

C-25039 IT Equipment Recycling Services

IT Equipment Recycling Services will be provided for all the District's buildings and schools. All items to be recycled are no longer of use to the District, or are not in working order, so they have no value to the District. Items may have residual value for recycling purposes. The advantages of this service to the District is that we will not have to store these items for long periods of time and it will save District staff from picking them up and sorting them. The company will issue payment to the District based on type of item and weight of items picked up.

The District received ten responses. Each proposal was evaluated based on price, experience, transportation pickup, hard drive destruction and fee/charges. The response from Vantage Point ITAD, Inc. provided the most advantageous offer to the District.
