

What We're Learning

KINDERGARTEN

Objects and their Attributes

The main focus of this unit is sorting, classifying, and describing objects based on their attributes (e.g., size, shape, color, thickness).

How are they alike? Different?

FIRST GRADE

Sorting and Classifying Objects

The main focus of this unit is analyzing and sorting objects in their environment based on their attributes with a focus on plane figures.

SECOND GRADE

Measurement

The focus of this unit is to introduce the standard units of measurement for length, weight/mass and volume. Students explore why we use standard units of measurement, how to select an appropriate unit of measure, and what tools to use based upon the attribute being measured.

I estimate that it will take 16 cups to fill this container!

I estimate that it will take 3 quarts to fill this container!
