## Tips to Engage Your Children At Home

- Bake cookies or work on a home improvement project. Real-world applications of mathematical ideas, especially measurement, are everywhere!
- Go on a shape hunt! Look around your home or community for shapes. Tally up how many of each shape you found.
- Play strategy games such as monopoly, checkers, or chess.
- Engage in conversations that support strategic thinking.
- Have your child set the table at dinner. Setting the table involves matching the number of plates to napkins and utensils, introducing / enforcing one-to-one correspondence.
