

ENVIRONMENTAL CLUB

JOIN US!

Are you looking to reduce your carbon footprint?

Do you want to work with friends to improve the community for yourself and generations to come?

Would you enjoy learning new ways to recycle and live sustainably?

JOIN US!

We meet every other Tuesday from 2:45 - 3:30
in Room 103 with Mrs. Doolittle

WHAT DO WE DO?

Some activities we have done include...

- Organizing recycling drives
- Planting gardens with the ML Garden Club
- Discussing ways to live sustainably
- Making our own “green” products
- Learning about composting and hydroponic gardening

SOAP MAKING

We made our own natural soap using activated charcoal and brazilian clay.

The background of the slide shows several seedlings growing in clear plastic trays and green plastic pots. The plants are small and green, with some showing signs of being recently transplanted. The trays are filled with dark soil.

HYDROPONICS

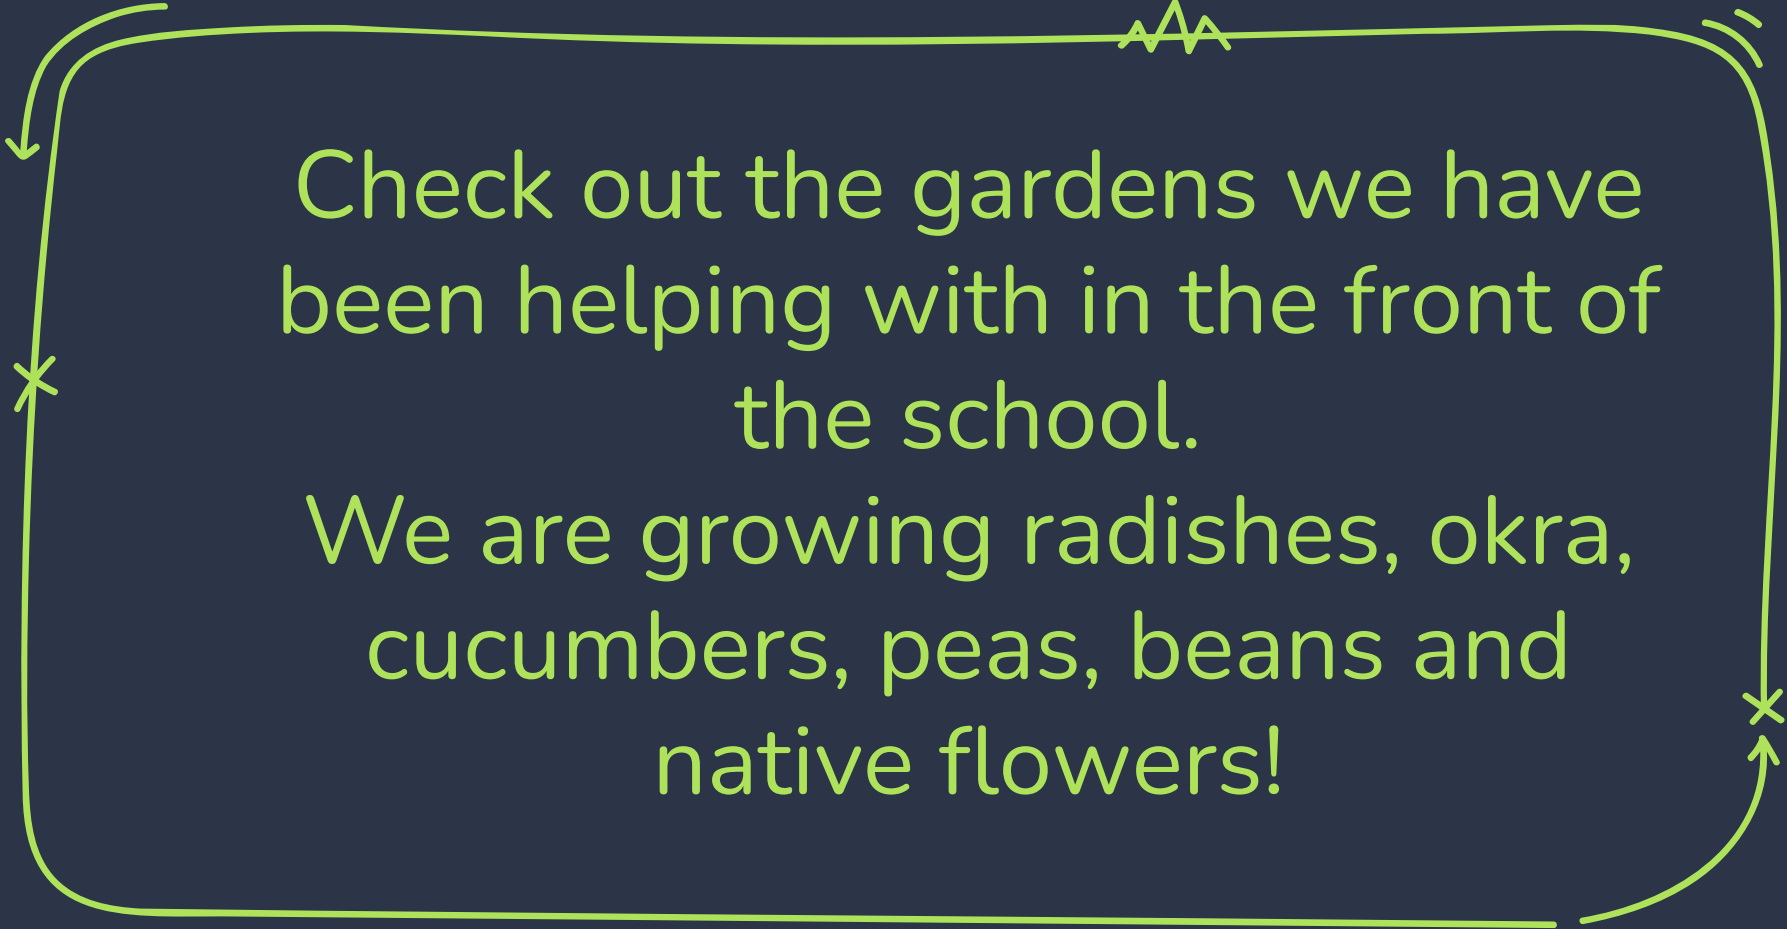

We learned about
hydroponic gardening
and grew our own plants
without soil!

WE ORGANIZED A CLEAN-UP DAY FOR
OUR SCHOOL PROPERTY!

WE ORGANIZED A CLEAN-UP DAY FOR
OUR SCHOOL PROPERTY!

Check out the gardens we have
been helping with in the front of
the school.

We are growing radishes, okra,
cucumbers, peas, beans and
native flowers!
