Find yourself at Great Oaks

Programs at Great Oaks are organized by career paths. If you are interested in one program in a path, you might want to check out the other related programs as well. *For example, you may love cars and are considering Automotive Service Technician. You may want to look at other transportation programs in the Building path – Automotive Refinishing & Collision Repair, Aviation Exploration, Aviation Maintenance Technician & Engineering and Industrial Diesel Mechanics.*

You'll notice that these paths are color-coded to make it easier for you to find related programs.

BUILDING PATH

- SCIENCE, TECHNOLOGY, ENGINEERING & MATHEMATICS
- Alternative/Electric Vehicle Technician 16
 - Engineering Technologies & Robotics ... 42

- MANUFACTURING
- Manufacturing Engineering Technology 68
 - Welding & Fabrication 76

- ARCHITECTURE & CONSTRUCTION
- Commercial & Residential Electricity ... 28
 - Construction Technologies 30
 - Heating, Ventilating & Air Conditioning ... 56
 - Heavy Equipment Operations 58

- TRANSPORTATION, DISTRIBUTION & LOGISTICS
- Automotive Refinishing & Collision Repair 20
 - Automotive Service Technician 22
 - Aviation Exploration 24
 - Aviation Maintenance Technician & Engineering 26
 - Industrial Diesel Mechanics 60

CREATIVE PATH

- COMMUNICATION ARTS

Nondiscrimination and Equal Opportunity in Educational Programs and Activities

The Great Oaks Career Campuses provide equal educational opportunities for student admission and participation in services, programs, and activities sponsored by the District. It is the policy of the District not to discriminate, in violation of federal or state law, on the basis of race, color, national origin, ancestry, religion, sex, age, or disability in admission to, access to, or receiving benefits from any service, program, or activity sponsored by the District.

Section 504 is a federal law, which prohibits discrimination against persons with disabilities. The law provides:

No otherwise qualified individual with a disability... shall, solely by reason of her or his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance... 29 USC § 794

One of the principal purposes of Section 504 is to ensure that students with disabilities are not denied access to educational facilities, programs, and opportunities on the basis of their disability. The District expects its employees to be knowledgeable about its Section 504 procedures. If you have Section 504 questions concerning either current or prospective students, please contact the Director of Student Services. If you are a student with a disability and need a modification to any of these procedures because of your disability, please contact our Director of Student Services.

New programs for 2025-26

In response to input from our business and industry partners about in-demand jobs, Great Oaks is launching two new programs in 2025.

NEW!

BUILDING PATH

Alternative/Electric Vehicle Technician

This program explores technology in motion. Students prepare for careers in manufacturing, installing and maintaining alternative and electric power sources. During senior year, students will build an electric vehicle as a capstone project.

More info on page 16.

NEW!

NATURE PATH

Park & Recreation Management

This program focuses on the creation and management of public recreational spaces. Students learn about the protection of plants and animals, alongside the business aspects needed to run a successful recreational facility.

More info on page 70.

New program names

Same great program but with a new name to reflect course updates –

- **Practical Nursing** is now **High School Practical Nursing**, a pathway option with Health Academy at Scarlet.
- **Coding and Web Design** is now **IT Academy** at Diamond.
- **Coding and Web Design** is now **Information Technology** at Scarlet.

More program locations

Due to increasing demand current programs expanded to additional campuses.

- **Dental Assisting** is now offered at Diamond.
- **Welding & Fabrication** has added second labs at Diamond and Laurel.

Consider your options

Maybe you know exactly what you want to do in life or you may not know what options you have. Either way, we can help.

If you already know what field you're interested in, take a look at page 4. Similar programs are color-coded, so you can look at the variety of options in your field.

Not sure? Check out **Is this you?** on each program page to find ones that match your talents and interests.

For more information, including videos and future career options, use the web address displayed on each page or greatoaks.com/career-options.

Additional resources

Great Oaks is right for you.

- ★ You want a head start on your future.
- ★ You want to earn professional credentials.
- ★ You want to earn college credit in high school.

How successful are Great Oaks graduates?

The Ohio Department of Education has established Performance Measures for Career and Technical Planning Districts, such as Great Oaks, that provide career and technical education. The measures help the districts to continually improve their programs and services.

Performance Measures for Class of 2023

(Most recent year available)

93.6%

of the class of 2023 are working and/or pursuing further education

(Positive Post Program Placement)

53.6%

of the class of 2023 were enrolled in a class that offered college credit

18.6%

of the class of 2023 earned an honors diploma

Students gain hands-on training in career labs

Half of each school day is spent in your career program, while the other half is spent in academic classes (with time for lunch, of course).

Most students take four academic classes (mathematics, English, science, and social studies). Some students may substitute JROTC (where available) for one academic class. You may also qualify for College Credit Plus classes in which you can earn college credit while completing high school requirements.

In your lab, much of the time will be spent in hands-on work. If you're a Digital Arts and Design student, you'll be creating and designing. Interested in Culinary Arts? You'll be in the kitchen.

The work you do in your career lab will be under the hood of a car, in a hospital room setting, in the cockpit of a Cessna, at a programmable manufacturing lathe, or whatever setting you've chosen as a possible career field.

You can also be involved in student leadership activities on campus and in career-technical student organizations (CTSOs).

When your day at Great Oaks is finished, you can also stay involved in activities at your home high school – sports, theater, clubs, and more.

Laptop program

All Great Oaks high school students are eligible to receive a laptop computer to use while enrolled in a campus-based program! That means each student will have a computer to use for class work, lab work, and homework – access to technology 24 hours a day, seven days a week. Technical support is available at each campus during school hours.

Great Oaks is right for you.

- ★ You are interested in a career field and want to explore it *now*.
- ★ Hands-on learning from experienced professionals is important to you.
- ★ You want to graduate with options, ready for a career *and* college.

Questions and answers about Great Oaks

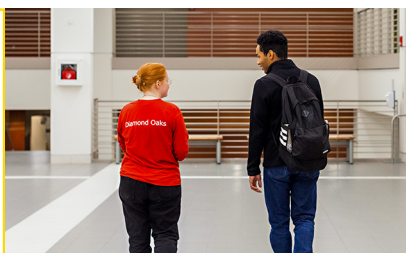

Great Oaks is a career-technical high school in southwest Ohio, serving 36 partnering school districts. Four Great Oaks campuses offer high school programs: Diamond Oaks on the west side of Cincinnati, Laurel Oaks in Wilmington, Live Oaks in Milford, and Scarlet Oaks in Sharonville. At these campuses, you may choose from more than 30 programs. You complete them as you prepare for continuing education, the workplace, and/or the military.

Great Oaks allows you to focus on a specific career field while still in high school and to earn college credit and industry credentials. Experience a career field to decide whether you want to continue it in the future (instead of deciding after a year or more of college). It's a chance to get a head start – or a fresh start. It's a chance to start an in-demand career without debt.

These pages answer the most common questions we get. If you have other questions, we hope you'll call or email us. See contact info on back page.

How much does it cost to attend Great Oaks?

Great Oaks is a public school district offering a free public education. Some programs require students to purchase uniforms. Financial assistance for uniforms may be available for students in need.

Do I have to attend the campus nearest to my high school?

No. Your current school is assigned to the nearest campus, but if an opening exists in your chosen program at a different campus, or if you're

interested in a program that is only offered at another campus, you may apply there.

Can I attend half-day?

Check with your school counselor to see if this is an option for you.

Individualized Education Program (IEP). Great Oaks staff focuses on developing employability skills, content knowledge, and student independence to ensure students are successful and prepared to take the first steps into a career.

Great Oaks is right for you.

- ★ You like to make new friends.
- ★ You want to learn with people who have the same career interests.
- ★ You want a chance to meet others in academic classes and other activities.

Does Great Oaks provide programs and services for students with special needs?

Yes. Intervention Specialists support and coordinate services between the student, parent, partnering high school, other agencies, and Great Oaks staff as outlined in the

How will I get the academic credits needed to graduate?

At Great Oaks, you can earn two or more credits in each subject area of math, English, science and social studies during your junior and senior years.

I am not sure about my future career. Why should I choose Great Oaks?

Many students are interested in particular career fields, but aren't sure if that's what they want to do with their lives. Great Oaks gives students the chance to explore a career before they go to college – a much less expensive option than deciding to change programs after a year or more of college. Of course, many students also discover that the Great Oaks career program they've chosen is right for them. Many graduates can immediately begin good careers or continue in apprenticeship programs.

Is transportation provided to the campuses?

Partnering schools typically provide

transportation to their nearest Great Oaks campus. Students may also drive to school, and parking is free. Ask your current school counselor any questions you may have about transportation.

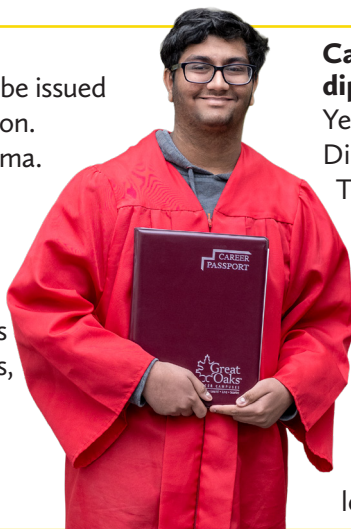

Is it possible to go to college after Great Oaks?

Yes! Many Great Oaks graduates go directly to college, often with college credit they earned during high school. For instance, College Credit

Plus courses offered at Great Oaks campuses. Students who successfully complete specific career and technical courses are eligible to have technical credits transferred to public colleges and universities in Ohio. More information about this opportunity can be found at bit.ly/OhioHigherEd. Many Great Oaks students have found that, with the certificates they have earned, employers may pay for college or continuing education. See page 13.

Who will issue my diploma?

Upon graduation, your diploma will be issued by your high school at your graduation. Great Oaks does not issue the diploma. However, we do have a special end of year ceremony for each campus where you will receive a career passport containing all of the things that you earned while at Great Oaks such as career industry certifications, credentials, college credits, and a resume highlighting your career experience and accomplishments.

Can I earn an honors diploma?

Yes. The Honors Diploma and Career-Technical Honors Diploma are available for high-achieving students who qualify. Talk to a Great Oaks counselor or go to hs.greatoaks.com/honors-diploma to learn more.

Join groups here or at home schools

Great Oaks offers lots of ways to get involved. You can join clubs, take on leadership roles, and participate in activities both at Great Oaks and your home school. Plus, all Great Oaks students are part of a career-focused club with opportunities for leadership, competitions, and fun.

Great Oaks is right for you.

- ★ You want to stay connected with old friends and make new friends.
- ★ You plan to stay active in sports, clubs and other activities at your affiliate school.

Organizations to join

BPA (*Business Professionals of America*)

For business and information technology career programs.

FCCLA (*Family, Career & Community Leaders of America*)

For early childhood education career programs.

For trade, industry and food programs.

NTHS (*National Technical Honor Society*)

NTHS is the career-technical education recognition of outstanding student achievement.

Great Oaks

Next Ready Great Oaks students are well-rounded individuals prepared for success. They excel at clear communication, critical thinking, and adaptability. They demonstrate accountability, professionalism, and a strong work ethic. Our students are equipped to thrive in a ever-changing world and make a positive impact.

EFFECTIVE COMMUNICATORS

- Provide clear oral and written communication.
- Listen actively, read body language/tone, and respond in a clear/professional way.
- Give/take feedback in a professional manner.
- Recognize how people are feeling, know that actions impact others, and work through disagreements.

CRITICAL THINKERS

- Locate, organize, and use reliable information while considering different perspectives.
- Analyze problems, develop creative solutions, and apply learning to work and life.
- Take calculated risks, persevere through challenges, and find ways to succeed.
- Reflect on learning and communicate thinking processes.

Get a jump start on your future

Earn industry credentials

Great Oaks can help you get a head start on your career. Many of our programs offer industry certifications and licenses that other people don't get until after high school. These credentials show employers you have the skills they need. You can find out which credentials

are offered on each program page.

Earn credits for college

You can earn college credit for Ohio public colleges and universities by completing some Great Oaks career programs! Through the Ohio Transfer to Degree Guarantee program, students who finish an approved program and earn industry certification are eligible for college credit, often referred to as Career-Technical Assurance Guide (CTAG) credit. The statewide credit transfer is available at any Ohio public college or university that has a program in the career field you studied at Great Oaks.

For details, visit transfercredit.ohio.gov.

Make professional connections

Great Oaks career programs are connected to local businesses and industry. Every program at every campus has a Business and Industry Advisory Council (BIAC), a group of leaders in the field who help choose equipment, review the curriculum, and talk with students about career opportunities. More than 1,200 professionals make up the BIACs at Great Oaks, so students can make connections even before they graduate.

Great Oaks is right for you.

- ★ You like to learn from professionals in your career field.
- ★ You are ready for real-world situations.
- ★ You want to make contacts with potential employers.

Next Ready

ADAPTABLE NAVIGATORS

- Understand the world is constantly changing and keep learning/adapting.
- Consider different perspectives and shift as necessary.
- Adjust quickly when things change unexpectedly.
- View challenges as opportunities to learn and grow.

ACCOUNTABLE EMPLOYEES

- Take ownership of decisions, actions, and mistakes.
- Keep promises, make ethical choices in all situations, and build trust/respect.
- Share relevant information and promote open communication/collaboration.
- Strive to do the right thing, even when faced with tough choices.

SKILLED PROFESSIONALS

- Set a positive example in all situations.
- Exceed minimum requirements and take pride in work.
- Master career content and skills with confidence.
- Develop skills/dedication to compete and grow in the workforce.

Step into the real world with work-based learning

The first job is often the toughest to get, especially when you don't have experience. At Great Oaks, you have the chance to get real world experience while still in high school.

Seniors who qualify can begin working in their career field while still in school. Each year, hundreds of seniors attend Great Oaks for academic classes and then spend the rest of their day starting their career. They're learning, getting high school credit, getting valuable experience, and often earning a paycheck.

In some fields, students can begin apprenticeship programs in high school that allow them to complete their apprenticeships after graduation faster.

Many employers offer full-time jobs to student interns after they graduate, as well.

On Signing Day, hundreds of seniors commit to their new careers by signing on with area employers.

Job Board

Be ready for real-life success. Great Oaks has a job posting database with more than 500 area businesses registered!

See jobs.greatoaks.com for more information.

NEW!

Alternative/ Electric Vehicle Technician

Available at: Laurel

The Alternative/Electric Vehicle Technician program is an exciting new two-year exploration of technology in motion. The program prepares students for careers in manufacturing, installing and maintaining alternative and electric power sources for everything from electric bikes and scooters to forklifts, cars, SUVs, buses and even semi-trucks. In this engineering pathway, students will focus on AC/DC current drives and mechanisms in the first year, and then pneumatics and hydraulics with a capstone project of building an electric vehicle during their senior year.

What you'll learn

- Regulations, electrical safety procedures, and practical skills to operate and repair recreational, retail, commercial EV-powered equipment.
- Operations, management principles, and logistical aspects of sales, service and rental of EV-powered equipment.
- Essential topics EV theory or operation and various EPA regulations, related to the battery, charging and traction control systems.
- Students will learn about the heart of an EV vehicle, the battery, including proper charging, repair and maintenance.

Courses

- CORE/safety
- AC/DC electric circuits
- Mechanisms and drives
- Hydraulic and pneumatic systems
- Capstone project senior year

Is this YOU?

- Working with my hands is my passion
- I like to work on cutting-edge, electric-powered equipment
- I like to solve problems
- I am detailed in my work

Internship Opportunities

- Students will have the chance to intern with various EV companies to gain real-world experience and build professional networks.

Extracurricular Activities

- EV carting
- BattleBots
- Field trips to local MHE and industrial truck dealerships
- Tours of manufacturing plants

Upon Graduation

- Graduates will be equipped with the necessary skills and certifications to pursue careers as an EV technician or manufacturing assembler.
- Students can also get additional training for after graduation to obtain EV ASE and High voltage battery and Charging certifications to work on Electric cars / Trucks batteries and chargers.

Animal Science & Management

Available at: Laurel, Live

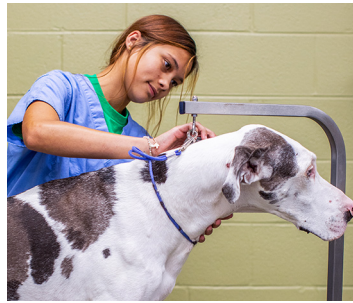

Animal Science & Management provides you with the foundation you need to work with animals. You will learn about nutrition, disease prevention and treatment, and how to care for and handle a wide variety of animals. You'll also learn essential business management and customer service skills. This program can prepare you to work in a veterinary hospital, pet store, grooming salon, lab research facility, kennel, or animal training facility.

Is this YOU?

- I love animals
- I have good physical stamina
- I like to work flexible hours
- I am self-motivated

Automotive Refinishing & Collision Repair

Available at: Diamond, Laurel, Live, Scarlet

Steady hands, mechanical skill, and an artistic eye are all important in the field of automotive collision technology. Here you'll learn to repair, replace and refinish auto bodies. You'll replace glass, paint, weld metal, do final detailing, remove and install panels, and fix dents and plastic. You'll even learn to prepare estimates. With that knowledge, you can earn the certification to be a collision technician and do auto body and frame repair, painting, and finishing. Learn more about the field at I-Car.com.

Is this YOU?

Aviation Exploration

Available at: Live

The Aviation Exploration Program is an exciting new two-year journey that prepares students for careers in managing all things flight – from the ground to the cockpit. You will master the art of flying drones by earning an FAA Commercial Drone Operator’s License, delve into the intricacies of airport management, and gain invaluable hands-on experience toward earning a portion of the sought-after FAA Airframe and Powerplant certificate, a steppingstone to becoming an aircraft maintenance expert. Finally, you will work toward obtaining an FAA Student Pilot Certificate. The sky’s the limit.

Is this YOU?

- Planes are my passion
- I like to work on a team
- I like to solve problems
- I am precise

Aviation Maintenance Technician

Available at: Diamond, Laurel

As an aviation technician, it's your job to make sure every flight is safe and successful. From small planes to jumbo jets, proper maintenance, repair, and upkeep is essential. In the Aviation Maintenance Technician program, you'll learn about airframes, hydraulic and pneumatic systems, communications systems, engines, basic welding, and more. You can earn FAA Airframe Mechanic certification and start working right after graduation, or continue and earn additional FAA certifications/training.

Commercial & Residential Electricity

Available at: Diamond, Scarlet

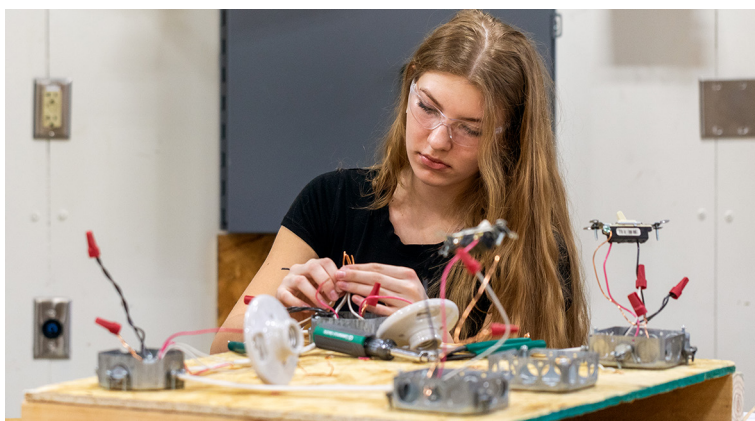

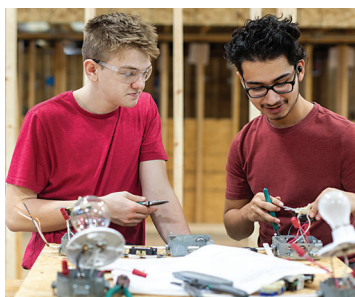

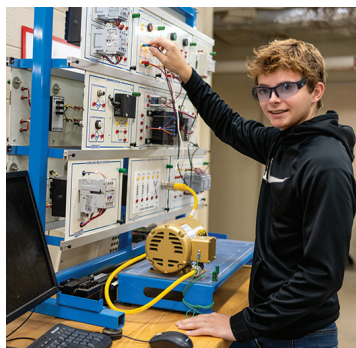

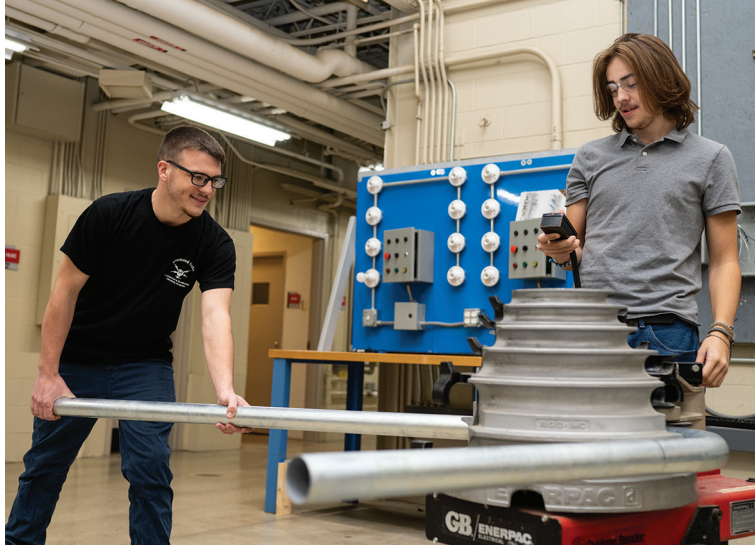

Working with electricity is much more than installing wiring. You'll learn to read and interpret prints and building plans, install and troubleshoot motor controls, use hand tools and power tools, and use programmable logic controllers. Our lives depend on electricity, and electricians put together systems that power the smallest homes and largest buildings, and make everything operate – from smartphones to entire communities.

Exercise Science & Sports Medicine

Available at: Diamond, Laurel, Live, Scarlet

Do you like helping people become the best version of themselves? As a student in this program, you'll learn prevention, recognition, rehabilitation, and treatment of various injuries. You'll also develop exercise and nutrition programming and learn the skills to perform fitness testing and health appraisals. Through certifications in this program you can become a personal trainer or physical therapy aide directly after high school. You may also choose to continue your education to become a licensed athletic trainer, physical therapist, or physician's assistant.

Health Academy

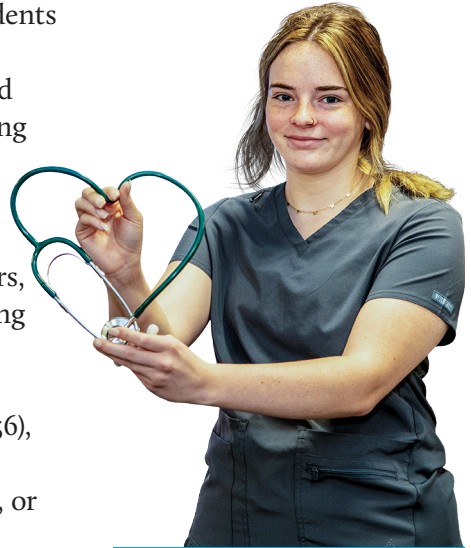

Available at: Scarlet

The Health Academy is a unique opportunity for students to explore various health career fields and continue in a health care pathway that aligns with their short- and long-term goals. You will spend the first semester learning fundamental skills in safe, effective patient care and building your medical vocabulary. You also will prepare to certify as a Certified Nursing Assistant (CNA). CNAs work in settings like patient homes, rehabilitation centers, hospitals, clinics, adult daycare centers, and assisted living facilities.

At the semester break, you will choose one of two pathways. In the Health Technology program (see page 56), you prepare for certification in high-demand areas like patient care technician, medical assistant, phlebotomist, or EKG technician.

If eligible for High School Practical Nursing, you will learn fundamentals in patient care, data collection, human development, pharmacology, and medication administration. You will apply these skills in a real-world clinical setting. The High School Practical Nursing pathway prepares you to take the National Council Licensure Exam (NCLEX-PN). Passing the exam results in certification as a licensed practical nurse (LPN).

Is this YOU?

- I am sharp
- I am friendly
- I am dedicated
- I care
- I solve problems

Health Academy Progression

Practical Nursing

Available at: Scarlet through Health Academy

As one of two tracks in Scarlet's Health Academy (page 52), High School Practical Nursing might be for you. You will learn nursing fundamentals including patient care, data collection, human development, pharmacology, and administering medications. You will apply your skills in a real world clinical setting. The program prepares you to take the National Council Licensure Exam (NCLEX-PN); pass it and you will receive your license as a Licensed Practical Nurse (LPN) and can begin working right away. Many students choose to continue their education in an associate or bachelor's registered nursing program.

Health Technology

Available at: Scarlet through Health Academy

As one of two tracks in Scarlet's Health Academy (page 52), Health Technology provides a broad-based knowledge of the healthcare field and associated careers. This is a great option for students who aspire to be in the healthcare field, but may not know which path they would like to pursue. You will have the opportunity to learn many technical skills, such as patient care, medical terminology, and infection control. In this track, you can earn up to five certifications: medical assisting, phlebotomy, mental health technician, and physical therapy aide. These will allow you to start working in a medical facility right away. You may also choose to continue your education and pursue another career in the medical field, such as nursing, radiology, physical therapy, or pharmacology

Manufacturing Engineering Technology

Available at: Live

In the 21st century, manufacturing is a combination of Engineering, technology, and hand/eye coordination. Creating parts and products may require you to program a Computer Numeric Control (CNC) machine or use a 3-D printer. In Manufacturing Engineering Technology, you will learn the technical skills that are in demand in southwest Ohio and across the country.

Is this YOU?

- I am visual
- I am mechanical
- I am precise
- Technology fires my imagination
- I enjoy science

NEW!

Park & Recreation Management

Available at: Live

The Park & Recreation program at Live Oaks will teach you how to create and manage public parks and green spaces. You'll learn about different types of trees and how to care for them, as well as how to manage wildlife and protect natural resources. You'll also study business and marketing to understand how to run a successful park or recreation facility. You'll practice using tools like chainsaws and ropes for tree care, and you'll learn about environmental regulations and safety procedures. By the end of this course, you'll be prepared to design, operate, and maintain public recreational spaces.

What you'll learn

- Environmental career opportunities
- How to work with local green-industry professionals
- Preserving and enhancing natural areas
- How parks and nature preserves operate

Courses

- Natural Resources
- Business Management for Agricultural and Environmental Systems
- Park and Recreational Management
- Urban Forestry

Is this YOU?

- I'm passionate about the environment
- I love to work outdoors
- I want to make a difference
- I am a creative problem-solver

Cross-curricular learning

Program Collaboration

- Animal Science
- Heavy Equipment Operations
- Veterinary Assisting

Academic Connection

- Chemistry Environmental Science
- Zoology

Industry partner collaborations

- Park and green space management
- Connecting people with nature
- Native tree and plant production
- Land management and restoration
- Soil science, water management and invasive plant removal
- Natural area restoration and management

Surgical Technology

Available at: Diamond, Scarlet

Being organized and detail-oriented are important qualities in this program. You'll learn sterilization methods and identification of surgical instruments, supplies and equipment. You will also be able to demonstrate basic surgical care preparation skills and use medical terminology and documentation. At the end of this program you'll be eligible to take the test to become a sterile processing technician. If you decide to continue your education, you could pursue a career as a surgical technologist or surgical assistant.

Is this YOU?

- I am organized
- I am detail oriented
- I am a team player
- I care

Veterinary Assisting

Available at: Diamond, Live, Scarlet

Love for animals and taking care of them is key to veterinary assisting. You'll learn all aspects of working in a veterinary office, from assisting with treatment procedures to prepping for surgery, conducting lab tests, and maintaining animal health care records. Maintaining proper sanitation and being willing to work hard is extremely important. Start working as a veterinary assistant or kennel staff member after high school or continue your education to pursue other careers in animal care.

Is this YOU?

- I love animals
- I am compassionate
- I have stamina
- I am devoted
- I will do what it takes

Welding & Fabrication

Available at: Diamond, Laurel, Live, Scarlet

Precision and excellent hand/eye coordination are important for the welding program. You'll learn various types of welding and cutting operations, as well as fabrication, quality control, and weld testing. You will even learn to read and interpret blueprints. Through this program you will have the opportunity to become a certified welder. Other career pathways might include welding inspector, metal fabricator, or sales.

Is this YOU?

- I am mechanical
- I have good eye-hand coordination
- I am precise
- I have strong math skills

CareerX

Available at: Diamond, Laurel, Live

CareerX is a dynamic Career Exploration and Employability Skills program designed for students with special needs. This one-year transition lab introduces participants to a wide range of entry-level work options while helping them align their skills and interests with potential career paths. Through a series of engaging activities and site visits, students will refine their interests, skills, and aptitudes, ultimately paving the way for their next steps toward competitive employment.

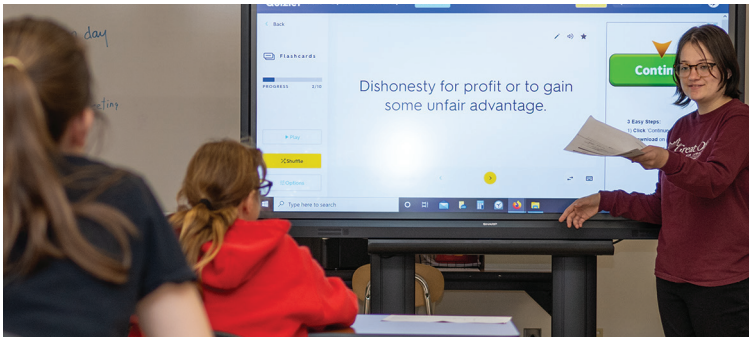

Is this YOU?

- I want to develop my employability skills
- I enjoy working hard
- I want to explore career options

You will learn to:

- Develop work-related problem solving skills
- Explore career options through hands-on activities
- Investigate careers by completing activities related to a field of interest
- Locate resources that can help you start your career of choice
- Develop a career interest portfolio that can be used to help get that first job
- Use appropriate workplace communication skills
- Manage time and work resources effectively
- Use and understand the legal aspects of employment
- Demonstrate professional communication and employability skills through a simulated work environment
- Develop leadership and collaborative work skills in a simulated work environment
- Get hands-on field experiences in the community

After completing the program, students can:

GO HERE >>>

- Begin an entry level job
- Work with an adult services agency
- Apply to a Project SEARCH program
- Pursue further training

WORK-BASED LEARNING

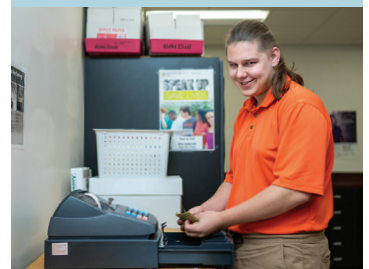

- Partner with local businesses to develop competitive employability skills on actual job sites
- Explore community-based employment opportunities
- Experience and learn independent living-skills like grocery shopping and banking in the community
- Learn and experience small-business and entrepreneurship skills with local business partners
- Collaborate and learn with other career tech programs

CAREER CREDENTIALS YOU CAN EARN

Currently offered; subject to change

RISE UP

CPR/First Aid

Project SEARCH

Available to students in all 36 public districts served by Great Oaks

Project SEARCH is a one-year transition to work program that prepares students with disabilities for employment through real-life work experience and employability training. The intern will learn about independent-living skills needed for a successful transition to adult life. The immersive workplace training program combines classroom instruction, career exploration, and hands-on learning through actual business partner worksite rotations. During the school year, the intern will rotate through three non-paid internship sites to learn work skills needed for the world of work. When the program is completed, interns may seek employment in career paths that match their skills and interests.

Is this YOU?

- I want to develop my employability skills
- I enjoy working hard
- I want to explore career options

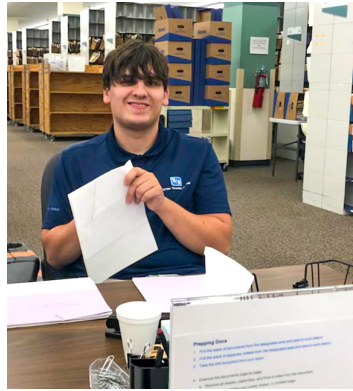

After completing the program, students can:

GO HERE >>>

- Begin an entry-level job
- Work with an adult services agency
- Pursue further training

ELIGIBILITY REQUIREMENTS

- Must be 18 – 21 years of age
- Designed for students who have completed graduation requirements and in the last year of school service with an IEP
- Qualify for services with Opportunities for Ohioans with Disabilities (OOD)
- Able and willing to follow all host site employee guidelines
- Meet host site eligibility background check and immunization requirements

Focus on Academics

At Great Oaks, students receive a quality education. We teach the skills that students need for success in careers and college, and that includes high levels of communication, math, and science abilities.

Classes are available for a wide range of student needs. Students come to Great Oaks with credits from different high schools and with individual goals.

Each student may have specific needs based on the credits already earned, the requirements of the chosen career-technical program, the requirements for graduation from high school, and the requirements for admission into college or other post-secondary programs.

College Credit Plus

You can earn college credit while you're still in high school through College Credit Plus classes available on campus and at area colleges. Talk to your high school counselor or a Great Oaks career specialist for details.

Classes may be added or removed based on Ohio graduation requirements and students' needs.

JROTC

Available at: Diamond, Laurel, Live, Scarlet

The Junior Reserve Officer Training Corps (JROTC) curriculum includes cultural awareness as well as global history and such other subjects as financial management. You'll gain a sense of accomplishment and self-esteem while learning personal responsibility, teamwork, and self-discipline. You'll also better understand the personal rights, responsibilities, and privileges of American citizens.

Leadership opportunities abound in the program, including the chance to attend one week of military/leadership training during the summer.

Great Oaks JROTC Color Guard teams are a familiar and well-respected sight throughout the community. JROTC cadets have excelled

in regional and national competition in a variety of subjects and skills.

Cadets are involved in a wide range of school activities including drill teams, air rifle teams, orienteering, athletics, parades and community events.

Great Oaks JROTC cadets take field trips to such locations as Gettysburg, Washington, D.C., and other areas to better understand their place in American history.

There is no obligation for students who enroll in the JROTC program to serve in the U.S. Armed Forces. However, students completing two or more years of JROTC may be eligible for advanced rank if they enlist upon graduation.

JROTC students earn one elective credit per year.

Satellite programs

Great Oaks also offers a variety of programs in local schools in collaboration with our affiliate school districts.

Many programs allow students to compete nationally and internationally through Career and Technical Student Organizations, including BPA, DECA, FFA, SkillsUSA, and more, and also gain practical experience through internships at area businesses. Students in Great Oaks satellite programs have earned national recognition in marketing, healthcare, engineering, business, and teaching, and finish high school ready for careers and college.

These programs also benefit affiliate school districts by expanding the educational offerings available to their students.

For the most current list of satellite programs, please visit hs.greatoaks.com.

Job training programs prepare adults for new careers

Job training programs at Great Oaks prepare adults for their choice of careers.

Part- and full-time programs teach the latest skills needed in today’s workforce, and short-term classes offer the chance to upgrade or learn new skills in a wide range of fields – from computer software to foreign language to personal enrichment. Visit adults.greatoaks.com for details and class listings.

Many job training programs are scheduled in the evening, allowing students to work while in training. Most full-time programs start in August and are completed in 11 months.
