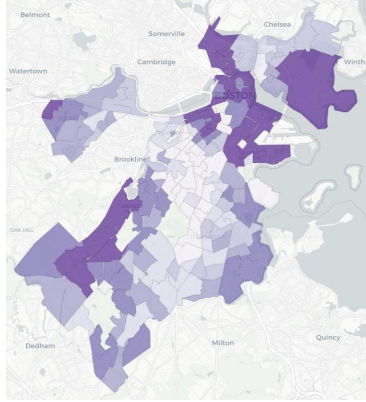

Heerka 4 = 65 qeybood

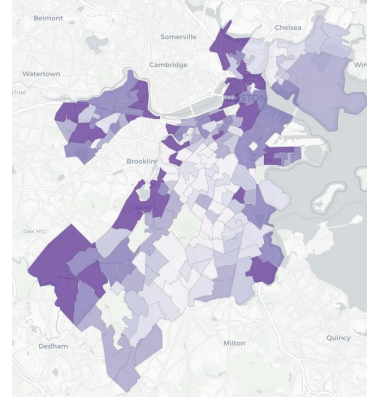

Khariidad kastaa waxay soo bandhigaysaa qeybaha u taagan boqolleyda marin kasta oo tirakoob ah oo loogu talagalay isbeddel kasta. Tirooyinka madoow ayaa matalaya boqolleyda sare.

FIIRO GAAR AH: qoysaska waalid keli ah iyo qoysaska luuqad aan Ingiriisiga looga hadlin lagu beddelo lambar.

Doorsamayaasha Heerka dhibcaha ee Dugsiga Chicago

Celcelis miisaankeedu sarreeyo ee dugsiyada dhibcaha iskudhafan ee imtixaanka guud.

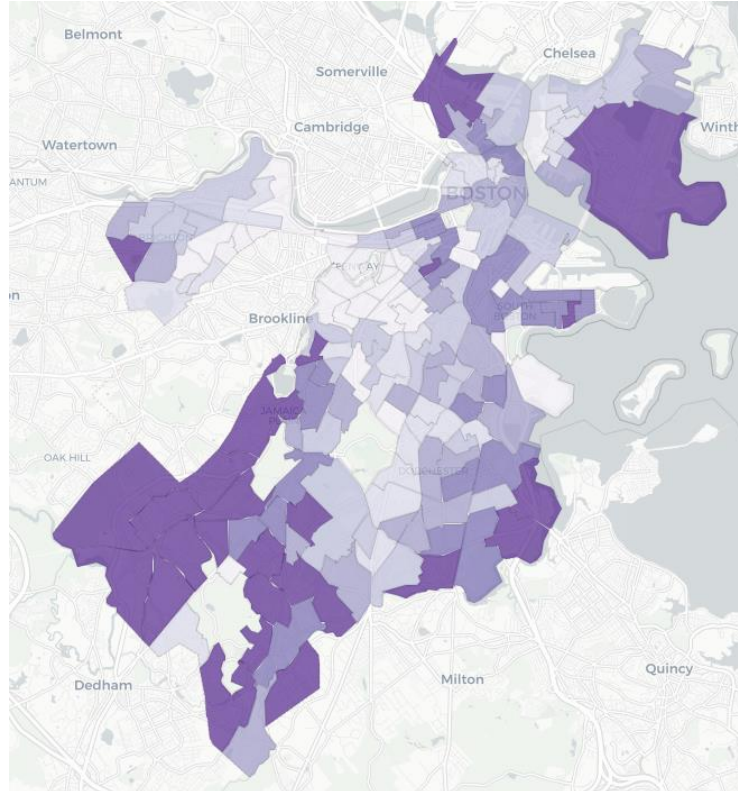

Tusaale: aan dhahno waxaa jiray 300 oo arday oo aasaasi ah qayb la siiyay, dhammaantoodna waxay aadeen mid ka mid ah laba iskuul. Boqol ka mid ah ardaydu waxay aadeen dugsi leh buundooyin isku dhafan oo ah 75 iyo 200 oo arday ayaa aadey dugsi leh dhibco isku dhafan oo ah 60. Celceliska dhibcaha isku dhafan wuxuu noqon doonaa 65.

$$\text{Doorsoomaha Dhibcaha Dugsiga} = (100/300)*75 + (200/300)*60 = 65$$
